Gravity affects every aspect of our physical being, but there's a psychological force just as powerful—yet almost nobody has heard of it. It's responsible for bringing groups of people together and pulling them apart, making certain goals attractive to some and not to others, and fueling cycles of anxiety and conflict. In *Wanting*, Luke Burgis draws on the work of French polymath René Girard to bring this hidden force to light and reveals how it shapes our lives and societies. According to Girard, humans don't desire anything independently. Human desire is mimetic—we imitate what other people want. This affects the way we choose partners, friends, careers, clothes, and vacation destinations. Mimetic desire is responsible for the formation of our very identities. It explains the enduring relevancy of Shakespeare's plays, why Peter Thiel decided to be the first investor in Facebook, and why our world is growing more divided as it becomes more connected. *Wanting* also shows that conflict does not arise because of our differences—it comes from our sameness. Because we learn to want what other people want, we often end up competing for the same things. Ignoring our large similarities, we cling to our perceived differences. Drawing on his experience as an entrepreneur, teacher, and student of classical philosophy and theology, Burgis shares tactics that help turn blind wanting into intentional wanting—not by trying to rid ourselves of desire, but by desiring differently. It's possible to be more in control of the things we want, to achieve more independence from trends and bubbles, and to find more meaning in our work and lives. The future will be shaped by our desires. *Wanting* shows us how to desire a better one.

hells kitchen marco pierre white: *Culinary Man and the Kitchen Brigade* Jordan Fallon, 2024-09-23 *Culinary Man and the Kitchen Brigade* offers an exploration of the field of normative subjectivity circulated within western fine dining traditions, presenting a theoretical analysis of the governing relationship between the chef, who embodies the Culinary Man, and the fine dining brigade. The book offers a unique treatment of western haute cuisine's interlocking regime of labor and aesthetics and theorizes the underexplored kitchen brigade as a model of disciplinary formation. It deploys a heterogeneous set of disciplinary discourses and practices which have the effect of consolidating monopolies on epistemic authority and governance. Each position within the brigade's hierarchy is subject to distinct, though related, disciplinary practices. Thus, chapters identify the specific practices pertinent to each brigade subject, while also illuminating how they fit together as a coherent hegemonic project. The application of Wynterian and Foucauldian insight to the fine dining brigade offers a political theory of culinary work which departs from other food studies texts. Notably, this work offers an in-depth treatment of the brigade's colonial dimensions which resonate with emerging critiques, scholarly and general, of the race and gender politics of restaurant labor. The concluding chapters seek to identify where extant modes of resistance or alternative forms of culinary organization may hold the potential to move beyond the hegemonic overrepresentation of Culinary Man. This book will be of great interest to students and scholars from across the social sciences and humanities interested in critical food studies, political and cultural theory, and popular culinary culture.

Challenging the most basic assumptions of the 'end' of feminism, this book argues that invidious forms of gender re-stabilisation are being re-established. Consumer and popular culture encroach on the terrain of so-called female freedom, appearing supportive of female success, yet tying women into new post-feminist neurotic dependencies. With a scathing critique of 'women's empowerment', McRobbie has developed a distinctive feminist analysis that she uses to examine socio-cultural phenomena embedded in contemporary women's lives: from fashion photography and the television 'make-over' genre to eating disorders, body anxiety and 'illegible rage'. A turning point in feminist theory, The Aftermath of Feminism will set a new agenda for gender studies and cultural studies.

This bumper selection, which also includes eminent diarists, mad letter-writers and Boris Johnson, amounts to a masterclass in comic writing, lovingly compiled and edited by Marcus Berkmann, who still can't believe he wrote a monthly pop column for the magazine for twenty-eight years without being fired.
