peppa around the world: Handbook of CLIL in Pre-primary Education Ana Otto, Beatriz

Cortina-Pérez, 2023-05-16 This book provides an in-depth look on Content and Language Integrated Learning (CLIL) and Early Childhood Education (ECE), two domains where major joint research is needed. By taking stock on theoretical underpinnings, it explores the ideal conditions for early additional language acquisition in preschool contexts through CLIL with a learner-centered approach grounded in developmentally appropriate practices (DEP) and an emphasis on the importance of play, cognition, holistic content adaptation and social-emotional learning. The book also offers a comprehensive view of how this methodological approach has already set a clear path on Pre-primary education internationally. Finally, it offers insights into CLIL pedagogies as related and adapted to Pre-primary education, resources and materials for very young learners and practical implementation from the classroom. By providing a solid empirical background on Pre-primary CLIL, along with appropriate methodological issues and practices, this book serves as a key resource to students, practitioners, academics as well as teacher educators and policy-makers in international contexts.

peppa around the world: Young Children's Rights in a Digital World Donell Holloway, Michele Willson, Karen Murcia, Catherine Archer, Francesca Stocco, 2021-08-19 This volume focuses on very young children's (aged 0-8) rights in a digital world. It gathers current research from around the globe that focuses on young children's rights as agential citizens to the provision of and participation in digital devices and content—as well as their right to protection from harm. The UN Digital Rights Framework of 2014 addresses children's needs, agency and vulnerability to harm in today's digital world and implies roles and responsibilities for a variety of social actors including the state, families, schools, commercial entities, researchers and children themselves. This volume presents a broad range of research, including chapters on parental supervision and control, the changing forms of play, early childhood education, media and cultural studies, law, design, health, special-needs education, and engineering. Implicit within this book is the acknowledgement that children of various ages, abilities, socioeconomic and geographic backgrounds should have equal access to, and positive / non-harmful experiences with, new digital technologies and content—as well as adult support and expertise that enhances these experiences. This passionate book celebrates the diversity of young children's activities in the digital world. It interrogates these through four intersecting lenses: their rights, play experiences, contextualised design, and best practice. Balancing children's eager engagement with digital content alongside adult responsibilities for education, privacy and protection, the volume provides a fitting showcase for work of global relevance. Professor Lelia Green Professor of Communications Edith Cowan University Perth, Western Australia This compelling text provides a critical resource to inform our understanding of the intersection of the digital world and children's rights.
