They reveal facets of New York social history and a volatile, misunderstood and secretive art form.

new york city tattoo: Written on the Body Jane Caplan, 2021-10-12 Despite the social sciences' growing fascination with tattooing--and the immense popularity of tattoos themselves--the practice has not left much of a historical record. And, until very recently, there was no good context for writing a serious history of tattooing in the West. This collection exposes, for the first time, the

richness of the tattoo's European and American history from antiquity to the present day. In the process, it rescues tattoos from their stereotypical and sensationalized association with criminality. The tattoo has long hovered in a space between the cosmetic and the punitive. Throughout its history, the status of the tattoo has been complicated by its dual association with slavery and penal practices on the one hand and exotic or forbidden sexuality on the other. The tattoo appears often as an involuntary stigma, sometimes as a self-imposed marker of identity, and occasionally as a beautiful corporal decoration. This volume analyzes the tattoo's fluctuating, often uncomfortable position from multiple angles. Individual chapters explore fascinating segments of its history--from the metaphorical meanings of tattooing in Celtic society to the class-related commodification of the body in Victorian Britain, from tattooed entertainers in Germany to tattooing and piercing as self-expression in the contemporary United States. But they also accumulate to form an expansive, textured view of permanent bodily modification in the West. By combining empirical history, powerful cultural analysis, and a highly readable style, this volume both draws on and propels the ongoing effort to write a meaningful cultural history of the body. The contributors, representing several disciplines, have all conducted extensive original research into the Western tattoo. Together, they have produced an unrivalled account of its history. They are, in addition to the editor, Clare Anderson, Susan Benson, James Bradley, Ian Duffield, Juliet Fleming, Alan Govenar, Harriet Guest, Mark Gustafson, C. P. Jones, Charles MacQuarrie, Hamish Maxwell-Stewart, Stephan Oettermann, Jennifer A. Rosecrans, and Abby Schrader.

new york city tattoo: *The Tattooed Lady* Amelia Klem Osterud, 2014-11-06 Living in a time when it was scandalous even to show a bit of ankle, a small number of courageous women covered their bodies in tattoos and traveled the country, performing nearly nude on carnival stages. These gutsy women spun amazing stories for captivated audiences about abductions and forced tattooing at the hands of savages, but little has been shared of their real lives. Though they spawned a cultural movement—almost a quarter of Americans now have tattoos—these women have largely faded into history. The *Tattooed Lady* uncovers the true stories behind these women, bringing them out of the sideshow realm and into their working class realities. Combining thorough research with more than a hundred historical photos, this updated second edition explores tattoo origins, women's history, circus lore, and includes even more personal and professional details from modern tattooed ladies. A fascinating read, *The Tattooed Lady* pays tribute to a group of unique and amazing women whose legacy lives on.

new york city tattoo: *Performing the Past* Jay Winter, Karin Tilmans, Frank Vree, 2025-10-01 *Performing the Past* is an investigation of the multiple social and culture practices through which

Europeans have negotiated the space between their history and their memory over the past 200 years. In museums, in opera houses, in the streets, in the schools, in theatres, in films, on the internet and beyond, narratives about the past circulate today at a dizzying speed. Producing and selling them is big business; if the past is indeed a foreign country, there are tens of thousands of tourist agents, guides, and pundits around to help us on our way, for a fee, to be sure. This collection of essays by renowned scholars from, among others, Yale, Columbia, Amsterdam Oxford, Cambridge, New York University and the European University Institute in Florence, is essential reading for anyone interested in today's memory boom. Drawing on different national and disciplinary traditions, the authors ultimately engage us with the ways in which Europeans continue a venerable tradition of finding out who they are, and where they are going, by performing the past.
