nobel prize winning literature: The Nobel Prize and the Formation of Contemporary World Literature Paul Tenngart, 2023-10-05 An exploration of the history, ambitions, and impact of the Nobel Prize in literature as it gained a central position in 20th-century global literary culture. Few scholars would deny that the Nobel Prize is the most prestigious literary award in the world. But what mechanisms made it possible for 18 Swedish intellectuals to become the world's most influential literary critics? Paul Tenngart argues that the Nobel Prize in literature has become a special kind of international canonization: exerted from a non-central, semi-peripheral position, the award sometimes confirms and reinforces hierarchical relations between literary languages and cultures, and sometimes disturbs established patterns of dominance and dependence. Drawing from a wide range of contemporary theories and methods, this multifaceted history of the Nobel Prize questions how the Swedish Academy has managed to keep the prize's global status through all the violent international crises of the last 120 years; how the selection of laureates shaped the idea of 'universal' literary values and defined literary quality across languages and cultures; and what impact the prize has had on the distribution and significance of particular works, literatures and

languages. The Nobel Prize and the Formation of Contemporary World Literature explores the history and impact of the Nobel Prize in literature from the first award in 1901 through recent controversies involving Bob Dylan and #MeToo, arguing that the prize is a unique performative act that has been – and still is – central in our continual and collective construction of world literature.

nobel prize winning literature: The Western Reinvention of Chinese Literature, 1910-2010 , 2022-07-04 During much of China's tumultuous 20th century, May 4th and Maoist iconoclasts regarded their classical literary heritage as a burden to be dislodged in the quest for modernization. This volume demonstrates how the traditions that had deeply impressed earlier generations of Western writers like Goethe and Voltaire did not lose their lustre; to the contrary, a fascination with these past riches sprouted with renewed vigour among Euro-American poets, novelists, and other cultural figures after the fall of imperial China in 1911. From Petrograd to Paris, and from São Paulo to San Francisco, China's premodern poetry, theatre, essays, and fiction inspired numerous prominent writers and intellectuals. The contributors survey the fruits of this engagement in multiple Western languages and nations.

nobel prize winning literature: Darwin's Incomplete Idea Gunnar Odhner, 2020-10-06 Why is progress in environmental protection slow and faltering? Is it because we misunderstand our place in nature? This book argues that it is the normative implications of Darwinism and their powerful grip on collective social consciousness that are partly responsible for the tardiness. For all its positive explanatory power and undoubted veracity, the normative implications of Darwinist thinking for our environmental predicament are stark: If we are children of Mother Nature equipped by her with a human nature, the responsibility for the deterioration of nature is partly Hers. This book takes a different standpoint. We are indeed children of Nature, but not primarily of the green nature or animal world but of the nature of language. We can understand how through the philosophy of Ludwig Wittgenstein, who states that "Language is a graft on instinctive behavior." In our instinctive use of words we are parts of nature in a way resembling mice, frogs and giraffes. We are not as free as we think when we talk about our "free will", because language uses us when we use it, hence our double roles as victims and instigators. The main thesis of this book is that rather than merely possessing language, we are language. If accepted, this realization may point the way to a more optimistic future for environmental protection and lay the foundations for a new analytical perspective on modern social behavior. Darwin's Incomplete Idea was much discussed when first

published in Sweden (Bokförlaget Anomali, 2013). The English edition exposes, for the first time, this important work to an international audience. It should be of interest to philosophers of language and social scientists concerned about the environment and our place in it.

nobel prize winning literature: Novel Sounds Florence Dore, 2018-06-12 The 1950s witnessed both the birth of both rock and roll and the creation of Southern literature as we know it. Around the time that Chuck Berry and Elvis Presley put their electric spin on Southern vernacular ballads, a canonical group of white American authors native to rock's birthplace began to write fiction about the electrification of those ballads, translating into literary form key cultural changes that gave rise to the infectious music coming out of their region. In *Novel Sounds*, Florence Dore tells the story of how these forms of expression became intertwined and shows how Southern writers turned to rock music and its technologies—tape, radio, vinyl—to develop the “rock novel.” Dore considers the work of Southern writers like William Faulkner, Flannery O'Connor, and William Styron alongside the music of Bessie Smith, Lead Belly, and Bob Dylan to uncover deep historical links between rock and Southern literature. Along with rock pioneers, Southern authors drew from blues, country, jazz, and other forms to create a new brand of realism that redefined the Southern vernacular as global, electric, and notably white. Resurrecting this Southern literary tradition at the birth of rock, Dore clarifies the surprising but unmistakable influence of rock and roll on the American novel. Along the way, she explains how literature came to resemble rock and roll, an anti-institutional art form if there ever was one, at the very moment academics claimed literature for the institution.

nobel prize winning literature: Essays and Interviews on Contemporary American Poets, Poetry, and Pedagogy Daniel Morris, 2024-09-10 In sixteen chapters devoted to avant-garde contemporary American poets, including Kenneth Goldsmith, Adeena Karasick, Tyrone Williams, Hannah Weiner, and Barrett Watten, prolific scholar and Purdue University professor Daniel Morris engages in a form of cultural repurposing by “learning twice” about how to attend to writers whose aesthetic contributions were not part of his education as a student in Boston and Chicago in the 1980s and 1990s when new formalism and post-confessional modes reigned supreme. Morris's study demonstrates his interest in moving beyond formalism to offer what Stephen Fredman calls “a wider cultural interpretation of literature that emphasizes the ‘new historicist’ concerns with hybridity, ethnicity, power relations, material culture, politics, and religion.” Essays address from multiple perspectives—prophetic, diasporic, ethical—the vexing problems and sublime potential of disseminating lyrics—the ancient form of transmission and preservation of the singular, private human voice across time and space—to an individual reader, in an environment in which e-poetry and digitalized poetics pose a crisis (understood as both opportunity and threat) to traditional page poetry.

This cultural history of the Saltire Society Literary Awards demonstrates the significance the awards have had within Scottish literary and cultural life. It is one piece of the wider cultural award puzzle and illustrates how, far from being parochial or niche, lesser-known awards, whose histories may be yet untold, play their own role in the circulation of cultural value through the consecration of literary value. The study of the Society's Book of the Year and First Book of the Year Awards not only highlights how important connections between literary awards and national culture and identity are within prize culture and how literary awards, and their founding institutions, can be products of the socio-political and cultural milieu in which they form, but this study also illustrates how existing literary award scholarship has only begun to scratch the surface of the complexities of the phenomenon. This book promotes a new approach to considering literary prizes, proposing that the concept of the literary awards hierarchy can contribute to emerging and developing discourses pertaining to literary, and indeed cultural, prizes more broadly.
