light m john harrison: Light M. John Harrison, 2007 In Harrison's dangerously illuminating new novel, three quantum outlaws face a universe of their own creation, where the rules are made up--and broken--along the way, and where there's only one thing more mysterious than darkness.

light m john harrison: Light Michael John Harrison, 2002 Beneath the unbearable light of the Kefahuchi Tract -- a huge, fulminating ocean of radiant energy deep in the galaxy -- three objects lie on the barren surface of an asteroid: an abandoned spacecraft, a pair of what look like bone dice, and a human skeleton. What they are, and what they mean, are the mysteries explored and unwrapped in LIGHT, M. John Harrison's astonishing return to the imaginative terrain of science fiction. Three intertwining strands of narrative -- one contemporary, the others set in different parts of the galaxy in the year 2400 -- make up the novel. In the here and now is Michael Kearney, destined to take part in a discovery which will make possible interstellar travel, but at present a tortured individual confronted by a strange and possibly alien entity known as the Shrandar. In the future there are Seria-Mau Genlicher, spaceship pilot, surgically and biologically modified to interact directly with her ship, the White Cat; and Ed Chianese, drifter and sensation seeker, currently down and out in New Venusport, with everybody in the universe apparently keen to take from him what he owes. This is a science fiction novel written with a level of imaginative intensity and literary mastery the genre has seldom glimpsed before. It is, in every sense, dazzling.

light m john harrison: Selected Works M John Harrison HARRISON, 2020-08-20 Throughout his career, M. John Harrison's writing has defied categorisation, building worlds both unreal and all-too real, overlapping and interlocking with each other. His stories are replete with fissures and portals into parallel dimensions, unidentified countries and lost lands. But more important than the places they point to are the obsessions that drive the people who so believe in them, characters who spend their lives hunting for, and haunted by, clues and maps that speak to the possibility of somewhere else. This selection of stories, drawn from 50 years of writing, bears witness to that desire for difference: whether following backstreet occultists, amateur philosophers, down-and-outs or refugees, we see our relationship with 'the other' in microscopic detail, and share in Harrison's rejection of the idea that the world, or our understanding of it, could ever be settled. The exactness, acute self-consciousness and vigilant self-restraint of Harrison's writing give it piercing authenticity. Ursula K. light m john harrison: Remote Performances in Nature and Architecture Bruce Gilchrist, Jo Joelson, 2016-03-03 Outlandia is an off-grid artists' fieldstation, a treehouse imagined by artists London Fieldworks (Bruce Gilchrist & Jo Joelson) and designed by Malcolm Fraser Architects, situated in Glen Nevis, opposite Ben Nevis. It is performative architecture that immerses its occupants in a particular environment, provoking creative interaction between artists and the land. This book explores the relationship between place and forms of thought and creative activity, relating Outlandia and the artists there to the tradition of generative thinking and making structures that have included Goethe's Gartenhaus in Weimar, Henry Thoreau's cabin at Walden Pond and

Dylan Thomas's writing shack in Laugharne. Based on a series of residencies and radio broadcasts produced by London Fieldworks in collaboration with Resonance 104.4fm, the Remote Performances project enabled twenty invited artists to consider and engage in transmissions, sound performances and dialogues on their artmaking strategies immersed in this specific rural environment of mountain, forest and river; flora and fauna. Some artists engaged in dialogue with people living and working in the area with a range of specialisms and experience in, for examples, forestry, mountain culture, wildlife, tourism, and local history. This book explores the ways in which being in the field impacts on artists and permeates through to the artworks they create. It considers the relationship between geography and contemporary art and artists' use of maps and fieldwork. It charts these artists' explorations of the ecological and cultural value of the natural environment, questioning our perceptions and relationships to landscape, climate and their changes. The book is an inspiring collection of ways to think differently about our relationship with the changing natural environment. The book includes essays by Jo Joelson, Francis McKee, Tracey Warr and Bruce Gilchrist, and texts, images and drawings by the artists: Bram Thomas Arn

light m john harrison: A Life in Fifty Books Anthony Cheetham, 2025-03-06 'There are good publishers and there are great publishers. And then there's Anthony Cheetham.' Richard Dawkins In November 1966, by way of Mexico City, Eton College, Balliol College, Oxford, and a Norwegian raspberry farm, Anthony Cheetham entered the doors of a publishing company for the first time to begin work as a junior editor. Fifty-eight years later he could look back on a career in which he had shaped the landscape of post-war British publishing to a significant degree, having established such prominent and notably successful companies as Century, Orion, Quercus and Head of Zeus, and launched imprints - from Abacus in 1973 to Zephyr in 2017 - that continue to flourish in the third decade of the twenty-first century. Starting with Homer's *Odyssey* and ending with works by the evolutionary biologist Richard Dawkins and the German historian Ernst Kantorowicz, Anthony Cheetham has selected fifty books as mileposts with which to map the course of his long and productive career. Many of these are titles that he himself published (*Dune*, *The Thorn Birds*, *A Suitable Boy*, *Meetings with Remarkable Trees*, *The Girl with the Dragon Tattoo*); some are books he wished he had published (Stephen Hawking's *A Brief History of Time*); others are simply masterworks that left an indelible mark on him (*The Lord of the Rings*, *War and Peace*). *A Life in Fifty Books* is an affectionate and revelatory account of a publishing life remarkable for its longevity, its entrepreneurial energy and for the breadth and catholicity of its output - which runs the gamut of seriousness from academically distinguished works of history, science and philosophy to *Confessions of a Window Cleaner*. Full of encounters with remarkable individuals as well as extraordinary books and embellished with beautiful photographs of book jackets from the 1950s to the present day, *A Life in Fifty Books* is an engagingly written survey of an industry which, in its author's well-chosen words, offers its practitioners '...a passport to roam across the entire spectrum of human experience, endeavour and belief'.

light m john harrison: The Course of the Heart M. John Harrison, 2006-03-01 John M. Harrison delivers an extraordinary, genre-bending novel that weaves together mythology, sexuality, and the troubled past and present of Eastern Europe. It begins on a hot May night, when three Cambridge students carry out a ritualistic act that changes their lives. Years later, none of the participants can remember what exactly transpired; but their clouded memories can't rid them of an overwhelming sense of dread. Pam Stuyvesant is an epileptic haunted by strange sensual visions. Her husband Lucas believes that a dwarfish creature is stalking him. Self-styled Sorcerer Yaxley becomes obsessed with a terrifyingly transcendent reality. The seemingly least effected participant in the ritual (who is haunted by the smell of roses) attempts to help his friends escape the torment that has engulfed their lives. Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers interested in science fiction (space opera, time travel, hard SF, alien invasion, near-future dystopia), fantasy (grimdark, sword and sorcery, contemporary urban fantasy, steampunk, alternative history), and horror (zombies, vampires, and the occult and supernatural), and much more. While not every title we publish becomes a New York

Times bestseller, a national bestseller, or a Hugo or Nebula award-winner, we are committed to publishing quality books from a diverse group of authors.

light m john harrison: Empty Space M. John Harrison, 2012-07-19 EMPTY SPACE is a space adventure. We begin with the following dream: An alien research tool the size of a brown dwarf star hangs in the middle of nowhere, as a result of an attempt to place it equidistant from everything else in every possible universe. Somewhere in the fractal labyrinth beneath its surface, a woman lies on an allotropic carbon deck, a white paste of nanomachines oozing from the corner of her mouth. She is neither conscious nor unconscious, dead nor alive. There is something wrong with her cheekbones. At first you think she is changing from one thing into another - perhaps it's a cat, perhaps it's something that only looks like one - then you see that she is actually trying to be both things at once. She is waiting for you, she has been waiting for you for perhaps 10,000 years. She comes from the past, she comes from the future. She is about to speak... EMPTY SPACE is a sequel to LIGHT and NOVA SWING, three strands presented in alternating chapters which will work their way separately back to this image of frozen transformation.

light m john harrison: Science Fiction, New Space Opera, and Neoliberal Globalism

Jerome Winter, 2016-11-15 One of the few points critics and readers can agree upon when discussing the fiction popularly known as New Space Opera - a recent subgenre movement of science fiction - is its canny engagement with contemporary cultural politics in the age of globalisation. This book avers that the complex political allegories of New Space Opera respond to the recent cultural phenomenon known as neoliberalism, which entails the championing of the deregulation and privatisation of social services and programmes in the service of global free-market expansion. Providing close readings of the evolving New Space Opera canon and cultural histories and theoretical contexts of neoliberalism as a regnant ideology of our times, this book conceptualises a means to appreciate this thriving movement of popular literature.
