the planet of the grapes: *Planet of the Grapes* Robert Sechrist, 2017-04-24 A fascinating and comprehensive introduction to the geography, culture, and history of wine that identifies the significance of this simple beverage throughout human history and today. Wine was one the key founding foods of Western culture (bread and oil being the other two). It has played a key role in human history for thousands of years, having been used for enjoyment, rituals, and religious purposes; today, the production and consumption of wine is a billion-dollar industry that plays an important role in the global economy. *Planet of the Grapes: A Geography of Wine* provides an interesting and accessible lens through which students can learn about geography, culture, society, history, religion, and the environment. The chapters cover the historical geography of wine, document how drinking wine has often been condemned as a vice, and describe wines by region and type, thereby providing a cultural geography of wine. Readers will learn about the historical geography of wine, terroir (the environmental conditions that affect grape crops), grape biogeography, the process of winemaking from a geographic perspective, the economic global significance of the wine trade, the ongoing love-hate relationship between wine and government, and what makes individual wine regions distinct. The content is written to be comprehensible to individuals without detailed previous knowledge about wine but provides detailed information and insight that wine connoisseurs will find engaging. Additionally, through the story of wine comes a unique telling of the social transformations in America that have resulted from sources such as anti-immigrant sentiment, pseudoscience, and censorship.

the planet of the grapes: Planet Earth Under Divine Judgment Shawki Hanna, 2018-10-30 Earthquakes, floods, forest fires, famine, pestilence, disease, volcanos, tsunamis, terrorism, violence, economic uncertainty, racial and ethnic turmoil, war - What does it all mean? What is the earth coming to? People are afraid and wondering what the future might hold. It seems there is no security anymore. Upon finishing this book, the reader will have the inside story regarding what the future really holds for mankind. Some of life's most pressing questions will be answered such as: What happens when you die? Will the inhabitants of this earth annihilate themselves? Will the earth end with a bang or a whimper? Is there any hope for a brighter future? This book is written from a unique perspective - the perspective of a layman who has been fascinated with Biblical prophecy for years. All the points made are amply supported from Scripture alone. His desire is to share a different viewpoint which will awaken readers to study and think for themselves. In years gone by many people put their hope and confidence in God, but it seems now in the public square no one even thinks or cares about God. But, awake! God is still in control and He knows the end from the beginning! He created this earth, and He has not just left it to run on its own. He is intimately concerned about everything that happens, and He has grand plans for it. Read this book and find out what they are! The book recounts the great themes of the Bible - themes of faith, the nature of God and the Trinity, Christ in the Old Testament, Christ's atoning sacrifice on the cross and His resurrection bringing the promise of salvation to all mankind. Difficult subjects are addressed such as what happens when a person dies and the Antichrist, as well as the signs of the end of the world, the final judgments of God on unrepentant humanity as vividly portrayed in Revelation, and the last great battle when Jesus Christ is victorious over the Devil. See how the prophecies of Daniel, Ezekiel, Joel and Zechariah in the Old Testament dovetail perfectly with what Christ foretold and what John was shown in Revelation. The prophecies of the end of the age are more exciting than any thriller developed for TV or movies! Extremely difficult times are coming! This book will teach the reader how to survive the times of tribulation. Learn how a loving God will bring destruction upon the inhabitants of the earth. Evil has increased to the point where God, in His mercy must also display His justice and vengeance and bring an end to it all. It is a strange act for this God of love, but He has no choice. The inhabitants of earth have not only been destroying themselves, but they have destroyed the earth. God must intervene according to His appointed time which is coming soon! He can no longer bear to see His creation suffering. The destruction on earth is not the end of the story. The world will not just be destroyed and forgotten. There is wonderful hope and good news! Evil will not have the last word! God will have it! King Jesus, the Messiah, is coming back to this earth again, not as a tiny, helpless baby, but as a warrior King. He will rule and His believers will reign with Him for eternity. There will be new heavens and a new earth more glorious than anyone could ever imagine. There will be no more death, sorrow, pain or crying. Are you prepared for His coming?

the planet of the grapes: *Escondido Grape Day Festivals* Lucy Jones Berk, Stephen A. Covey, 2010 Escondido is the lilting Spanish name meaning hidden and was given to an irregular-shaped inland Southern California valley where an investment group planted 100 acres of grapes in the early 1880s. The dry-farmed grapes grew unusually large and sweet, which prompted business leaders to envision an attraction similar to Pasadena's Tournament of Roses. The first Grape Day Festival in 1908 commemorated an auspicious occasion in Escondido's water history and celebrated the grape as a symbol of the agricultural abundance of the region. The event attracted thousands of guests who could view the valley, farm displays, a grand parade, and entertainment while eating their fill of free grapes. But by mid-century, Grape Day disappeared along with the grape in Escondido. With the memory of the grape remaining clear, the Escondido Historical Society began the revival of the celebration in the 1970s. The centennial Grape Day Festival took place September 6, 2008.
