royal horticultural society magazine: **The European Garden Flora Flowering Plants** James Cullen, Sabina Knees, H. Suzanne Cubey, J. M. H. Shaw, 2011-08-11 The European Garden Flora is the definitive manual for the accurate identification of cultivated ornamental flowering plants. Designed to meet the highest scientific standards, the vocabulary has nevertheless been kept as uncomplicated as possible so that the work is fully accessible to the informed gardener as well as to the professional botanist. This new edition has been thoroughly reorganised and revised, bringing it into line with modern taxonomic knowledge. Although European in name, the Flora covers plants

cultivated in most areas of the United States and Canada as well as in non-tropical parts of Asia and Australasia. Volume 1 contains accounts of all the Monocotyledons, which includes those groups known informally as the 'petaloid monocotyledons' (the Liliaceae and Amaryllidaceae in the first edition, divided here among 17 families), the grasses and sedges (Gramineae and Cyperaceae), the aroids (Araceae) and the large and diverse Orchidaceae.

royal horticultural society magazine: **Garden Practices and Their Science** Geoff Dixon, 2018-12-11 Written in a clear and accessible style, *Garden Practices and Their Science* guides gardeners in the practical arts of plant husbandry and in their understanding of its underpinning principles. The author, Professor Geoff Dixon, is an acknowledged and internationally respected horticulturist and microbiologist; he intertwines these arts and principles carefully, expertly leading readers from one to the other. Achieving the manipulation of plant life is described in eight full-colour, well-illustrated chapters covering the growing of potatoes, bulb onions, legumes, small-seeded vegetables, soft fruit, bulbs and herbaceous ornamentals in great detail. Environmental factors controlling the successful husbandry of these crops is described in simple, non-technical language, increasing gardeners' enjoyment and competence. Gardeners are also informed of the tools and equipment they require and their safe use. Also provided are a series of simple, straightforward tests identifying the aerial and soil environments beneficial for plant growth using readily accessible domestic tools. Discussions of very straightforward techniques for vegetative propagation conclude this book. Each chapter ends with a list of the gardening knowledge that has been gained by readers. The structure of this book fulfils a longstanding need for descriptions of practical skills integrated with the corresponding biological reactions of plants. Emphasis is placed on gardeners' development of healthy soils, which encourage vigorous, active root systems capable of withstanding stresses—an aspect of gardening that rarely receives sufficient attention. Tailored for readers requiring clear and concise directions, this very practical book is an instruction manual directed at early-stage gardening learners. These include people of all ages and requirements such as new garden owners, allotment-holders, apprentices and students of basic levels in the Royal Horticultural Society's or City & Guilds qualifications, career changers, community gardeners and those needing applied biological knowledge for GCSE examinations.

It is designed to meet the highest scientific standards but the vocabulary is kept as uncomplicated as possible so that it is fully accessible to the informed gardener and landscape architect as well as to the professional botanists. Although based upon Europe the series will be an extremely useful reference on plants in cultivation throughout the world. Families, genera and species are described, keys are provided and guidance is given on the cultivation of each genus. Volume I is the first in a series of six; it contains accounts of the ferns and their allies, the conifers and 16 families of monocotyledons, including the Liliaceae, Amaryllidaceae and Iridaceae, to which most of the popular bulbous garden plants belong.

royal horticultural society magazine: RHS A Nation in Bloom Mr. Matthew Biggs, 2019-05-06 'Never has the work of the Royal Horticultural Society been more important or more far reaching.' Foreword by Alan Titchmarsh The RHS is the world's largest gardening charity but what it does and why is little understood and rarely celebrated. From defining new gardening trends at the Chelsea Flower Show, to ranking the best dahlias to grow at the Wisley trial grounds, to inspiring communities with Britain in Bloom, educating children to grow and eat their veg through the Campaign for School Gardening, the RHS works tirelessly to improve the gardener's lot. With the use of evocative archive images and contemporary photos by award-winning Jason Ingram, this beautiful book explores the past, present and future of this most influential organisation by listening to the voices of those working today. From the thousands of volunteers in the society's five unique gardens (Wisley in Surrey, Rosemoor in Devon, Hyde Hall in Essex, Harlow Carr in Yorkshire and new addition Bridgewater in Salford), to the one million visitors to its inspirational flower shows (including Chelsea, Hampton Court, Tatton Park, Cardiff, Wisley and Chatsworth); the society gives meaning to more than 475,000 members, millions of television viewers and visitors from around the world. The RHS is the best of gardening, and this book presents the best of the RHS. Behind the scenes, access all areas, this book will give lasting pleasure to anyone who enjoys their garden.
