brittany and normandy france map: The State in Early Modern France James B. Collins,

1995-09-28 This major new textbook addresses fundamental questions about the nature of the state in early modern Europe through an analysis of the most important continental state, France. Professor Collins abandons the traditional formulation of the absolute monarchy, and presents in its place a state that evolved to meet the needs of the French elites. Collins offers a detailed analysis of French society, to provide the broader context for the development of the French state. The model that emerges from his synthesis is one that relied more on persuasion and congruity of influence than on arbitrary authority, and Collins argues that fundamental changes in French society made the monarchical, ministerial state a dangerous anachronism by the 1750s, leading to political impasse by the second half of the eighteenth century. Collins offers a fundamental reinterpretation of the state relevant to historians and students of political thought.

brittany and normandy france map: French on Shifting Ground Nathalie Dajko, 2020-11-24 In *French on Shifting Ground: Cultural and Coastal Erosion in South Louisiana*, Nathalie Dajko introduces readers to the lower Lafourche Basin, Louisiana, where the land, a language, and a way of life are at risk due to climate change, environmental disaster, and coastal erosion. Louisiana French is endangered all around the state, but in the lower Lafourche Basin the shift to English is accompanied by the equally rapid disappearance of the land on which its speakers live. *French on Shifting Ground* allows both scholars and the general public to get an overview of how rich and diverse the French language in Louisiana is, and serves as a key reminder that Louisiana serves as a prime repository for Native and heritage languages, ranking among the strongest preservation regions in the southern and eastern US. Nathalie Dajko outlines the development of French in the region, highlighting the features that make it unique in the world and including the first published comparison of the way it is spoken by the local American Indian and Cajun populations. She then weaves together evidence from multiple lines of linguistic research, years of extensive participant observation, and personal narratives from the residents themselves to illustrate the ways in which language—in this case French—is as fundamental to the creation of place as is the physical landscape. It is a story at once scholarly and personal: the loss of the land and the concomitant loss of the language have implications for the academic community as well as for the people whose cultures—and identities—are literally at stake.
