some like it hot marilyn monroe: *Some Like It Hot* Steven Cohan, 2025-05-01 Billy Wilder's classic screwball comedy *Some Like it Hot* (1959), starring Jack Lemmon, Tony Curtis and Marilyn Monroe, tells the story of two struggling Jazz musicians who accidentally witness a mob massacre in Chicago who then, disguised as women, join a female band to escape the gangsters' pursuit. Despite the film's popular reception, with Academy Award nominations for Wilder and star Jack Lemmon, the film gained notoriety for its crossdressing plot and gender-bending comedy. Steven Cohan's study of the film disentangles its production history and subsequent notoriety from the film itself, reconsidering the ways in which it playfully challenged generic and gender conventions of the 1950s. He provides an in depth analysis of the film's near perfect comedic structure, Wilder's aesthetic choices and self-reflexive star performances by Curtis, Lemmon and Monroe. He goes on to consider the film's queerness, as well as its promotion and reception in 1959. Contextualizing the film within its contemporary moment, he argues its textual richness, one that allows it to be viewed differently across generations, securing its lasting influence in popular culture.

Women continue to be marginalized for their choices, overshadowed by men, and judged by their bodies. In fact, the intelligence of women is rarely the focus of television or film narratives, and on the rare occasion when smart women are showcased, their portrayals are undermined by socially awkward behavior or their intimate relationships are doomed to perpetual failure. While Hollywood claims to offer a different, more evolved look at women, these movies and shows often just repackage old character types that still downplay the intelligence and savvy of women. In *Smart Chicks on Screen: Representing Women's Intellect in Film and Television*, Laura Mattoon D'Amore brings together an impressive array of scholarship that interrogates the portrayal of females on television and in

movies. Among the questions that the volume seeks to answer are: In what ways are women in film and television limited, or ostracized, by their intelligence? How do female roles reinforce standards of beauty, submissiveness, and silence over intellect, problem solving, and leadership? Are there women in film and television who are intelligent without also being objectified? The thirteen essays by international, interdisciplinary scholars offer a wide range of perspectives, examining the connections—and disconnections—between beauty and brains in film and television. *Smart Chicks on Screen* will be of interest to scholars not only of film and television but of women's studies, reception studies, and cultural history, as well.
