adrian carton de wiar: Castle of the Eagles Mark Felton, 2017-07-18 Vincigliata Castle, a menacing medieval fortress set in the beautiful Tuscan hills, has become a very special prisoner of war camp on Benito Mussolini's personal order. Within are some of the most senior officers of the Allied army, guarded by almost two hundred Italian soldiers and a vicious fascist commando who

answers directly to "Il Duce" Mussolini himself. Their unbelievable escape, told by Mark Felton in *Castle of the Eagles*, is a little-known marvel of World War II. By March 1943, the plan is ready: this extraordinary assemblage of middle-aged POWs has crafted civilian clothes, forged identity papers, gathered rations, and even constructed dummies to place in their beds, all in preparation for the moment they step into the tunnel they have been digging for six months. How they got to this point and what happens after is a story that reads like fiction, supported by an eccentric cast of characters, but is nonetheless true to its core.

adrian carton de wiar: *Churchill's Generals* John Keegan, 2012-09-06 John Keegan has assembled a cast of seventeen generals whose reputations were made (and some of them broken) by Churchill and the Second World War. Churchill's reputation as prime minister during the Second World War fluctuated according to the successes and failures of his generals. Most of them were household names, and often heroes, during the war years. All of them were prey to the intolerance, interference, irascibility - and the inspiration - of the man who wanted to be both the general in the field and the presiding strategic genius. He sacked his warlords ruthlessly, yet in the end he came to be served by perhaps the greatest generals this country has ever produced. Includes chapters on Wavell, Ironside, Ritchie, Auchinleck, Montgomery, Alexander, Percival, Wingate, Slim and Carton de Wiart. adrian carton de wiar: *The China-Burma-India Campaign, 1931-1945* Eugene L. Rasor, 1998-03-19 The China-Burma-India campaign of the Asian/Pacific war of World War II was the most complex, if not the most controversial, theater of the entire war. Guerrilla warfare, commando and special intelligence operations, and air tactics originated here. The literature is extensive and this book provides an evaluative survey of that vast literature. A comprehensive compilation of some 1,500 titles, the work includes a narrative historiographical overview and an annotated bibliography of the titles covered in the historiographical section. Following an introductory historical essay and a chronology, the historiographical narrative covers land, water, underwater, air, and combined operations, intelligence matters, diplomacy, and logistics and supply. It also examines the memoirs, diaries, autobiographies, and biographies of the personnel involved. Such cultural topics as journalism, fiction, film, and art are analyzed, and existing gaps in the literature are looked at. The bibliography provides both descriptive and evaluative annotations.

adrian carton de wiar: *Anatomy of a Campaign* John Kiszely, 2017-04-27 The British campaign in Norway in 1940 was an ignominious and abject failure. It is perhaps best known as the fiasco which directly led to the fall of Prime Minister Neville Chamberlain and his replacement by Winston Churchill. But what were the reasons for failure? Why did the decision makers, including Churchill, make such poor decisions and exercise such bad judgement? What other factors played a

part? John Kiszely draws on his own experience of working at all levels in the military to assess the campaign as a whole, its context and evolution from strategic failures, intelligence blunders and German air superiority to the performance of the troops and the serious errors of judgement by those responsible for the higher direction of the war. The result helps us to understand not only the outcome of the Norwegian campaign but also why more recent military campaigns have found success so elusive.
