The overarching issue concerns the mutual relationship between representation and narration by means of the picturebooks' multimodal character. Moreover, this volume includes the main lines of debate and approaches to picturebooks by international leading researchers in the field. Topics covered are the impact of paratexts and interpicture allusions, the relationship between artists' books, crossover picturebooks, and picturebooks for adults, the narrative defiance of wordless picturebooks, the representation of emotions in images and text, and the depiction of hybrid characters in picturebooks. The enlargement of the picturebook corpus beyond an Anglo-American picturebook canon opens up new horizons and highlights the diverging styles and genre shifts in modern picturebooks. This tendency also demonstrates the influence of specific authors and illustrators on the appreciation of the picturebook genre, as in the case of Astrid Lindgren's picturebooks and the picturebooks created by renowned illustrators, such as Anthony Browne, Wolf Erlbruch, Stian Hole, and Bruno Munari. This book will be the definite contribution to contemporary picturebook research for many years to come.

This comprehensive book is rooted in the belief that educators must consider and offer a wide range of choice to ensure that students read good books. It argues that the choices children make about what they read should be governed by their interests and desire to learn; not by a grade or reading level.

translation process of picturebooks and how the word-image interplay inherent in the medium can have an impact both on translation practice and the reading process itself. The book draws on a wide range of picturebooks published and translated in a number of languages to demonstrate the myriad ways in which information and meaning is conveyed in the translation of multimodal material and in turn, the impact of these interactions on the readers' experiences of these books. The volume also analyzes strategies translators employ in translating picturebooks, including issues surrounding culturally-specific references and visual and verbal gaps, and features a chapter with excerpts from translators' diaries written during the process. Highlighting the complex dynamics at work in the translation process of picturebooks and their implications for research on translation studies and multimodal material, this book is an indispensable resource for students and researchers in translation studies, multimodality, and children's literature.
