most haunted house in the uk: *A Brief Guide to Ghost Hunting* Leo Ruickbie, 2013-08-15 There has been an upsurge in books, television programmes, films and websites exploring the reality or otherwise of the spirit world. Not since the founding of The Ghost Club in 1862 and the Society for Psychical Research in 1882 has ghost hunting been so popular. Television and the internet, in particular, have fueled this new level of interest, creating a modern media phenomenon that spans the globe. But while the demand for information is high, good information remains scarce. *A Brief Guide to Ghost Hunting* leads us through the process of ghost hunting, from initially weighing the first report, to choosing equipment, and investigating and identifying the phenomena, with an analysis of the best places to go looking, methods of contacting the spirit world, how to explain paranormal activity and, crucially, how to survive the encounter. However, it is also a book about ghost hunting itself, drawing on 130 years of research in the cavernous archives of the Society for Psychical Research and even older history to find the earliest ghost stories. *A Ghost Hunting Survey* makes use of interviews with those billing themselves as ghost hunters to find out their views, motivations and experiences. New and original research makes use of statistics to map the nebulous world of apparitions while a *Preliminary Survey of Hauntings* offers an analysis of 923 reported phenomena from 263 locations across the UK. This is, as far as possible, an objective presentation of ghosts and ghost hunting. It is no wonder that mainstream science largely refuses to deal with the subject: it is too complicated. Without trying to convince you of any viewpoint, this book is intended to help you understand more.

A New Investigation Into Destructive Haunting* John Fraser, 2020-07-31 There are few factual books written about poltergeist phenomena, John's Fraser's *Poltergeist! A New Investigation Into Destructive Haunting* fills that void, advancing and updating Colin Wilson's work *Poltergeist!*, this study's namesake from over 38 years ago. Fraser takes readers on a journey from the Borley Rectory to the Isle of Man, and grounds his readers in an historical overview of 'Poltergeist phenomena'. He examines where such events overlap with other paranormal investigations of 'apparitional' ghosts. What do they have in common, what do they differ? To answer this, Fraser looks to new research on paranormal events, never before published

in book form. Fraser contends, perhaps controversially, that ghost sightings are and always will be ambiguous and near-impossible to prove, that only Poltergeist phenomena can be empirically verified.

most haunted house in the uk: Horror That Haunts Us Karrà Shimabukuro, Wickham Clayton, 2024-02-06 Horror's pleasures fundamentally hinge on looking backward, either on destabilising trauma, or as a period of comfort and happiness which is undermined by threat. However, this stretches beyond the scares on our screens to the consumption and criticism of the monsters of our past. The horror films of our youth can be locations of psychological and social trauma, or the happy place we go back to for comfort when our lives become unsettled. *Horror That Haunts Us: Nostalgia, Revisionism, and Trauma in Contemporary American Horror* is a collection of essays that brings together multiple theoretical and critical approaches to consider the way popular horror films from the last fifty years communicate, embody, and rework our view of the past. Whether we look at our current relationship to the scary movies of decades ago as personal or cultural memory, the way historical and sociopolitical events and frameworks – especially traumas – reframe the way we look at our pasts, or even the way recent horror films and video games look back at our past (and the past of the genre itself) through a filter of experience and history, this collection will show the close relationship between nostalgia and popular horror. These essays also demonstrate a range of unique and diverse points of view from both established and emerging scholars on the subject of horror and the past. Edited by seasoned horror experts Karrà Shimabukuro and Wickham Clayton, *Horror That Haunts Us* is a book with the aim of examining why we return again and again to certain popular horror films, either as remakes or reboots or as the basis for pastiche and homage.

most haunted house in the uk: *Haunted* E. Jay Gilbert, 2024-09-12 We all know the same ghosts: it's simply a question of how doggedly they haunt us. Part-chilling tale, part-memoir, part-cultural exploration, *Haunted: Ghost Stories and Their Afterlives* takes us through some of the most chilling and enduring ghost stories, and discusses what they reveal about the listener, the teller and the times we live in. E. Jay Gilbert has been collecting tales of the supernatural from her local area (a small village outside of Newcastle) for years and what surprised her most is how universal those are: not only in terms of recurring spectres that haunt us the world over (I'm looking

at you, White Ladies), but also how similar our experience of ghost-telling is, wherever we grew up. The result is a book which explores more widely the ghosts of the British Isles and how they have endured and changed through the ages: how they reflect the communities in which they originate, and how they are similar to and different from similar stories from across the world. Haunted doesn't just thrill with the tales of the inexplicable, but also asks why are we so fascinated by ghost stories and what do they tell us about the community and people who cultivate them. Why are some tropes universal, while others are very much unique to the place they haunt? Do we actually care about the identity of the ghost? Or are we more concerned about how the alleged sighting made us feel? Aimed at both believers and sceptics, it's not only for those who are looking to be frightened a little, but also for those interested in the psychology and history of the long tradition of supernatural storytelling. Absolutely irresistible, a fascinating account of the stories we tell ourselves and the ghosts we keep close - Amanda Mason A delightfully personal adventure into the paranormal worlds of these isles - seeking all sorts of spectres from banshee to black dogs. - Dr James Canton
