I want to move through my life from birth to the present. The 85 years of life have been eventful, and I am grateful for those who helped me arrive at this point in life. I want to convey the events that guided me through my early years, grade, high school, Army, marriage, college, teaching, and retirement. Each day was a learning experience. The goal was to make teaching more rewarding to the students. Many assignments that are included were not present when I started in 1965. My work during the summers helped me understand the innovations - NC (numerical control), CNC (computer numerical control), EDM (electric discharge machining). That learning helped me convey that knowledge to the students. Included are jobs made by the students that were designed to provide similar experiences found in the machining industry. There are stories about students and teachers that filled my days as a teacher. Lastly, there are assignments a person can try. My only comment is, "don't do the last two because they are difficult." That was a favorite comment to get students to work the difficult problems.
