Technologies for Children is a comprehensive guide to teaching design and digital technologies to children from birth to 12 years. Aligned with the Early Years Learning Framework and the Australian Curriculum: Technologies, this book provides practical ideas for teaching infants, toddlers, pre-schoolers and primary-aged children. The third edition includes expanded content on teaching digital technologies, with a new chapter on computational thinking. Key topics covered include food and fibre production, engineering principles and systems, and computational thinking. The content goes beyond discussing the curriculum to consider technology pedagogies, planning, assessment and evaluation. Case studies drawn from Australian primary classrooms and early childhood centres demonstrate the transition from theory to practice. Each chapter is supported by pedagogical reflections, research activities and spotlights, as well as extensive online student resources. Written by Marilyn Fleer, this book presents innovative, engaging and student-centred approaches to integrating technologies in the classroom.

bob the builder magazine: *Design and Technology for Children* Marilyn Fleer, Jane Beverley, 2015-05-20 Design and technology education is now an established field of study in primary schools and in many early childhood centres. Authors Marilyn Fleer and Beverley Jane offer the definitive text on this curriculum area. Design and Technology for Children 3e is a comprehensive and innovative account of teaching and research in design and technology education. It gives pre-service and in-service teachers opportunities to reflect upon and further develop their understanding of technology and technological knowledge, and to consider several different approaches in a practical and interactive way. The third edition has been written to reflect current research and practice in design and technology education for Australian children and pre-service teachers.

Essays from emerging and established scholars explore the cultural function of magazine media in light of significant changes in content delivery, format, and audience. This volume integrates academic examination with pragmatic discussion to explore contemporary organizational practices, content, and cultural impact. Offering original research and fresh insights, thirty-six chapters provide a truly global perspective on the conceptual and historical foundations of magazines, their organizational cultures and narrative strategies, and their influences on society, identities, and lifestyle. The text addresses topics such as

the role of advocacy in shaping and changing magazine identities, magazines and advertising in the digital age, gender and sexuality in magazines, and global magazine markets. Useful to scholars and educators alike, this book: Discusses media theory, academic research, and real-world organizational dynamics Presents essays from both emerging and established scholars in disciplines such as art, geography, and women's studies Features in-depth case studies of magazines in international, national, and regional contexts Explores issues surrounding race, ethnicity, activism, and resistance Whether used as a reference, a supplementary text, or as a catalyst to spark new research, *The Handbook of Magazine Studies* is a valuable resource for students, educators, and scholars in fields of mass media, communication, and journalism.

The Ventures only endorsed Mosrite guitars for about five years. But the legendary instrumental band's use of the upstart guitar line in the mid-1960s was and is, for many musicians, the first band-brand affiliation they remember. That saga is part of the iconic guitar boom during that decade, which changed the American music scene forever. California's guitar-centric surf music genre was going strong in the early part of that decade . . . but there ain't no surf in Bakersfield, where numerous instrument builders and innovators were toiling in the gritty

and dusty clime of Kern County. Bakersfield Guitars: The Illustrated History contains the compelling chronologies of numerous intriguing, born-in-Bakersfield guitar brands, including Mosrite, Hallmark, Gruggett, Standel (three different manufacturers), Encor, Epcor, Dobro (by Mosrite), GM Custom, Melobar, Osborne, and Acoustic. Among the noted musicians whose recollections are documented here are Marshall Crenshaw, Tommy Shaw, Jorma Kaukonen, Jeff Carlisi, Fred Newell, Ed King, Chuck Seaton, Eugene Moles, Jim Shaw, Tim Bogert, Davie Allan, Jackson Smith, and others.
