rising sun sean connery: Racism, Diplomacy, and International Relations Ko Unoki, 2022-02-21 Unoki addresses the significance of racism in international relations by focusing on its conception as a doctrine and its interrelationship with imperialism, its doctrinal role in the development of the discipline of International Relations (IR), and various episodes from Western and Asian history in which racism had affected state behavior and the practice of diplomacy. The creation of empires that oppressed indigenous peoples, the two World Wars and the campaigns of ethnic "cleansing" and genocide that accompanied these wars and other conflicts, and international movements calling for the elimination of racial discrimination, attest to the impact racial prejudice, or racism, has had on international relations. Despite this history, racism's relevance is seldom mentioned in IR courses offered in universities or IR textbooks. Instead, IR scholars have often explained the behavior of states using the framework of theories that highlight variables and themes such as power, fear, and the search for security in an anarchic world. Unoki demonstrates that racism has not only substantially influenced the course of international relations but that it continues to do so in the 21st century, making it imperative that policymakers are aware of racism's deleterious legacy. A vital resource for students, policymakers, and those who are interested in building a more tolerant and just world.

rising sun sean connery: Soft Power Superpowers Yasushi Watanabe, David L McConnell, 2015-01-28 The term soft power describes a country's ability to get what it wants by attracting rather than coercing others - by engaging hearts and minds through cultural and political values and foreign policies that other countries see as legitimate and conducive to their own interests. This book analyzes the soft power assets of the United States and Japan, and how they contributed to one of the most successful, if unlikely, bilateral relationships of the twentieth century. Sponsored by the U.S. Social Science Research Council and the Japan Foundation's Center for Global Partnership, the book brings together anthropologists, political scientists, historians, economists, diplomats, and others to explore the multiple axes of soft power that operate in the U.S.-Japanese relationship, and between the United States and Japan and other regions of the world. The contributors move beyond an either-or concept of hard versus soft power to a more dynamic interpretation, and demonstrate the important role of non-state actors in wielding soft power. They show how public diplomacy on both sides of the Pacific - bolstered by less formal influences such as popular cultural icons, product brands, martial arts, baseball, and educational exchanges - has led to a vibrant U.S.-Japanese relationship since World War II despite formidable challenges. Emphasizing the essentially interactive nature of persuasion, the book highlights an approach to soft power that has many implications for the world today.

rising sun sean connery: White Richard Dyer, 2013-10-18 White people are not literally or symbolically white; nor are they uniquely virtuous and pure. Racial imagery and racial representation are central to the organisation of the contemporary world but, while there are many studies of images of black and Asian people, whiteness is an invisible racial position. At the level of racial representation, whites are not of a certain race. They are just the human race, a 'colour'

against which other ethnicities are always examined. In *White*, Richard Dyer looks beyond the apparent unremarkability of whiteness and argues for the importance of analysing images of white people. Dyer traces the representation of whiteness by whites in Western visual culture, focusing on the mass media of photography, advertising, fine art, cinema and television. Dyer examines the representation of whiteness and the white body in the contexts of Christianity, 'race' and colonialism. In a series of absorbing case studies, he discusses the representations of whiteness in muscle-man action cinema, from Italian 'peplum' movies to the Tarzan and Rambo series; shows the construction of whiteness in photography and cinema in the lighting of white and black faces, and analyses the representation of white women in end-of-empire fictions such as *The Jewel in the Crown*, and traces the disturbing association of whiteness with death, in vampire narratives and dystopian films such as *Blade Runner* and the *Aliens* trilogy.

To mark the film's 30th anniversary, this exciting illustrated collection of new essays interrogates the *Jurassic Park* phenomenon from a diverse range of critical, historical, and theoretical angles. The primary focus is on *Jurassic Park* itself but there is also discussion of the franchise and its numerous spin-offs. As well as leading international scholars of film studies and history, contributors include experts in special effects, science on screen, fan studies, and palaeontology. Comprehensive, up to date, and accessible, *The Jurassic Park Book* appeals not only to students and scholars of Hollywood and contemporary culture, but also to the global audience of fans of the greatest of all dinosaur movies.

rising sun sean connery: *Three Black Spots - Our Adventures with Yoda* Krishnan, Raffaella Y. Nanetti, 2019-02-07 Is democracy still the best political regime for countries to adapt to economic and technological pressures and increase their level of prosperity? While the West seems to have stagnated in an environment of political mistrust, increasing inequality and low growth, the rise of the East has shown that it may not be liberal democracy that is best at accommodating the social mutations that technologies have triggered. The cases of China and Italy form the research focus as two extremes in growth performance. China is the star of globalisation in the East, while Italy is the laggard of globalisation in the West and a laboratory of creeping political meltdown now shared by other major Western economies. But is this forever? Introducing the 'innovation paradox' as the main challenge to the West and the notion of 'knowledge democracy' as key to sustainable growth, this book presents a new side to the debate on the Fourth Industrial Revolution (or fifth as the authors argue). It is a vital reading for all those questioning what kind of democracy positively impacts innovation as the force whose speed and direction transforms societies and economies.

rising sun sean connery: *Philip Kaufman* Annette Insdorf, 2012-03-15 American director Philip Kaufman is hard to pin down: a visual stylist who is truly literate, a San Franciscan who often makes European films, he is an accessible storyteller with a sophisticated touch. Celebrated for his vigorous, sexy, and reflective cinema, Kaufman is best known for his masterpiece *The Unbearable Lightness of Being* and the astronaut saga *The Right Stuff*. His latest film, *Hemingway & Gellhorn* (premiering May 2012 on HBO), stars Nicole Kidman and Clive Owen. In this study, Annette Insdorf argues that the stylistic and philosophical richness of Kaufman's cinema makes him a versatile auteur. She demonstrates Kaufman's skill at adaptation, how he finds the precise cinematic device for a story drawn from seemingly unadaptable sources, and how his eye translates the authorial voice from books that serve as inspiration for his films. Closely analyzing his movies to date (including *Invasion of the Body Snatchers*, *The Wanderers*, and *Quills*), Insdorf links them by exploring the recurring and resonant themes of sensuality, artistic creation, codes of honor, and freedom from manipulation. While there is no overarching label or bold signature that can be

applied to his oeuvre, she illustrates the consistency of themes, techniques, images, and concerns that permeates all of Kaufman's works.

rising sun sean connery: Japan-Bashing Narrelle Morris, 2013-01-11 The aim of this book is to examine and analyse the phenomenon of 'Japan-bashing', from its invention and popularisation in the United States in the late 1970s to the emergence of other national variants, including in Australia and Japan, to its gradual decline in the late 1990s. It is the first major book-length study of 'Japan-bashing' from a multinational perspective, one that attempts to place 'Japan-bashing' in its proper historical context and to examine its operation and legacy in the twenty-first century. Despite its importance in the study of discourses about Japan, as well as in understanding broader global changes in the late twentieth century and beyond, the phenomenon of 'Japan-bashing' remains largely neglected in published writings. Moreover, it is a far more complex phenomenon than has been assessed thus far. While, on first glance, 'Japan-bashing' merely seems to recall other periods in which Japan has been viewed as a dangerous 'other' to 'the West', such as the Western emphasis on the 'yellow peril' from the late nineteenth century as well as Allied anti-Japanese propaganda during World War II, 'Japan-bashing' also had its own distinctive characteristics. Moreover, while 'Japan-bashing' is often described as a quaint historical, rather than a pressing contemporary, phenomenon, it is actually by no means extinct. The ongoing influence of 'Japan-bashing' also has parallels in other 'bashing' phenomena, such as 'China-bashing'. This book will be of interest to scholars and postgraduate students in Japanese studies and international relations.

Yet how many of us have stopped to think about why? In *The Office: A Hardworking History*, Gideon Haigh traces from origins among merchants and monks to the gleaming glass towers of New York and the space age sweatshops of Silicon Valley, finding an extraordinary legacy of invention and ingenuity, shaped by the telephone, the typewriter, the elevator, the email, the copier, the cubicle, the personal computer, the personal digital assistant. Amid the formality, restraint and order of office life, too, he discovers a world teeming with dramas great and small, of boredom, betrayal, distraction, discrimination, leisure and lust, meeting along the way such archetypes as the Whitehall mandarin, the Wall Street banker, the Dickensian clerk, the Japanese salaryman, the French bureaucrat and the Soviet official. In doing so, Haigh taps a rich lode of art and cinema, fiction and folklore, visiting the workplaces imagined by Hawthorne and Heller, Kafka and Kurosawa, Balzac and Wilder, and visualised from Mary Tyler Moore to *Mad Men*, from *Network* to *9 to 5*-plus, of course, *The Office*. Far from simply being a place we visit to earn a living, the office emerges as a way of seeing the entire world.

rising sun sean connery: Imagining the popular in contemporary French culture Diana Holmes, David Looseley, 2017-10-03 This groundbreaking book is about what 'popular culture' means in France, and how the term's shifting meanings have been negotiated and contested. It represents the first theoretically informed study of the way that popular culture is lived, imagined, fought over and negotiated in modern and contemporary France. It covers a wide range of overarching concerns: the roles of state policy, the market, political ideologies, changing social contexts and new technologies in the construction of the popular. But it also provides a set of specific case studies showing how popular songs, stories, films, TV programmes and language styles have become indispensable elements of 'culture' in France. Deploying yet also rethinking a 'Cultural Studies' approach to the popular, the book therefore challenges dominant views of what French culture really means today.
