movie scott of the antarctic 1948: The Making of Horror Movies Jennifer Selway, 2021-06-09 A fascinating journey through society's changing preoccupations as reflected in horror films—plus profiles of the genre's top actors and directors. It wasn't until 1973 that a horror film—The Exorcist—was nominated for an Oscar for Best Picture, and critics are still divided today, many regarding them with amused condescension. The public's view is also sharply divided. Some cinema-goers revel in the thought of being made very, very afraid, while others avoid horror films

because they don't want to be frightened. This guide, which is for both the fan and the more fainthearted, steers an illuminating path through a genre that has, since the early days of cinema, split off into many subdivisions—folk horror, slasher movies, Hammer, sci-fi horror, psychological thrillers, zombie movies, among others. Times change but moviemakers can always find a way to tap into what we fear and dread, whether it's blood-sucking vampires or radioactive mutations, evil children, or the living dead. This book also gives concise biographies of the many actors and directors who saw their careers—for better or worse—defined by their association with horror movies, and who created a genre that is instantly recognizable in all its forms and continues to find new and ingenious ways of scaring us in the dark.

movie scott of the antarctic 1948: Films and British National Identity Jeffrey Richards, 1997-09-15 This book seeks to examine the ways in which the cinema has defined, mythified and disseminated British national identity during the course of the twentieth century. It takes the form of a series of linked essays which examine chronologically, thematically and by specific case studies of films, stars and genres the complexities and ambiguities in the process of evolution and definition of the national identity. It argues for the creation of a distinctive British national identity both in cinema and the wider culture. But it also assesses the creation of alternative identities both ethnic and regional and examines the interaction of cinema and other cultural forms (music, literature and television).

movie scott of the antarctic 1948: Frozen Empires Adrian Howkins, 2016-11-01 Perpetually covered in ice and snow, the mountainous Antarctic Peninsula stretches southward towards the South Pole where it merges with the largest and coldest mass of ice anywhere on the planet. Yet far from being an otherworldly Pole Apart, the region has the most contested political history of any part of the Antarctic Continent. Since the start of the twentieth century, Argentina, Britain, and Chile have made overlapping sovereignty claims, while the United States and Russia have reserved rights to the entire continent. The environment has been at the heart of these disputes over sovereignty, placing the Antarctic Peninsula at a fascinating intersection between diplomatic history and environmental history. In *Frozen Empires*, Adrian Howkins argues that there has been a fundamental continuity in the ways in which imperial powers have used the environment to support their political claims in the Antarctic Peninsula region. British officials argued that the production of useful scientific knowledge about the Antarctic helped to justify British ownership. Argentina and Chile made the case that the Antarctic Peninsula belonged to them as a result of geographical proximity, geological continuity, and a general sense of connection. Despite various challenges and claims, however, there has never been a genuine decolonization of the Antarctic Peninsula region. Instead, imperial assertions that respective entities were conducting science for the good of humanity were reformulated through the terms of the 1959 Antarctic Treaty, and Antarctica's frozen empires remain in place to this day. In arguing for imperial continuity in the region, Howkins counters the official historical narrative of Antarctica, which rests on a dichotomy between bad sovereignty claims and good scientific research. *Frozen Empires* instead suggests that science, politics, and the environment have been inextricably connected throughout the history of the Antarctic Peninsula region--and remain so--and shows how political prestige in the guise of conducting science for the good of humanity continues to influence international climate negotiations.

movie scott of the antarctic 1948: British Cinema of the 1950s Sue Harper, Vincent Porter, 2003 In this definitive and long-awaited history of 1950s British cinema, Sue Harper and Vincent Porter draw extensively on previously unknown archive material to chart the growing rejection of post-war deference by both film-makers and cinema audiences. Competition from television and successive changes in government policy all forced the production industry to become more market-sensitive. The films produced by Rank and Ealing, many of which harked back to

wartime structures of feeling, were challenged by those backed by Anglo-Amalgamated and Hammer. The latter knew how to address the rebellious feelings and growing sexual discontents of a new generation of consumers. Even the British Board of Film Censors had to adopt a more liberal attitude. The collapse of the studio system also meant that the screenwriters and the art directors had to cede creative control to a new generation of independent producers and film directors. Harper and Porter explore the effects of these social, cultural, industrial, and economic changes on 1950s British cinema.

movie scott of the antarctic 1948: Battle of Britain The Movie Robert J. Rudhall, Dilip Sarkar, 2023-06-30 Released in 1969, the film *Battle of Britain* went on to become one of the most iconic war movies ever produced. The film drew many respected British actors to accept roles as key figures of the battle, including Sir Laurence Olivier as Hugh Dowding and Trevor Howard as Keith Park. It also starred Michael Caine, Christopher Plummer and Robert Shaw as squadron leaders. As well as its large all-star international cast, the film was notable for its spectacular flying sequences which were on a far grander scale than anything that had been seen on film before. At the time of its release, *Battle of Britain* was singled out for its efforts to portray the events of the summer of 1940 in great accuracy. To achieve this, *Battle of Britain* veterans such as Group Captain Tom Gleave, Wing Commander Robert Stanford Tuck, Wing Commander Douglas Bader, Squadron Leader Boleslaw Drobinski and Luftwaffe General Adolf Galland were all involved as consultants. This detailed description of the making of the film is supported by a mouth-watering selection of pictures that were taken during the production stages. The images cover not only the many vintage aircraft used in the film, but also the airfields, the actors, and even the merchandise which accompanied the film's release in 1969 - plus a whole lot more. There are numerous air-to-air shots of the Spitfires, Messerschmitts, Hurricanes and Heinkels that were brought together for the film. There are also images that capture the moment that *Battle of Britain* veterans, some of whom were acting as consultants, visited the sets. Interviews with people who worked on the film, such as Hamish Mahaddie, John Blake and Ron Goodwin, among others, bring the story to life.

movie scott of the antarctic 1948: *Emma's War* Deborah Scroggins, 2011-11-23 Emma McCune's passion for Africa, her unstinting commitment to the children of Sudan, and her youthful beauty and glamour set her apart from other relief workers from the moment she arrived in southern Sudan. But no one was prepared for her decision to marry a local warlord—a man who seemed to embody everything she was working against—and to throw herself into his violent quest to take over southern Sudan's rebel movement. With precision and insight, Deborah Scroggins—who met McCune in Sudan—charts the process by which McCune's romantic delusions led to her descent into the hell of Africa's longest-running civil war. *Emma's War* is at once a disturbing love story and an up-close look at Sudan: a world where international aid fuels armies as well as the starving population, and where the northern-based Islamic government—backed by Osama bin Laden—is locked in a war with the Christian and pagan south over religion, oil, and slaves. A timely, revelatory account of the nature of relief work, of the men and women who choose to carry it out, and of one woman's sacrifice to its ideals.
