**monkey the jungle book: The Jungle Book** Rudyard Kipling, 2020-11-22 These tales of the man-cub, Mowgli, and fables of the clever creatures of the wild, like the mongoose Rikki-Tikki-Tavi, still brim with the adventure, camaraderie, and beloved characters that have endeared them to readers for more than 125 years. Rudyard Kipling's elegantly written short tales alternate with his memorable verse as he brings the wild world of the Indian jungle to vivid life. The interaction of the quirky animal characters is amusing and enlightening as Kaa the python, Bagheera the panther and the others evince all-too-human virtues and vices. Mowgli's adventures provide thrills and amusement, but he is always learning, gaining knowledge of the world and the laws that govern it. The emotional theme of the loss of family and the importance of the support of loved ones surfaces repeatedly and provides some of the book's most memorable and affirming moments. Readers will root for Mowgli as he confronts the villainous tiger Shere Khan, cheer Kaa the python and Baloo the bear as they mount a daring rescue of their man-cub friend, but these tales have a greater resonance than might be initially apparent. These are stories that stay with the reader, which might help explain how this book, which first appeared in 1894, has been adapted so often and so recently to film, television, music, comics, manga, cartoons and more. With an eye-catching new cover, and professionally typeset manuscript, this edition of The Jungle Book is both modern and readable.

**monkey the jungle book: The Jungle Book(Illustrated)** Rudyard Kipling, 2016-05-20 The Jungle Book (1894) is a collection of stories by English author Rudyard Kipling. The stories were first published in magazines in 1893-94. The original publications contain illustrations, some by the author's father, John Lockwood Kipling. Kipling was born in India and spent the first six years of his childhood there. After about ten years in England, he went back to India and worked there for about six-and-a-half years. These stories were written when Kipling lived in Naulakha, the home he built in Dummerston, Vermont(just north of Brattleboro), in the United States. There is evidence that the collection of stories was written for his daughter Josephine, who died in 1899 at six years of age; a

rare first edition of the book with a poignant handwritten note by the author to his young daughter was discovered at the National Trust's Wimpole Hall in Cambridgeshire in 2010. The tales in the book (as well as those in *The Second Jungle Book* which followed in 1895, and which includes five further stories about Mowgli) are fables, using animals in an anthropomorphic manner to give moral lessons. The verses of *The Law of the Jungle*, for example, lay down rules for the safety of individuals, families, and communities. Kipling put in them nearly everything he knew or heard or dreamed about the Indian jungle.

We are not alone. We are not alone on the planet. We are not alone in the countryside. We are not alone in cities. We are not alone in our homes. We are humans and we love the idea of our uniqueness. But the fact is that we humans are as much members of the animal kingdom as the cats and dogs we surround ourselves with, the cows and the fish we eat, and the bees who pollinate so many of our food-plants. In The History of the World in 100 Animals, award-winning author Simon Barnes selects the one hundred animals who have had the greatest impact on humanity and on whom humanity has had the greatest effect. He shows how we have domesticated animals for food and for transport, and how animals powered agriculture, making civilisation possible. A species of flea came close to destroying human civilisation in Europe, while the slaughter of a species of bovines was used to create one civilisation and destroy another. He explains how pigeons made possible the biggest single breakthrough in the history of human thought. In short, he charts the close relationship between humans and animals, finding examples from around the planet that bring the story of life on earth vividly to life, with great insight and understanding. The heresy of human uniqueness has led us across the millennia along the path of destruction. This book, beautifully illustrated throughout, helps us to understand our place in the world better, so that we might do a better job of looking after it. That might save the polar bears, the modern emblem of impending loss and destruction. It might even save ourselves.
