Since the Thatcher years, juvenile delinquency, child poverty, and protection have been persistent issues in public discourse. Simultaneously, childhood has advanced as a popular subject in the arts, as the wealth of current films and novels in this field indicates. Focusing on the late twentieth and the early twenty-first centuries, this collection assembles contributions concerned with current political, social, and cultural dimensions of childhood in the United Kingdom. The individual chapters, written by internationally renowned experts from the social sciences and the humanities, address a broad spectrum of contemporary childhood issues, including debates on child protection, school dress codes, the media, the representation and construction of children in audiovisual media, and literary awards for children's fiction. Appealing to a wide scholarly audience by joining perspectives from various disciplines, including art history, education, law, film and TV studies, sociology, and literary studies, this volume endorses a transdisciplinary and meta-theoretical approach to the study of childhood. It seeks to both illustrate and dismantle the various ways in which childhood has been implicitly and explicitly conceived in different disciplines in the wake of the constructivist paradigm shift in childhood studies.

sally gardner maggot moon: *Insignificant but Special* Bruce Sanford, 2023-01-13 Life is a rarity. We know of no other planet where life exists other than on Earth. Life started out in a most simple form, then proceeded along a labyrinth of evolutionary pathways that resulted in extraordinary and unfathomable designs. This is a journey, from the beginning of time to this very day, guided by circumstances, contingencies, and chaos that has governed Earth's living assemblage. But life's presence was not destined to just happen. If it wasn't for our moon, which gave Earth orbital and rotational stability, life would not be as we know it today. If it wasn't for volcanic eruptions, Earth would be an ice-clad, frozen globe. If it wasn't for one of the tiniest of living organisms that produced a toxic gas, complex life would not have arisen. If it wasn't for one particular extinction event, Homo sapiens would not be walking this planet, and you would not be reading this now. If it wasn't for a million other things, life would be much different, or not at all. Earth made life, from the meek to the monstrous, from the banal to the bizarre, from the humblest to the haughtiest. Strap yourself in alongside a window seat and witness the passing of time, to view the episodes of change, and how the making of life became the greatest story on Earth.

sally gardner maggot moon: *Growing Sideways in Twenty-first Century British Culture* Anne Malewski, 2021-12-15 This volume examines changing boundaries between childhood and adulthood in British society and culture at the beginning of the twenty-first century – where these age boundaries are widely debated, policed, and contested – to investigate alternatives to conventional ideas of growing up. Building on observations, especially in children's literature criticism, that human growth is shaped by a grand narrative that privileges adulthood, and on terminologies of non-normative growth, particularly in queer theory, this monograph develops growing sideways as a concept that queers this grand narrative by destabilising childhood and adulthood, and the boundaries between them. The concept is refined through close readings of twenty-first century British children's literature, television series, film, and participatory events, troubling age boundaries via specific strategies in three conceptual areas: appearance, play, and space. Exploring power structures around age and gender, this monograph traces growing sideways as a distinct and important alternative discourse of human growth.
