2023-07-07 This book is concerned with the early years of the Football Association Challenge Cup – more commonly known as the FA Cup – examining events from its inception in 1871–2 to the beginning of the Football League in 1888–9. The work is underpinned by the figurational sociology of Norbert Elias, employing his ideas around the European 'civilising process', power and lengthening chains of human interdependency. Most of all, the majority of the text has been compiled using primary source material, such as newspaper reports and the minutes of the Football Association, which encourages original and unique additions to the body of knowledge. There exist no comparable offerings on the time period involved, with the book providing a distinct perspective for scholars and non-specialists alike. The initial years of the competition were dominated by teams consisting mainly of upper-middle-class southern amateurs. However, by the early 1880s, they were supplanted by men who were initially covert- and eventually overt – professionals, many of whom hailed from Scotland, but mainly represented clubs from Lancashire and the West Midlands. The FA Cup, despite losing some of its allure when compared to competitions such as the UEFA Champions League, still retains a magic of its own in the English football calendar.

2021-12-08 The 150th anniversary of the first FA Cup competition, the earliest knockout tournament in the history of football, will be celebrated during the 2021-2022 season. The first set of matches was played on 11 November 1871, with the Engineers reaching the final played at Kennington Oval on 16 March 1872. During the first decade of the competition three teams associated with the military, Royal Engineers, 1st Surrey Rifles and 105th Regiment, were involved in 74 matches. They won more than half of them and scored 154 goals. The Army also produced one of the most respected administrators in the history of football, in the form of Major Francis Marindin, who was involved in the founding of the FA Cup, played in two finals, and refereed a further nine. Military men and units provided a number of 'firsts' in the early years of football. The Royal Engineers played in the first ever FA Cup final; Lieutenant James Prinsep of the Essex Regiment was the youngest footballer to appear in an FA Cup final until 2004, although he remains the youngest to complete a full match; Lieutenant William Maynard of the 1st Surrey Rifles played for England in the first ever official international match against Scotland; Captain William Kenyon-Slaney of the Grenadier Guards scored the first ever goal in an official international match, while playing for England; and Lieutenant Henry Renny-Tailyour of the Royal Engineers scored the first ever goal for Scotland in the same match. At a time when there has been talk of a financially-motivated breakaway European Super League, James gives the reader the opportunity to look back at a time when football was played for the game itself. Using his vast knowledge concerning Victorian football and military history, *The Early Years of the FA Cup* explores the fascinating history of the Army's involvement in the early years of the world's most popular sport. With detailed descriptions of the finals and other matches involving the military teams during football's heyday, this book, for the first time, then follows the men as they went on campaigns to build roads and bridges in hostile territory, provide maps for commanders in famous conflicts such as The Zulu War, Afghanistan, the Sudan, and the Boer Wars, and saw active service on the Western Front during the First World War. In some cases they never returned. Often great footballers are referred to as 'heroes' – in the case of the men who played for the Army teams in the early FA Cup competitions, such an epithet is genuinely true.

Ian Ridley took a long hard look at the game back in the 1980s against a backdrop of recession, strikes and football hooliganism. In this new book he examines just how far the game has come, sucking in players and money from around the globe and providing fame, fortune and hours of pleasure in return. It includes: - Interviews with major players such as the chairman of the FA, top-flight managers, and the broker who sold Chelsea to Abramovich. - A behind-the-scenes look at clubs such as Fulham and Manchester United, as well as roles within football like refereeing. - An exploration of the finances of the game, its changing profile and the growing gap between the Premier League and the rest of the game. As he examines the changes that have occurred over the last twenty years, Ridley seeks to discover if the soul of the game still exists. With his eye for detail, his knack for voices and his incisive intelligence, he has woven together a rich and fascinating story of football's metamorphosis from social outcast to favourite child.
