the man the game: A Man's Game John Dudley, 2004-04-08 Demonstrates how concepts of masculinity shaped the aesthetic foundations of literary naturalism A Man's Game explores the development of American literary naturalism as it relates to definitions of manhood in many of the movement's key texts and the aesthetic goals of writers such as Stephen Crane, Jack London, Frank Norris, Edith Wharton, Charles Chestnutt, and James Weldon Johnson. John Dudley argues that in the climate of the late 19th century, when these authors were penning their major works, literary endeavors were widely viewed as frivolous, the work of ladies for ladies, who comprised the vast majority of the dependable reading public. Male writers such as Crane and Norris defined themselves and their work in contrast to this perception of literature. Women like Wharton, on the other hand, wrote out of a skeptical or hostile reaction to the expectations of them as woman writers. Dudley explores a number of social, historical, and cultural developments that catalyzed the masculine impulse underlying literary naturalism: the rise of spectator sports and masculine athleticism; the professional role of the journalist, adopted by many male writers, allowing them to camouflage their primary role as artist; and post-Darwinian interest in the sexual component of natural selection. A Man's Game also explores the surprising adoption of a masculine literary naturalism by African American writers at the beginning of the 20th century, a strategy, despite naturalism's emphasis on heredity and genetic determinism, that helped define the black struggle for racial equality

the man the game: White Man's Game Stephanie Hanes, 2025-06-25 A probing examination of Western conservation efforts in Africa, where our feel-good stories belie a troubling reality The stunningly beautiful Gorongosa National Park, once the crown jewel of Mozambique, was nearly destroyed by decades of civil war. It looked like a perfect place for Western philanthropy: revive the park and tourists would return, a win-win outcome for the environment and the impoverished villagers living in the area. So why did some researchers find the local communities actually getting hungrier, sicker, and poorer as the project went on? And why did efforts to bring back wildlife become far more difficult than expected? In pursuit of answers, Stephanie Hanes takes readers on a vivid safari across southern Africa, from the shark-filled waters off Cape Agulhas to a reserve trying to save endangered wild dogs. She traces the tangled history of Western missionaries, explorers, and do-gooders in Africa, from Stanley and Livingstone to Teddy Roosevelt, from Bono and the Live Aid festivals to Greg Carr, the American benefactor of Gorongosa. And she examines the larger problems that arise when Westerners try to fix complex, messy situations in the developing world, acting with best intentions yet potentially overlooking the wishes of the people who live there. Beneath the uplifting stories we tell ourselves about helping Africans, she shows, often lies a dramatic misunderstanding of what the locals actually need and want. A gripping narrative of environmentalists and insurgents, poachers and tycoons, elephants and angry spirits, White Man's Game profoundly challenges the way we think about philanthropy and conservation.
