the peregrine ja baker: The Peregrine J. A. Baker, 2004-12-31 This extraordinary, poetic portrait of two peregrine falcons is one of the most beloved works of nature writing ever published. From fall to spring, J.A. Baker set out to track the daily comings and goings of a pair of peregrine falcons across the flat fen lands of eastern England. He followed the birds obsessively, observing them in the air and on the ground, in pursuit of their prey, making a kill, eating, and at rest, activities he describes with an extraordinary fusion of precision and poetry. And as he continued his mysterious private quest, his sense of human self slowly dissolved, to be replaced with the alien and implacable consciousness of a hawk. It is this extraordinary metamorphosis, magical and terrifying, that these beautifully written pages record.

the peregrine ja baker: The Peregrine Falcon Derek Ratcliffe, 2010-06-30 The first edition of The Peregrine Falcon was widely recognised as a classic of its kind, documenting not only the species' biology but also the sad tale of its decline due to the impact of pesticides. This extensively revised and enlarged second edition takes full account of important new developments in the story of this bird during the intervening 12 years. It reports one of the few notable successes in wildlife conservation: the full restoration of British and Irish Peregrine populations, and their appreciable recovery in other countries where numbers had also been greatly reduced by the impact of organochlorine pesticides. The pattern of increase in Britain has been extremely varied, from districts where numbers are now far higher than at any time in recorded history, to others where the bird is now at its lowest ebb. The examination of the reasons for these differences helps us to understand the most recent developments in the Peregrine saga. Particular attention has been paid to the recent major advances in our knowledge of Peregrine biology, such as its movements, population turnover, food and nesting habits. Many of the tables and figures have been revised and

brought up to date so that this volume, like its predecessor, is once again by far the most detailed and readable reference on this most evocative of birds. Donald Watson's colour paintings, monochrome washes and line drawings, and the original photographs, illustrate the book as before. Cover illustration by Donald Watson.

the peregrine ja baker: *Being a Beast* Charles Foster, 2016-06-21 In this “tour de force of modern nature writing,” a passionate naturalist explores what it’s really like to be an animal—by living like them (The Guardian, UK). In *Being a Beast*, Charles Foster tests the limits of our ability to walk in another’s footsteps. He lives alongside badgers for weeks, sleeping in a sett in a Welsh hillside and eating earthworms, learning to sense the landscape through his nose rather than his eyes. He catches fish in his teeth while swimming like an otter; roots through London garbage cans as an urban fox; is hunted by bloodhounds as a red deer, nearly dying in the snow. And he follows the swifts on their migration route over the Strait of Gibraltar, discovering himself to be strangely connected to the birds. A lyrical, intimate, and completely radical look at the life of animals—human and other—*Being a Beast* mingles neuroscience and psychology, nature writing and memoir to cross the boundaries separating the species. It is an extraordinary journey full of thrills and surprises, humor and joy. And, ultimately, it is an inquiry into the human experience in our world, carried out by exploring the full range of the life around us.

the peregrine ja baker: **The Nature Essay** Simone Schröder, 2019-01-04 *The Nature Essay: Ecocritical Explorations* is the first extended study of a powerful literary form born out of the traditions of Enlightenment and Romanticism. It traces the varied stylistic paradigms of the ‘nature essay’ down to the present day. Reading essays as platforms for ecological discourse, the book analyses canonical and marginalised texts, mainly from German, English and American literature. Simone Schröder argues that the essay’s environmental impact is rooted in its negotiation of scientific, poetic, spiritual, and ethical modes of perceiving nature. Together, the chapters on these four aspects form a historical panorama of the nature essay as a genre that continues to flourish in our time of ecological crisis. Authors discussed include: Alexander von Humboldt, Henry David Thoreau, Virginia Woolf, Robert Musil, Ernst Jünger, W.G. Sebald, Kathleen Jamie, and David Foster Wallace.

the peregrine ja baker: **Urban Peregrines** Ed Drewitt, 2014-05-01 The Peregrine, the fastest bird in the world, has made a remarkable recovery over the past 30 years. As the species re-establishes itself around the world it is becoming a familiar sight in towns and cities. This

beautifully illustrated book is the first in-depth focus on the lives of Peregrines in towns and cities. The book is also a how-to-guide, with information on finding peregrines, studying their diet, ringing individuals for research, putting up nest boxes and enabling people to learn more about them through public viewing points or web cameras. Ed also discusses what makes a Peregrine urban, their contemporary relationship with people, and helps dispel some myths and reveal some truths about this agile predator.

In this landmark volume, Jim Crumley brings together a sweeping five-year quest to document the seasons and how he has seen them change. It explores the damage to the Earth’s natural rhythms, but also relishes the enduring beauty and wonder of nature itself. Drawing on his studies of each season over more than thirty years and reworking the volumes in his best-selling *Seasons* quartet, Crumley has created this unique account of our natural world today. After a lifetime of immersing himself in the landscapes of Scotland and a handful of other northern countries, Crumley has amassed a body of knowledge and insight and a bank of memorable imagery. Combining lyrical prose and passionate eloquence, he lays bare the impact of an increasingly chaotic climate and urges us all towards a more daring conservation vision that embraces everything from the mountain treeline to a second spring for the wolf.

the peregrine ja baker: *The Routledge Companion to Landscape Studies* Peter Howard, Ian Thompson, Emma Waterton, Mick Atha, 2018-09-03 This new edition of *The Routledge Companion to Landscape Studies* contains an updated and expanded selection of original chapters which explore research directions in an array of disciplines sharing a concern for ‘landscape’, a term which has many uses and meanings. The volume is divided into four parts: Experiencing landscape; Landscape, heritage and culture; Landscape, society and justice; and Design and planning for landscape. Collectively, the book provides a critical review of the various fields related to the study of landscapes, including the future development of conceptual and theoretical approaches, as well as current empirical knowledge and understanding. It encourages dialogue across disciplinary barriers and between academics and practitioners, and reflects upon the implications of research findings for local, national and international policy in relation to landscape. The Companion provides a comprehensive and up-to-date guide to current thinking about landscapes, and serves as an invaluable point of reference for scholars, researchers and graduate students alike.

the peregrine ja baker: *British Literature in Transition, 1960-1980: Flower Power* Catherine Mary McLoughlin, 2019 This volume traces transitions in British literature from 1960 to 1980, illuminating a diverse range of authors, texts, genres and movements. It considers innovations in form, emergent identities, changes in attitudes, preoccupations and in the mind itself, local and regional developments, and shifts within the oeuvres of individual authors.

the peregrine ja baker: *Haunted Spaces in Twenty-First Century British Nature Writing* Anneke Lubkowitz, 2020-06-08 This study investigates the figure of haunting in the New Nature Writing. It begins with a historical survey of nature writing and traces how it came to represent an ideal of ‘natural’ space as empty of human history and social conflict. Building on a theoretical framework which combines insights from ecocriticism and spatial theory, the author explores the spatial dimensions of haunting and ‘hauntology’ and shows how 21st-century writers draw on a Gothic repertoire of seemingly supernatural occurrences and spectral imagery to portray ‘natural’ space as disturbed, uncanny and socially contested. Iain Sinclair and Robert Macfarlane are

revealed to apply psychogeography's interest in 'hidden histories' and haunted places to spaces associated with 'wilderness' and 'the countryside'. Kathleen Jamie's allusions to the Gothic are put in relation to her feminist re-writing of 'the outdoors', and John Burnside's use of haunting is shown to dismantle fictions of 'the far north'. This book provides not only a discussion of a wide range of factual and fictional narratives of the present but also an analysis of the intertextual dialogue with the Romantic tradition which enfolds in these texts.

the peregrine ja baker: England's Green David Matless, 2024-08-12 A sweeping history of how ecological challenges have shaped English society over the last sixty years. England's Green explores how environmental concerns have shaped and reflected English national identity since the 1960s. From agriculture to leisure, climate change, folklore, archaeology, and religion, David Matless shows how national environmental debates connect to the local, regional, global, and postcolonial worlds. Moving across a breadth of material including government policy, popular music, ecological polemic, and television comedy, England's Green shows the richness and complexity of English environmental culture. Along the way, Matless tracks how today's debates over climate and nature, land, and culture, have been molded by events over the past sixty years.

the peregrine ja baker: The Story of Nature Jeremy Mynott, 2024-09-10 The story of humanity's evolving relationship with the natural world from pre-history to the present day Nature has long been the source of human curiosity and wonderment, and the inspiration for some of our deepest creative impulses. But we are now witnessing its rapid impoverishment, even destruction, in much of our world. In this beautifully illustrated book, Jeremy Mynott traces the story of nature--past, present and future. From the dramatic depictions of animals by the prehistoric cave-painters, through the romantic discovery of landscape in the eighteenth century, to the climate emergency of the present day, Mynott looks at the different ways in which humankind has understood the world around it. Charting how our ideas about nature emerged and changed over time, he reveals how the impulse to control nature has deep historical roots. As we reach an environmental crisis point, this vital study shows how human imagination and wonder can play a restorative role--and reveal what nature ultimately means to us.

the peregrine ja baker: The Nature of Spring Jim Crumley, 2023-02-28 Third in the Wainwright Prize-listed Seasons Tetralogy Spring marks the genesis of nature's year. As Earth's northern hemisphere tilts ever more towards the life-giving sun, the icy, dark days of winter gradually yield to the new season's intensifying light and warmth. Nature responds... For our flora and fauna, for the very land itself, this is the time of rebirth and rejuvenation - although, as Jim Crumley attests, spring in the Northlands is no Wordsworthian idyll. Climate chaos and its attendant unpredictable weather brings high drama to the lives of the animals he observes - the badgers, seals and foxes, the seabirds and the raptors. But there is also a wild, elemental beauty to the highlands and islands, a sense of nature in animation during this, the most transformative of seasons. Jim chronicles it all: the wonder, the tumult, the spectacle of spring.
