in ascension martin macinnes: *Southern Imagining* Elleke Boehmer, 2025-12-30 A new compass for global reading: looking at the world from the far southern latitudes A northern viewpoint is most often the default, while the south—the far southern latitudes occupied by Australia, New Zealand, Argentina and southern Africa, among others—seems far away and ignorable. In *Southern Imagining*, Elleke Boehmer offers an alternative perspective, using literary, scientific and cultural material to explore how we look at the world from the south. Reading, she argues, is a transformative means of reversing our usual planetary orientation and rearranging our perceptual geography. Boehmer examines writing from across southern continents and islands, considering how we imaginatively inhabit the farthest reaches of our planet. Creators ranging from the Portuguese epic poet Luís de Camões to Samuel Taylor Coleridge, Charles Darwin, Katherine Mansfield, Jorge Luis Borges and ancient Indigenous storytellers capture the edgy and austere experiences of the far south. For Boehmer, imaginative work stimulates and shapes our phenomenological understanding. Southerners often see themselves as far away from where things count, as outsiders, internalising the wider global sense of their relative insignificance. Conversely, when northerners read or hear legends, narratives, songs and poems from the south, it is as if they are located in the south, at least for the duration of the reading or listening. Boehmer suggests that the south-tilted world map, re-centred through song and story, invites us to claim a more involved sense of belonging to our planet, both its north and its south. The writers of the south disrupt conventional ways of seeing and invite us to inhabit our globe differently.

And is a murderer necessarily bad? These two questions waltz through the maddening mind of Michael, the brilliant, terrifying, fiendishly smart creation at the centre of this winking dark gem of a literary thriller. Michael lost his wife in a terrorist attack on a London train. Since then, he has been seeing a therapist to help him come to terms with his grief - and his anger. He can't get over the fact that the man he holds responsible has seemingly got away scot-free. He doesn't blame the bombers, who he

considers only as the logical conclusion to a long chain of events. No, to Michael's mind, the ultimate cause is the politician whose cynical policies have had such deadly impact abroad. His therapist suggests that he write his feelings down to help him forgive and move on, but as a retired headteacher, Michael believes that for every crime there should be a fitting punishment - and so in the pages of his diary he begins to set out the case for, and set about committing, murder. Waltzing through the darkling journal of a brilliant mind put to serious misuse, Kill [redacted] is a powerful and provocative exploration of the contours of grief and the limits of moral justice, and a blazing condemnation of all those who hold, and abuse, power. Compounding these crises are lost trust in public health and policy, healthcare workforce strain, and disparities in healthcare outcomes disproportionately impacting marginalized communities. In this book we conducted in-depth interviews with luminaries whose careers span multiple aspects of infectious diseases and public health, which will inform and inspire leaders navigating daily healthcare challenges within their own environment. Conversations highlight shared challenges presented by multiple public health emergencies and reiterate themes of effective public communication during crises, successful conflict negotiation, and making difficult decisions for the greater good. Through carefully selected and curated interviews, readers will explore an in-depth view of the effective leadership skills required to navigate the challenging outlook of modern healthcare. These conversations with experts also explore emerging and future crises impacting our healthcare system, including the crises of misinformation and climate change; no such collection of carefully curated interviews with celebrated leaders in infectious diseases, emerging infections and public health currently exists.

in ascension martin macinnes: *Sexuality and Gender in Fictions of Espionage* Ann Rea, 2023-12-28 An exploration of how espionage narratives give access to cultural conceptions of gender and sexuality before and following the Second World War, this book moves away from masculinist assumptions of the genre to offer an integrative survey of the sexualities on display from important characters across spy fiction. Topics covered include how authors mocked the traditional spy genre; James Bond as a symbol of pervasive British Superiority still anxious about masculinity; how older female spies act as queer figures that disturb the masculine mythology of the secret agent; and how the clandestine lives of agents described ways to encode queer communities under threat from fascism. Covering texts such as the Bond novels, John Le Carré's oeuvre (and their notable adaptations) and works by Helen MacInnes, Christopher Isherwood and Mick Herron, *Sexuality and Gender in Fictions of Espionage* takes stock of spy fiction written by women, female protagonists written by men, and probes the representations of masculinity generated by male authors. Offering a counterpoint to a genre traditionally viewed as male-centric, *Sexuality and Gender in Fictions of Espionage* proposes a revision of masculinity, femininity, queer identities and gendered concepts such as domesticity, and relates them to notions of nationality and the defence work conducted at crucial moments in history.

in ascension martin macinnes: *Catholic Sexual Theology and Adolescent Girls* Doris M. Kieser, 2015-06-08 This book explores the intersection in contemporary Western culture of Catholic sexual theology and adolescent female developmental and sexual experiences. The voices of adolescent females, so long silent in sexual theologies, are given privilege here in the articulation of a normative theology. Applying a feminist natural law framework, the book engages both theoretical scholarship and practical evidence from psychological and other social sciences to inform sexual

theology in the Catholic tradition. Attending to gendered, developmental, and social contexts, Doris Kieser explores adolescent females' experiences of puberty, menarche, various sexual activities, communities of support, sexual desire, and the pleasure and danger these realities reap. She critically explores historical and traditional sexual theologies and prevailing social patriarchal and androcentric sexual attitudes through a feminist lens. The author's attention to the voices of girls and women, and her aim to see their sexual flourishing in particular and diverse social contexts, yields a theology mindful of the rich complexities of female sexual desire, pleasure, and well-being. The result is an integrated sexual theology that grapples with the Catholic theological tradition, feminist theory and theology, and the embodied experiences of females. For anyone who is invested in the lives and well-being of adolescent females, this work uncovers both barriers and boons to their sexual flourishing.

in ascension martin macinnes: Tomorrows Versus Yesterdays Andrew Keen, 2020-03-05 The current crisis of democracy, the growing economic inequality between rich and poor, our narcissistic social media culture and the looming menace of AI all threaten us as never before. The challenges presented by technology have long been central in these issues, but how can we take advantage of the opportunities it provides to shape a better twenty-first century? The most important division of our age is between the 'tomorrows', those who believe that the future can be better than the past, and the 'yesterdays' who harbor a nostalgic desire to return to a rose-tinted past. This division is encapsulated by how we answer a simple question: can we trust the future? In *Tomorrows Versus Yesterdays*, Andrew Keen discusses the issue with some of the most influential thinkers of our time. The book is split into four sections. The first identifies the challenges of our digital age. The second focuses on the failure of the internet revolution to realize its ambitious goals. The third untangles the complex relationship between populism and digital media, before the final part presents possible solutions to the challenges of our age. The result is an insightful examination of the most important issues facing us today, and essential reading for anyone interested in the impact of the digital revolution.
