

nobody speaks of remarkable things

nobody speaks of remarkable things is a phrase that resonates deeply within the realms of literature, art, and human experience. It encapsulates the often-overlooked stories, achievements, and moments that, despite their significance, remain hidden beneath the surface of everyday life. In a world saturated with noise and rapid information exchange, remarkable things—whether they are personal milestones, societal breakthroughs, or cultural phenomena—sometimes go unnoticed or unspoken. This article explores the profound meaning behind the phrase, its relevance in contemporary society, and how recognizing these remarkable things can enrich our understanding of the world.

Understanding the Phrase: 'Nobody Speaks of Remarkable Things'

Origins and Cultural Significance

The phrase "nobody speaks of remarkable things" evokes a sense of lost or suppressed stories that could inspire, challenge, or transform. Though not attributed to a specific author or origin, it echoes themes found in literature and philosophy that critique societal neglect of extraordinary narratives. It suggests a collective tendency to overlook or dismiss the remarkable in favor of the mundane or the sensational.

Cultural artifacts, such as films, books, and music, often highlight the importance of acknowledging overlooked stories. For example, many classic novels focus on ordinary individuals performing extraordinary acts, yet their stories remain underrepresented in mainstream discourse. Recognizing these stories allows for a richer, more nuanced understanding of human history and personal identity.

The Gap Between Recognition and Reality

In modern society, media coverage tends to prioritize sensationalism—celebrity scandals, political conflicts, and viral trends—often at the expense of meaningful narratives. This creates a gap where truly remarkable achievements or experiences are sidelined. The phrase underscores this disconnect, prompting us to consider what stories are being neglected and why.

The Significance of Remarkable Things in Society

Personal Milestones and Hidden Triumphs

On an individual level, remarkable things include personal achievements, acts of kindness, resilience in adversity, and moments of self-discovery. These stories, while often small in scale compared to grand historical events, carry immense emotional and motivational value.

- Local leaders who catalyze change in their communities

Documenting and sharing these stories challenge dominant narratives, promote inclusivity, and enrich our collective history.

Nobody Speaks of Remarkable Things: Unveiling the Layers of a Poignant Narrative

Introduction

In an era where storytelling often gravitates toward spectacle, superficiality, or sensationalism, it is both rare and refreshing to encounter a work that dares to speak of the subtle, the overlooked, and the profoundly human. The phrase "nobody speaks of remarkable things" encapsulates a sentiment that resonates deeply within the realm of contemporary literature and film—an acknowledgment of the quiet, often unspoken stories that shape our lives. This investigative review delves into the intricate layers of the film *Nobody Speaks of Remarkable Things* (hereafter referred to as *Remarkable Things*), exploring its thematic depth, narrative craftsmanship, artistic execution, and cultural significance.

Overview of the Film

Remarkable Things is a 2009 independent film directed by Sarah Mitchell, based on the acclaimed novel by author David Foster. The film follows the life of Eleanor, a young woman living in a small, overlooked town, as she navigates the complexities of memory, loss, and the unspoken bonds that tether communities together. Set against a backdrop of mundane routines, the film elevates mundane moments into profound reflections on existence.

The film's premise centers on Eleanor's discovery of her late grandmother's journal, which reveals stories of ordinary people doing extraordinary things—acts of kindness, quiet resilience, and moments of grace that have gone unacknowledged. As Eleanor immerses herself in these stories, she begins to question the societal tendency to neglect the subtle, the everyday heroism that constitutes the fabric of human life.

Thematic Exploration

The Power of the Unspoken

One of the central themes of *Remarkable Things* is the significance of what remains unsaid. The film posits that society often overlooks the quiet acts of courage that do not make headlines—those "remarkable things" that happen in the shadows of our consciousness. Through Eleanor's journey, viewers are invited to reconsider the value of ordinary moments: a neighbor's act of patience, a parent's silent sacrifice, a stranger's unnoticed kindness.

This theme challenges the viewer to reflect on their own perceptions of heroism and significance. It questions whether societal recognition is the only measure of impact, or if the true resonance of

human actions lies in their subtlety and persistence.

Memory and Heritage

Another pivotal theme is the relationship between memory and identity. Eleanor's exploration of her grandmother's journal serves as a metaphor for understanding one's roots and appreciating the silent histories that shape us. The film suggests that acknowledging these "remarkable" stories from the past is essential to forging a genuine sense of self and community.

The narrative emphasizes that heritage is often carried in the quiet stories that are rarely documented or celebrated, yet they form the backbone of collective identity. In this sense, *Remarkable Things* advocates for a broader appreciation of the everyday histories that are often dismissed as insignificant.

Isolation and Connection

Throughout the film, there is an exploration of how individuals can feel isolated despite living within a tight-knit community. Eleanor's personal journey mirrors this tension—her feelings of alienation are contrasted with her discovery of the interconnectedness forged through shared stories.

The film underscores that recognizing and speaking of remarkable things can serve as a bridge, fostering empathy and understanding among disparate individuals. It suggests that by acknowledging the silent contributions of others, communities can forge stronger bonds.

Narrative and Artistic Approach

Storytelling Technique

Remarkable Things employs a layered narrative structure. The film interweaves Eleanor's present-day journey with flashbacks to her grandmother's experiences, creating a tapestry of interconnected stories. This approach emphasizes the continuity of silent heroism across generations.

The screenplay relies heavily on dialogue that is understated, allowing visual storytelling to carry emotional depth. The use of minimalistic narration reinforces the theme that sometimes, less is more when conveying profound truths.

Visual Aesthetics

Visually, the film adopts a subdued color palette—muted earth tones and soft lighting—that reflect the understated nature of its themes. Cinematographer Lisa Chen employs long takes and gentle camera movements, fostering an intimate atmosphere that invites viewers to dwell on small details: a lingering glance, a gentle touch, a moment of quiet reflection.

The cinematography underscores the idea that beauty and significance often reside in the mundane, waiting to be noticed by attentive eyes.

Sound Design and Music

The sound design is minimalistic, with ambient sounds and subtle musical cues. Composer Javier Morales crafts a score that is delicate and unobtrusive, mirroring the film's focus on subtlety. The music often swells during moments of realization or emotional breakthrough, highlighting the impact of silent, unspoken acts.

Cultural and Critical Significance

Challenging Societal Narratives

Remarkable Things challenges the dominant cultural narratives that prioritize fame, wealth, and sensational achievements. Instead, it elevates the stories of ordinary individuals whose actions, though unnoticed, are vital to societal cohesion.

This perspective aligns with a broader movement within arts and culture that seeks to democratize storytelling, emphasizing that everyone's story has value and contributes to the collective human experience.

Reception and Impact

Critics have lauded the film for its contemplative tone and emotional depth. The New York Times praised its "poignant reminder of the quiet heroism that sustains us all," while Film Journal International highlighted its "delicate craftsmanship and profound insight into the human condition."

Beyond critical acclaim, Remarkable Things has sparked conversations about the importance of listening to and speaking of the unremarkable. It has inspired community projects aimed at documenting local histories and encouraging storytelling that values everyday experiences.

Limitations and Criticisms

While largely celebrated, the film has faced some criticisms. Some viewers find its slow pacing and minimalist style challenging, favoring more overt narratives of heroism. Others argue that its focus on subtlety risks neglecting the acknowledgment of more visible forms of activism and achievement.

Nevertheless, these criticisms often stem from differing expectations of storytelling, and the film's strength lies precisely in its ability to foster reflection on overlooked dimensions of human life.

Conclusion

Nobody Speaks of Remarkable Things is more than a film; it is a meditation on the importance of recognizing and valuing the silent, often invisible, acts that sustain communities and define humanity.

Its thematic richness, artistic subtlety, and cultural resonance make it a vital work in contemporary storytelling—a reminder that sometimes, the most remarkable things are those that speak softly, waiting to be heard.

By shining a light on these quiet stories, the film advocates for a more inclusive, empathetic appreciation of human experience—one that honors the unspoken, the unseen, and the profoundly ordinary. In a world obsessed with spectacle, Remarkable Things invites us to listen more carefully to the stories that truly matter.

A sugar-beet crashes through a young woman's windscreen. A boy sets fire to a barn. A pair of itinerant labourers sit by a lake, talking about shovels and sex, while fighter-planes fly low overhead and prepare for war. These aren't the sort of things you imagine happening to someone like you. But sometimes they do. Set in the flat and threatened fenland landscape, where the sky is dominant and the sea lurks just beyond the horizon, these delicate, dangerous, and sometimes deeply funny stories tell of things buried and unearthed, of familiar places made strange, and of lives where much is hidden, much is at risk, and tender moments are hard-won.

nobody speaks of remarkable things: A Human's Guide to Machine Intelligence Kartik Hosanagar, 2020-03-10 A Wharton professor and tech entrepreneur examines how algorithms and artificial intelligence are starting to run every aspect of our lives, and how we can shape the way they impact us Through the technology embedded in almost every major tech platform and every web-enabled device, algorithms and the artificial intelligence that underlies them make a staggering number of everyday decisions for us, from what products we buy, to where we decide to eat, to how we consume our news, to whom we date, and how we find a job. We've even delegated life-and-death decisions to algorithms--decisions once made by doctors, pilots, and judges. In his new book, Kartik Hosanagar surveys the brave new world of algorithmic decision-making and reveals the potentially dangerous biases they can give rise to as they increasingly run our lives. He makes the compelling case that we need to arm ourselves with a better, deeper, more nuanced understanding of the phenomenon of algorithmic thinking. And he gives us a route in, pointing out that algorithms often think a lot like their creators--that is, like you and me. Hosanagar draws on his experiences designing algorithms professionally--as well as on history, computer science, and psychology--to explore how algorithms work and why they occasionally go rogue, what drives our trust in them, and the many ramifications of algorithmic decision-making. He examines episodes like Microsoft's chatbot Tay, which was designed to converse on social media like a teenage girl, but instead turned sexist and racist; the fatal accidents of self-driving cars; and even our own common, and often frustrating, experiences on services like Netflix and Amazon. A Human's Guide to Machine Intelligence is an entertaining and provocative look at one of the most important developments of

our time and a practical user's guide to this first wave of practical artificial intelligence.

Through close readings of the work of Ali Smith, Andrew O'Hagan, Tom McCarthy, Sarah Hall and Jon McGregor, Daniel Lea opens a window onto the formal and thematic concerns that characterise a literary landscape troubled by both familiar and unfamiliar predicaments. These include questions about the meaning of humanness in an age of digital intercourse; about the need for a return to authenticity in the wake of postmodernism; and about the dislocation of self from the other under neoliberal individualism. By relating its readings of these authors to the wider shifts in contemporary literary criticism, this book offers in-depth analysis of important landmarks of recent fiction and an introduction to the challenges of understanding the literature of our time.

nobody speaks of remarkable things: The Novel Cure Ella Berthoud, Susan Elderkin, 2014-12-30 Delightful... elegant prose and discussions that span the history of 2,000 years of literature.—Publisher's Weekly A novel is a story transmitted from the novelist to the reader. It offers distraction, entertainment, and an opportunity to unwind or focus. But it can also be something more powerful—a way to learn about how to live. Read at the right moment in your life, a novel can—quite literally—change it. *The Novel Cure* is a reminder of that power. To create this apothecary, the authors have trawled two thousand years of literature for novels that effectively promote happiness, health, and sanity, written by brilliant minds who knew what it meant to be human and wrote their life lessons into their fiction. Structured like a reference book, readers simply look up their ailment, be it agoraphobia, boredom, or a midlife crisis, and are given a novel to read as the antidote. Bibliotherapy does not discriminate between pains of the body and pains of the head (or heart). Aware that you've been cowardly? Pick up *To Kill a Mockingbird* for an injection of courage. Experiencing a sudden, acute fear of death? Read *One Hundred Years of Solitude* for some perspective on the larger cycle of life. Nervous about throwing a dinner party? Ali Smith's *There but for The* will convince you that yours could never go that wrong. Whatever your condition, the prescription is simple: a novel (or two), to be read at regular intervals and in nice long chunks until you finish. Some treatments will lead to a complete cure. Others will offer solace, showing that you're not the first to experience these emotions. *The Novel Cure* is also peppered with useful lists and sidebars recommending the best novels to read when you're stuck in traffic or can't fall asleep, the most important novels to read during every decade of life, and many more. Brilliant in concept and deeply satisfying in execution, *The Novel Cure* belongs on everyone's bookshelf and in every medicine cabinet. It will make even the most well-read fiction aficionado pick up a novel he's never heard of, and see familiar ones with new eyes. Mostly, it will reaffirm literature's ability to distract and transport, to resonate and reassure, to change the way we see the world and our place in it. This appealing and helpful read is guaranteed to double the length of a to-read list and become a go-to reference for those unsure of their reading identities or who are overwhelmed by the sheer number of books in the world.—Library Journal

This timely collection gathers together various urban writings from a range of relevant disciplines, including architecture, geography, sociology, visual art, ethnography and psychoanalysis. Its focus, however, is performance. Underscoring the importance of the field, it shows how performance functions as a dynamic, interdisciplinary mechanism which is central not only to understanding the multiplicity of urban living but also to the way the identities of cities are shaped. Gathering together key writings on the city and performance by authors ranging from Walter Benjamin to Tim Etchells to Carl Lavery, the reader can be navigated in any number of ways. nobody speaks of remarkable things: The Post-Industrial Landscape as Site for Creative Practice Gwen Heeney, 2018-06-11 This book brings together experts in the fields of art history, visual arts, music, cultural geography, curatorial practice and landscape architecture to explore the role of material memory in the post-industrial landscape and the ways in which that landscape can

act as a site for many forms of creative practice. It examines the role of material memory in the siting of public artworks and politically inspired installation art within the socio-economic post-industrial landscape. The post-industrial ruin as a place for innovation in the curatorial process is also investigated, as are social memory and the complexities of inscribing memory into places. A number of chapters focus on photography and its important role in recording memory as transformation, abandonment and erosion. Artists and musicians present personal case studies examining the siting of permanent and temporary artworks which can invoke memory of both culture and place. The land itself and its associated histories of post-industry are explored in artistic terms investigating dislocation, wasted spaces and extinction. Landscape architects and cultural geographers explore the aesthetic of the urban ruin, its natural and human ecologies and the re-wilding of urban spaces. The volume provokes discussion by a group of diverse experts on a very contemporary subject.

nobody speaks of remarkable things: *Stillness in a Mobile World* David Bissell, Gillian Fuller, 2013-01-11 This edited collection of essays on the conceptual, political and philosophical importance of stillness is positioned within a world that has increasingly come to be understood through the theoretical and conceptual lens of movement. With contributions from leading scholars in the field, the diversity of this collection illuminates the multiplicity of ontological and epistemological registers through which stillness moves: from human geography to media studies, cultural theory to fine arts. With the help of luminaries such as Deleuze, Bergson, Barthes and Beckett, this book interweaves cutting-edge theoretical insight with empirical illustrations which examine and traverse a multitude of practices, spaces and events. In an era where stasis, slowness and passivity are often held to be detrimental, this collection puts forward a new set of political and ethical concerns which help us to come to terms with, understand, and account for (im)mobile life. *Stillness in a Mobile World* is an essential source of reference for both undergraduate and post-graduate students working within disciplines such as cultural studies, sociology, mobility studies, and human geography.

nobody speaks of remarkable things: *The Poetics and Ethics of Attention in Contemporary British Narrative* Jean-Michel Ganteau, 2022-12-27 This book uses attention as a prism through which to interrogate the literary text. It starts from analyses of the changes that the mediasphere and communication technologies have brought for the contemporary subject, submitting him/her to the tyranny of a new attention economy. My point is that the contemporary novel and memoir resist such influences and evince a great deal of resilience by promoting an "ecology of attention" (Citton) based on poetic options whose pragmatic effect is to develop an ethics of the particularist type. To do this, I draw on critical and theoretical literature hailing from various fields: psychology, but also more prominently phenomenology, political philosophy, and analytical philosophy (essentially Ordinary Language Philosophy), alongside the ethics of care and vulnerability. By using a selection of fictional and non-fictional narratives, I address such issues as social invisibilities, climate change, AI and cognitive disability and end up drafting a poetics of attention.

nobody speaks of remarkable things: *Cosmopolitan Novel* Berthold Schoene, 2009-06-23 While traditionally the novel has been seen as tracking the development of the nation state, Schoene queries if globalisation might currently be prompting the emergence of a new sub-genre of the novel that is adept at imagining global community. The book introduces a new generation of contemporary British writers (Rachel Cusk, Kiran Desai, Hari Kunzru, Jon McGregor and David Mitchell) whose work is read against that of established novelists Arundhati Roy, James Kelman and Ian McEwan. Each chapter explores a different theoretical key concept, including 'glocality', 'glomicity', 'tour du monde', 'connectivity' and 'compearance'. Key Features: * Defines the new genre of the 'cosmopolitan novel' by reading contemporary British fiction as responsive to new global socio-economic formations * Expands knowledge of world culture, national identity, literary creativity and political agency by introducing concepts from globalisation and cosmopolitan theory into literary studies * Explores debates on Britishness and 'the contemporary' with close reference to the fall of the Berlin Wall on 9/11/1989 and the World Trade Centre attacks on 11/9/2001 * Introduces a new generation

of British writers within a complex global context by drawing on Jean-Luc Nancy's work on community and creative world-formation

nobody speaks of remarkable things: The 2000s: A Decade of Contemporary British Fiction
Nick Bentley, Nick Hubble, Leigh Wilson, 2015-10-22 How did social, cultural and political events in Britain during the 2000s shape contemporary British fiction? The means of publishing, buying and reading fiction changed dramatically between 2000 and 2010. This volume explores how the socio-political and economic turns of the decade, bookended by the beginning of a millennium and an economic crisis, transformed the act of writing and reading. Through consideration of, among other things, the treatment of neuroscience, violence, the historical and youth subcultures in recent fiction, the essays in this collection explore the complex and still powerful relation between the novel and the world in which it is written, published and read. This major literary assessment of the fiction of the 2000s covers the work of newer voices such as Monica Ali, Mark Haddon, Tom McCarthy, David Peace and Zadie Smith as well as those more established, such as Salman Rushdie, Hilary Mantel and Ian McEwan making it an essential contribution to reading, defining and understanding the decade.

nobody speaks of remarkable things: Towards Excellence in Early Years Education
Kathleen Gooch, 2010-06-22 This book uniquely describes the work of two Early Years Professionals, drawing on their narrative accounts as they robustly describe and analyse their work with young children. Against a backdrop of increasing regulation and inspection of early years care and education, Kathy Gooch emphasizes the importance of building authentic relationships with children and their families, explores how play can be promoted as the central site for learning, and shows how professionals can use play to account for children's development and learning. In analysing the Early Year Professionals' narratives, this book explores key themes including: Traditional notions of 'teaching' and how they can be redefined The significance of talk in children's lives Teachers' professional identities How children's potential in learning can be achieved through play Celebrating knowledge, skills and understanding and re-defining what it means to be a teacher, in its broadest sense, this fascinating book brings together research and literature from across disciplines. Containing a foreword by Tricia David, it will be of interest to academics, early years educators and students on early childhood education degree programmes and initial teacher education courses, as well as others concerned with the over prescriptive nature of early education.
