**desk top calendar 2024: To Die For** Kathy Braidhill, 2014-11-18

Impeccably dressed, meticulously neat, Dana Sue Gray spared no expense on herself. Dropping thousands of dollars on a shopping binge or a luxurious day spa was nothing out of the ordinary for Dana--nor for many wealthy women. But Dana wasn't wealthy--she was an unemployed nurse. She was also a serial murderess, who preyed upon elderly women, violently killed them, then used their credit cards to embark on wild, post-murder spending sprees. Women serial killers are rare--there are only 36 documented cases--and those, like Dana Sue Gray, who murder so brutally that veteran police officers are shaken by the bloodiness of the crime scene, are even rarer. In *To Die For*, an exposé as shocking and fascinating as its subject matter, author Kathy Braidhill explores the stunning story of Dana Sue Gray, one of the most dangerous, deadly, and disturbed women in history.

**desk top calendar 2024: Escape Emeralda 2** Bill H. Ritchie, 2024-03-27 Disclosure: This description was prompted and edited by Bill Ritchie, in Microsoft's current Copilot, an AI text generator for the second volume of Bill H. Ritchie's two-part autobiography. We traverse the years from 1991 to 2023. Ritchie, a trailblazer in the art world continues his life story. In the first book he told how he embarked on a remarkable odyssey that defied convention and reshaped the art, craft, and design of fine art printmaking. At the tender age of 24, Ritchie secured a groundbreaking position—the youngest ever—in the vibrant city of Seattle. His appointment as a teaching artist in fine art printmaking at the University of Washington marked the beginning of a transformative chapter. But this was no ordinary academic journey; Ritchie's innovative spirit would soon set him apart, a maverick in academe. The traditional classroom was too confining for Ritchie. Driven by a hunger for exploration, he wove technology into his art courses in the 1980s. Bill Ritchie's experiments disrupted the staid printmaking department and shocked the UW School of Art. Forced to leave the stifling ivory towers, by the 1990s the emergence of electronic arts opened with the Internet and would extend the boundaries of printmaking. Ritchie's vision blurred the lines between historic creativity and cutting-edge technology, birthing a new era dating back to the Paleolithic era when printmaking was invented. Ritchie pushed the envelope. Printmaking was no longer confined to ink and paper; it now danced with video, performance, computer graphics, and games. His colleagues, patrons, and former students watched in awe, wondering at the audacity of his moves. Telling all, Ritchie weaves rich, detailed tales. In his printed books he placed thousands of pictures to enliven the narrative, capturing moments shared with those who left their marks on his journey. QR codes link videos and backstories, bridging epochs—from prehistoric cave paintings to the digital age. The echoes of ancient handprints resonate, showing that explication transcends time if replicated creatively. In a world illuminated and echoed by electronic media, Ritchie poses a poignant question: Is there hope? As climate change and global stressors threaten the future, his words resonate. Whether through brushstrokes or those fleeting, elusive pixels and here in eBook form and auxiliary Read Aloud option, Ritchie's legacy endures—a beacon for students of all ages, urging them to embrace creativity, defy boundaries, and find hope in the interplay of art, technology, and the human imagination.
