lawrence of arabia memorial: The RAF and Tribal Control Richard D. Newton, 2019-11-01 In light of technological advances and multiplying irregular conflicts, conventional wisdom suggests airpower as the ideal, low-cost means of conducting modern warfare—and the air control method adopted by the British between the two world wars seems to back this up. Swift and precise targeting from above was considered more humane, after all, sparing civilians as well as British soldiers during punitive expeditions in unruly colonial regions. But what conventional wisdom misses, and this book makes clear, is how the Royal Air Force's (RAF) innovative approach actually worked—relying on British airmen on the ground at least as much as on airborne technology to control restive tribes and villages. The RAF and Tribal Control tells the story of these forgotten airmen, the RAF special service officers who, embedded among local populations and indigenous tribes, collected vital intelligence, developed targets, directed air strikes when necessary, and, perhaps most important, provided personal assessments of airpower's qualitative effects against primarily guerrilla forces. Airpower is a highly technological endeavor. But in wars where the human dimension takes primacy, Richard Newton reminds us that measuring the effectiveness of air actions requires a qualitative approach that is nearly impossible via overhead sensors. And this is where the RAF special service officers came in—airmen who understood the local cultures and peoples, they served as conduits for information and communication between the colonial administration and the tribes and villages. It was their ground-level contributions that made the integration of airpower into the civilian administration of colonies and mandates possible. This first in-depth account of the RAF special service officers' role brings to light previously unpublished insights. The RAF and Tribal Control fills a significant gap in the history of air warfare. In doing so, the book dispels the notion that airpower alone is effective in small wars and irregular conflicts—and reveals the importance of the "boots-on-the-ground" human component in waging unconventional air warfare, both in the days of the RAF's vaunted air control and in our own time.

lawrence of arabia memorial: Beyond the Epic Gene Phillips, 2006-11-24 Two-time Academy Award winner Sir David Lean (1908-1991) was one of the most prominent directors of the twentieth century, responsible for the classics *The Bridge on the River Kwai* (1957), *Lawrence of Arabia* (1962), and *Doctor Zhivago* (1965). British-born Lean asserted himself in Hollywood as a major filmmaker with his epic storytelling and panoramic visions of history, but he started out as a talented film editor and director in Great Britain. As a result, he brought an art-house mentality to blockbuster films. Combining elements of biography and film criticism, *Beyond the Epic: The Life and Films of David Lean* uses screenplays and production histories to assess Lean's body of work.

Author Gene D. Phillips interviews actors who worked with Lean and directors who knew him, and their comments reveal new details about the director's life and career. Phillips also explores Lean's lesser-studied films, such as *The Passionate Friends* (1949), *Hobson's Choice* (1954), and *Summertime* (1955). The result is an in-depth examination of the director in cultural, historical, and cinematic contexts. Lean's approach to filmmaking was far different than that of many of his contemporaries. He chose his films carefully and, as a result, directed only sixteen films in a period of more than forty years. Those films, however, have become some of the landmarks of motion-picture history. Lean is best known for his epics, but Phillips also focuses on Lean's successful adaptations of famous works of literature, including retellings of plays such as *Brief Encounter* (1945) and novels such as *Great Expectations* (1946), *Oliver Twist* (1948), and *A Passage to India* (1984). From expansive studies of war and strife to some of literature's greatest high comedies and domestic dramas, Lean imbued all of his films with his unique creative vision. Few directors can match Lean's ability to combine narrative sweep and psychological detail, and Phillips goes beyond Lean's epics to reveal this unifying characteristic in the director's body of work. Beyond the Epic is a vital assessment of a great director's artistic process and his place in the film industry.

lawrence of arabia memorial: The Welsh at War: Through Mud to Victory Steven John, 2018-05-30 Welsh at War From Mons to Loos and the Gallipoli Tragedy is the culmination of twelve years of painstaking research by the author into the the Welsh men and infantry units who fought in the Great War. These units included the four regular regiments the Royal Welsh Fusiliers, South Wales Borderers Welsh Regiment and Welsh Guards as well as the Territorial Monmouthshire Regiment, the Yeomanry regiments, the Denbighshire Hussars, Pembroke Yeomanry, Montgomeryshire Yeomanry, Glamorgan Yeomanry and Welsh Horse Yeomanry and their amalgamation into service battalions for the regular regiments during 1917. Welsh troops fought with great courage in every theater of the war the Western Front, Aden, China, Gallipoli, Egypt, India, Italy, Salonika and in Palestine and as well as the casualties who were suffered during these campaigns, many men gained recognition for acts of gallantry. The book covers all of the major actions and incidents in which each of the Welsh infantry regiments took part from the opening of the war in 1914 until the end of 1915, as well as stories of Welsh airmen, Welshmen shot at dawn, Welsh rugby players who fell, Welsh gallantry winners and the Welshmen who died in non-Welsh units, such as the Dominion forces and other units of the British Armed Forces. While chronicling a history of the war through the events and battles that Welshmen took part in, the stories of individual casualties are included throughout, together with many compelling photographs of the men and their last resting places.

lawrence of arabia memorial: Queer in Translation B.J. Epstein, Robert Gillett, 2017-01-06 As the field of translation studies has developed, translators and translation scholars have become more aware of the unacknowledged ideologies inherent both in texts themselves and in the mechanisms that affect their circulation. This book both analyses the translation of queerness and applies queer thought to issues of translation. It sheds light on the manner in which heteronormative societies influence the selection, reading and translation of texts and pays attention to the means by which such heterosexism might be subverted. It considers the ways in which queerness can be repressed, ignored or made invisible in translation, and shows how translations might expose or underline the queerness - or the homophobic implications - of a given text. Balancing the theoretical with the practical, this book investigates what is culturally at stake when particular texts are translated from one culture to another, raising the question of the relationship between translation, colonialism and globalization. It also takes the insights derived from intercultural translation studies and applies them to other fields of cultural criticism. The first multi-focus, in-depth study on translating queer, translating queerly and queering translation, this book will be of interest to

scholars working in the fields of gender and sexuality, queer theory and queer studies, literature, film studies and translation studies.

Yet the history of the war and the reasons it started and spread so rapidly were vastly more complex than the players realized. Written by highly respected authorities, this book discusses the literature on all aspects of the war, making it an excellent starting point for anyone seeking guidance to the immense, and often daunting, body of World War I literature. The struggle mobilized manpower from home, troops from the colonies abroad, and—in most countries—women as well as men. Governments increasingly intervened in everyday life. New weapons and organizational structures were developed. Yet the history of the war and the reasons it started and spread so rapidly were vastly more complex than the players realized. Written by highly respected authorities, this book discusses the literature on all aspects of the war. Dennis Showalter's opening chapter covers the controversial issue of the war's origins—a complex subject that has been much debated by historians. Ensuing chapters consider the literature on each of the participating countries. The broader subjects of the war at sea and the war in the air are also covered. Daniel Beaver's final chapter discusses the mobilization of industry and the new military technology. This book is an excellent starting point for anyone seeking guidance to the immense, and often daunting, body of World War I literature.

lawrence of arabia memorial: Screenwriting Paul Joseph Gulino, 2013-10-21 The great challenge in writing a feature-length screenplay is sustaining audience involvement from page one through 120. Screenwriting: The Sequence Approach expounds on an often-overlooked tool that can be key in solving this problem. A screenplay can be understood as being built of sequences of about fifteen pages each, and by focusing on solving the dramatic aspects of each of these sequences in detail, a writer can more easily conquer the challenges posed by the script as a whole. The sequence approach has its foundation in early Hollywood cinema (until the 1950s, most screenplays were formatted with sequences explicitly identified), and has been rediscovered and used effectively at such film schools as the University of Southern California, Columbia University and Chapman University. This book exposes a wide audience to the approach for the first time, introducing the concept then providing a sequence analysis of eleven significant feature films made between 1940 and 2000: *The Shop Around The Corner* / *Double Indemnity* / *Nights of Cabiria* / *North By Northwest* / *Lawrence of Arabia* / *The Graduate* / *One Flew Over the Cuckoo's Nest* / *Toy Story* / *Air Force One* / *Being John Malkovich* / *The Fellowship of the Ring*

The Gobi is a perennially fascinating part of the world - a desert that people love to read about. China, the environment/natural world, exploration and discovery: broad and topical appeal. The Gobi is the largest, coldest and driest desert in Asia. Its shifting sands conceal ancient cities, 3,000-year-old mummies, dinosaur bones and areas where no man has set foot. It is also the last place on earth where the wild Bactrian camel clings to survival, its fragile habitat threatened by poachers and development. With the conservation of this elusive creature in mind, John Hare was inspired to venture into the wildest parts of the Chinese Gobi on an expedition during which they crossed a hundred miles of sand dunes, unexplored in recorded history. Several weeks into the journey, Hare and the team discovered, in two unmapped valleys, a population of wildlife with no experience of man. Interwoven with the account of his remarkable journey, Hare tells, for the first time, the story

of an epic migration made by Kazakh nomads in flight from Chinese communists and describes the historic and current tensions between the Chinese and the indigenous Uighur population of Xinjiang. A blend of history and high adventure, discovery and conservation, *Mysteries of the Gobi* is a unique and compelling account of modern-day exploration.

lawrence of arabia memorial: *British Imperialism and 'The Tribal Question'* Robert S. G. Fletcher, 2015-02-05 *British Imperialism and 'The Tribal Question'* reconstructs the history of Britain's presence in the deserts of the interwar Middle East, making the case for its significance to scholars of imperialism and of the region's past. It tells the story of what happened when the British Empire and Bedouin communities met on the desert frontiers between the Mediterranean Sea and the Persian Gulf. It traces the workings of the resulting practices of 'desert administration' from their origins in the wake of one World War to their eclipse after the next, as British officials, Bedouin shaykhs, and nationalist politicians jostled to influence desert affairs. Drawn to the commanding heights of political society in the region's towns and cities, historians have tended to afford frontier 'margins' merely marginal treatment. Instead, this volume combines the study of imperialism, nomads, and the desert itself to reveal the centrality of 'desert administration' to the working of Britain's empire, repositioning neglected frontier areas as nerve centres of imperial activity. *British Imperialism and 'The Tribal Question'* leads the shift in historians' attentions from the familiar, urban seats of power to the desert 'hinterlands' that have long been obscured.
