aa route planner maps uk: The Routledge Handbook of Cartographic Humanities Tania Rossetto, Laura Lo Presti, 2024-06-03 The Routledge Handbook of Cartographic Humanities offers a vibrant exploration of the intersection and convergence between map studies and the humanities through the multifaceted traditions and inclinations from different disciplinary, geographical and cultural contexts. With 42 chapters from leading scholars, this book provides an intellectual infrastructure to navigate core theories, critical concepts, phenomenologies and ecologies of mapping, while also providing insights into exciting new directions for future scholarship. It is organised into seven parts: Part 1 moves from the depths of the humans-maps relation to the posthuman dimension, from antiquity to the future of humanity, presenting a multidisciplinary perspective that bridges chronological distances, introspective instances and social engagements. Part 2 draws on ancient, archaeological, historical and literary sources, to consider the materialities and textures embedded in such texts. Fictional and non-fictional cartographies are explored, including layers of time, mobile historical phenomena, unmappable terrain features, and even animal perspectives. Part 3 examines maps and mappings from a medial perspective, offering theoretical insight into cartographic mediality as well as studies of its intermedial relations with other media. Part 4 explores how a cultural cartographic perspective can be productive in researching the digital as a human experience, considering the development of a cultural attentiveness to a wide range of map-related phenomena that interweave human subjectivities and nonhuman entities in a digital ecology. Part 5 addresses a range of issues and urgencies that have been, and still are, at the centre of critical cartographic thinking, from politics, inequalities and discrimination. Part 6 considers the growing amount of literature and creative experimentation that involve mapping in practices of eliciting individual life histories, collective identities and self-accounts. Part 7 examines the variety of ways in which we can think of maps in the public realm. This innovative and expansive Handbook will appeal to those in the fields of geography, art, philosophy, media and visual studies, anthropology, history, digital humanities and cultural studies as well as industry professionals.

aa route planner maps uk: A Man & A Pram Mark Cundy, 2011-06-23 People travel from London to New York every day - nothing unusual about that, but if your journey took you 14 months, you might rightly wish to seek compensation from the airline! However, Mark Cundy's journey was different; his was a walking odyssey of immense proportions, covering 5,500 miles between October 2004 and December 2005 across three continents, in aid of Cancer Research UK and its overseas equivalents. Facing a lonely, often gruelling trek, Mark encountered many setbacks and obstacles en route: limited resources, accommodation problems, language barriers, extremes of climate, red tape, cultural differences and health issues, and met plenty of 'angels' and a few 'devils' as his journey pressed on through Europe, across Russia and on to Australia and finally the USA. There were many times he stopped to wonder, "What am I doing?" But in true Forrest Gump style, he just kept on walking. This is an extraordinary story, told with immense humour, of true grit and determination against the odds to fulfil a dream that had been many years in the making, one that took the 'World Walker' through every gamut of emotion, from fear to triumph and desperation to sheer joy. It was a defining achievement. And to what does the 'pram' in the title refer? He didn't really take a baby with him, did he? Well, you'll just have to read it and see!
