aa route europe route planner: The new European motorcycle test Great Britain: Parliament: House of Commons: Transport Committee, 2010-03-23 In April 2009 a new testing regime, based on the Second EU Driving Licence Directive, was introduced. Deadlines for implementation had not been met and when the new test was finally introduced, it was met with intense criticism and safety concerns. The number of tests taken dropped dramatically in the first few months and the industry suggested that the new test regime would threaten many small businesses and jobs. The Committee was concerned to not only establish whether the test had gone wrong and how problems could be rectified but also to ensure lessons are learned before the implementation of the Third EU Driving Licence Directive. They concluded that they could not see why the Government failed to obtain derogation from certain speed requirements and that though many elements of the new regime were appropriate it was important to take into account the concerns expressed and consider what adjustments might be required. They also believe that training and instruction for the motorcycle test needs to develop and change to reflect the new test requirements. The off-road module of the test also needs to be amended to allow candidates to adapt their riding to reflect prevailing weather, road and other circumstances. The development of better awareness of motorcyclists among other road users is also crucial and should not be neglected. Though the Government exceeded what was necessary to comply with the EU directive the Committee believes they were right to do so. It is the development of Multi Purpose Test Sites for which justification was weak and implementation inept which represents the least effective element.

aa route europe route planner: A Man & A Pram Mark Cundy, 2011-06-23 People travel from London to New York every day - nothing unusual about that, but if your journey took you 14 months, you might rightly wish to seek compensation from the airline! However, Mark Cundy's journey was different; his was a walking odyssey of immense proportions, covering 5,500 miles between October 2004 and December 2005 across three continents, in aid of Cancer Research UK and its overseas equivalents. Facing a lonely, often gruelling trek, Mark encountered many setbacks and obstacles en route: limited resources, accommodation problems, language barriers, extremes of climate, red tape, cultural differences and health issues, and met plenty of 'angels' and a few 'devils' as his journey pressed on through Europe, across Russia and on to Australia and finally the USA. There were many times he stopped to wonder, "What am I doing?" But in true Forrest Gump style, he just kept on walking. This is an extraordinary story, told with immense humour, of true grit and determination against the odds to fulfil a dream that had been many years in the making, one that took the 'World Walker' through every gamut of emotion, from fear to triumph and desperation to sheer joy. It was a defining achievement. And to what does the 'pram' in the title refer? He didn't really take a baby with him, did he? Well, you'll just have to read it and see!
