The Historical Context of the Great Fire of London

Origins and Causes

The Great Fire of London erupted in the early hours of September 2, 1666, within the bakery of Thomas Farriner (or Farynor) on Pudding Lane. The fire quickly spread due to the densely packed timber buildings, narrow streets, and dry weather conditions. Factors such as the wooden construction practices, the lack of adequate firefighting equipment, and the city's design all contributed to the rapid spread of flames. While the fire was accidental, its aftermath prompted significant changes in urban planning and firefighting strategies.

Impact on the City

The fire gutted an estimated 13,200 houses, 87 churches (including St. Paul's Cathedral), and numerous other buildings, leaving thousands homeless.
