jean louis andre theodore gericault: Théodore Géricault Nina Athanassoglou-Kallmyer, 2010-10-20 This new monograph explores the life and works of Theodore Gericault (1791-1824), whose compelling career and legacy continue to captivate audiences, artists, and critics alike. In her comprehensive survey, Nina Athanassoglou-Kallmyer pays tribute to established Gericault scholarship while reassessing the career of an artist too easily miscast as the archetypal 'tortured soul' of art-historical Romantic mythology. She examines Gericault's career in the context of France under the Restoration, during which Louis XVIII's controversial rule resulted in vigorous popular debate over civic structures, the political process, and even aesthetic categories. Gericault immersed himself in these polemics, taking an intense interest in the *faits divers*, or 'daily happenings', of his time. The author explores his interest in medical and psychiatric science (as exemplified by a series of portraits of mental patients), his empathy for the poor and dispossessed (the subject of numerous lithographs), and the entrepreneurial spirit that led him to exhibit his epic canvas, the Raft of the Medusa, in London as a commercial venture. Gericault is presented as an artist committed to capturing contemporary life with creative integrity and dramatic verve. Born into a provincial middle-class family, Gericault used an inheritance from his mother's death to pursue his artistic vocation, training first under Vernet and Guérin before spending four years on his own course of independent study. His choice of Renaissance and Baroque masters such as Titian, Caravaggio, and Rubens as models shaped his aesthetic agenda and encouraged him to break away from the Neoclassicism favored by his early tutors. Further influenced by a vogue for modern, military subjects, Gericault presented himself at the 1812 Salon with the dashing Charging Chasseur, a critical success that the artist was unable to repeat when he presented again at the Salon three years later. A period of stylistic experimentation followed: Gericault traveled to Rome to absorb classical examples and strove to develop his 'grand' style. The effort spent in Rome served Gericault well when he returned to France and began work on the Raft of the Medusa, a politically charged project that absorbed the painter in obsessive study for more than a year. In her analysis of this enduring image, Athanassoglou-Kallmyer addresses the perception of Gericault as a tragic figure, drawn by temperament to the depiction of morbid and macabre themes, discussing this painting among others in the context of Romantic taste for the 'Gothic' and its political and artistic implications. Gericault suffered a nervous breakdown in 1819, following the Medusa's disappointing reception at the Salon, and retreated to England, where he abandoned grand projects in favor of lighter, more fashionable work. It was not until 1823, on his deathbed, that Gericault's interest in large-scale work was revived and he produced a wealth of sketches for future compositions. These plans, full of energy and drama, serve to suggest why this immensely talented artist has continued to influence artists from the time of his death to the present.

jean louis andre theodore gericault: Theodore Gericault, Painting Black Bodies Albert Alhadeff, 2020-04-07 This book examines Théodore Géricault's images of black men, women and children who suffered slavery's trans-Atlantic passage in the late eighteenth and early nineteenth centuries, including his 1819 painting *The Raft of the Medusa*. The book focuses on Géricault's depiction of black people, his approach towards slavery, and the voices that advanced or denigrated them. By turning to documents, essays and critiques, both before and after Waterloo (1815), and, most importantly, Géricault's own oeuvre, this study explores the fetters of slavery that Gericault challenged—alongside a growing number of abolitionists—overtly or covertly. This book will be of interest to scholars in art history, race and ethnic studies and students of modernism.

jean louis andre theodore gericault: The Raft John J. Ciofalo, 2009-11 This is the true story

of the tragic and twisted life of Théodore Géricault. While immersed in an illicit affair with his Aunt, the Romantic French artist at last finds a topic to match his terrifying darkness. He becomes obsessed with it to the point of madness, whereupon he shaves his head, locks himself in his studio, and drags cadavers from the morgue to feel, taste, touch, and paint - making love to death itself.

jean louis andre theodore gericault: *Portraits of the Insane* Robert Snell, 2018-03-29 In the early 1820s, in the gloomy aftermath of the 1789 Revolution and the Napoleonic wars, the French Romantic painter Theodore Géricault (1791-1824) made five portraits of patients in an asylum or clinic. No depictions of madness before or since can compare with them for humanity, straightforwardness and immediacy. The portraits challenge us to find responses in ourselves to the face and the embodied mysteries of the other person, and to our own internal (unconscious, disavowed) otherness: in this sense, Géricault was a painter-analyst. The challenge could not be more urgent, in our world of suspicion of the stranger, and of the medicalisation of madness. The book sketches the history of this last process, from the Enlightenment through to the Revolution and its public health policies, to the birth of the asylum in its interface with the penal system. But there was also a new medico-philosophical conviction that the mad were never wholly mad, and their suffering and disturbance might best be addressed through relationship and speech.

jean louis andre theodore gericault: *Deaccessioning and Its Discontents* Martin Gammon, 2018-11-06 The first history of the deaccession of objects from museum collections that defends deaccession as an essential component of museum practice. Museums often stir controversy when they deaccession works—formally remove objects from permanent collections—with some critics accusing them of betraying civic virtue and the public trust. In fact, Martin Gammon argues in *Deaccessioning and Its Discontents*, deaccession has been an essential component of the museum experiment for centuries. Gammon offers the first critical history of deaccessioning by museums from the seventeenth to the twenty-first century, and exposes the hyperbolic extremes of “deaccession denial”—the assumption that deaccession is always wrong—and “deaccession apology”—when museums justify deaccession by finding some fault in the object—as symptoms of the same misunderstanding of the role of deaccessions in proper museum practice. He chronicles a series of deaccession events in Britain and the United States that range from the disastrous to the beneficial, and proposes a typology of principles to guide future deaccessions. Gammon describes the liquidation of the British Royal Collections after Charles I's execution—when masterworks were used as barter to pay the king's unpaid bills—as establishing a precedent for future deaccessions. He recounts, among other episodes, U.S. Civil War veterans who tried to reclaim their severed limbs from museum displays; the 1972 “Hoving affair,” when the Metropolitan Museum of Art sold a number of works to pay for a Velázquez portrait; and Brandeis University's decision (later reversed) to close its Rose Art Museum and sell its entire collection of contemporary art. An appendix provides the first extensive listing of notable deaccessions since the seventeenth century. Gammon ultimately argues that vibrant museums must evolve, embracing change, loss, and reinvention.

jean louis andre theodore gericault: *Charleston Renaissance Man* Ralph C. Muldrow, 2022-10-25 A study of the life, work, and extraordinary influence of an innovative architect Albert Simons came of age during the vibrant years of the Charleston Renaissance in the early twentieth century. His influential social circle included artists, musicians, writers, historians, and preservationists, many supporting the cultural revival that was reshaping the city. Through his architectural design and passion for preservation, Simons contributed tremendously to the cultural environment of the Charleston Renaissance. His work helped to mold the cityscape and set a course that would both preserve the historic South Carolina city and carry it forward, allowing it to become the thriving urban center it is today. Simons brought both a sense of history and place, born of his

deep roots in Charleston, as well as a cosmopolitanism developed during his years of training at the University of Pennsylvania and travels on the European continent. The melding of those sensibilities was a perfect match for the age and made him a true Charleston Renaissance Man. While he preferred the more traditional Beaux-Arts, Classical, and Colonial Revival styles, Simons had the unique ability to balance traditional and modern styles. He believed preservation in Charleston was about retaining the city's architectural heritage but doing so in a way that allowed the city to grow and progress—to be a living city. Looking forward and simultaneously looking back is quintessentially Charleston and a hallmark of Simons's life and work. Featuring more than 100 color and black and white photographs and illustrations alongside author Ralph Muldrow's compelling storytelling, this fascinating book reveals the deep connection between Simons and the Charleston cityscape. With a foreword by Witold Rybczynski, the award-winning author of numerous books including *Charleston Fancy: Little Houses and Big Ideas in the Holy City*, Muldrow's *Charleston Renaissance Man* is a celebration of Charleston's unique architectural character and the architect who embodied the Charleston Renaissance.
