when in rome 2002: Roman Error Basil Dufallo, 2018 In the eyes of posterity, ancient Rome is deeply flawed. The list of censures is long and varied, from political corruption and the practice of slavery, to religious intolerance and sexual immorality, yet for centuries the Romans' errors have not only provoked opprobrium, but also inspired wayward and novel forms of thought and representation, themselves errant in the broad sense of the Latin verb. This volume is the first to examine this phenomenon in depth, treating examples from history, philosophy, literature, psychoanalysis, and art history, from antiquity to the present, to examine how the Romans' faults have become the basis for creative experimentation, for rejections of prevailing ideology, even for comedy and delight. In demonstrating that the reception of Rome's missteps and mistakes has been far more complex than simply denouncing them as an *exemplum malum* to be shunned and avoided, it argues compellingly that these alternative receptions are historically important and enduringly relevant in their own right. Roman error comes to signify both ancient misstep and something that we may commit when engaging with Roman antiquity, whereby reception may even be conceived as error of a kind: while the volume ably addresses popular fascination with a wide range of Roman vices, including violence, imperial domination, and decadence, it also asks us to consider what

makes certain receptions matter, how they matter, and why.

when in rome 2002: Malayan Classicism Soon-Tzu Speechley, 2023-11-30 Through a broad range of case studies spanning from imperial monuments to rural residences, Malayan Classicism puts forward a fundamentally new understanding of classical architecture in the Asian colonial context. Across Malaysia and Singapore, thousands of historic buildings are richly ornamented with motifs drawn from Ancient Greece and Rome - as plump volutes, lush acanthus leaves, and neat rows of dentils decorate mosques, palaces, government buildings and innumerable terraced shophouses. These classical details jostle with ideas drawn from other architectural traditions from across Asia in a style that is unique to the region. Presenting the first comprehensive account of what was, prior to World War II, Malaya's most widespread architectural style, Malayan Classicism explores how the classical architecture of the British Empire was transmitted, translated, and transformed in the hands of local builders and architects. Addressing a critical gap in the scholarship, this book charts the metamorphosis of an imperial language of power into a local vernacular style, and provides a new way of reading classical architecture in a post-colonial context that will be applicable throughout the Global South.

when in rome 2002: Natural Law and the Law of Nations in Eighteenth- and Nineteenth-Century Italy , 2023-11-07 The open access publication of this book was financially supported by the Swiss National Science Foundation. This volume sheds new light on modern theories of natural law through the lens of the fragmented political contexts of Italy in the eighteenth and nineteenth centuries, and the dramatic changes of the times. From the age of reforms, through revolution and the 'Risorgimento', the unification movement which ended with the creation of the unified Kingdom of Italy in 1861, we see a move from natural law and the law of nations to international law, whose teaching was introduced in Italian universities of the newly created Kingdom. The essays collected here show that natural law was not only the subject of a highly codified academic teaching, but also provided a broader conceptual and philosophical frame underlying the 'science of man'. Natural law is also a language wherein reform programmes of education and of politics have taken form, affecting a variety of discourses and literary genres. Contributors are: Alberto Clerici, Vittor Ivo Comparato, Giuseppina De Giudici, Frédéric Ieva, Girolamo Imbruglia, Francesca Iurlaro, Serena Luzzi, Elisabetta Fiocchi Malaspina, Emanuele Salerno, Gabriella Silvestrini, Antonio Trampus.

when in rome 2002: Crossing the Pomerium Michael Koortbojian, 2020-01-21 A multifaceted exploration of the interplay between civic and military life in ancient Rome The ancient Romans famously distinguished between civic life in Rome and military matters outside the city—a division marked by the pomerium, an abstract religious and legal boundary that was central to the myth of the city's foundation. In this book, Michael Koortbojian explores, by means of images and texts, how the Romans used social practices and public monuments to assert their capital's distinction from its growing empire, to delimit the proper realms of religion and law from those of war and conquest, and to establish and disseminate so many fundamental Roman institutions across three centuries of imperial rule. Crossing the Pomerium probes such topics as the appearance in the city of Romans in armor, whether in representation or in life, the role of religious rites on the battlefield, and the military image of Constantine on the arch built in his name. Throughout, the book reveals how, in these instances and others, the ancient ideology of crossing the pomerium reflects the efforts of Romans not only to live up to the ideals they had inherited, but also to reconceive their past and to validate contemporary practices during a time when Rome enjoyed growing dominance in the Mediterranean world. A masterly reassessment of the evolution of ancient Rome and its customs, Crossing the Pomerium explores a problem faced by generations of Romans—how to leave and return to hallowed city ground in the course of building an empire.

when in rome 2002: Roman Military Service Sara Elise Phang, 2008-01-14 In this book, Sara Phang explores the ideals and realities of Roman military discipline, which regulated the behaviour of soldiers in combat and their punishment, as well as economic aspects of their service, including compensation and other benefits, work and consumption. This thematically-organized study analyzes these aspects of discipline, using both literary and documentary sources. Phang emphasizes social and cultural conflicts in the Roman army. Contrary to the impression that Roman emperors 'bought' their soldiers and indulged them, discipline restrained such behaviour and legitimized and stabilized the imperial power. Phang argues that emperors and aristocratic commanders gained prestige from imposing discipline, while displaying leadership in person and a willingness to compromise with a restive soldiery.
