the golden pavilion book: The Temple of the Golden Pavilion Yukio Mishima, 1959 The son of a poor rural priest becomes an acolyte at the Temple of the Golden Pavilion. Mizoguchi had built up an image of ideal beauty in his mind based on this Golden Pavilion; this ideal image causes him to

feel disappointed in any supposed form of beauty, even the actual physical Golden Pavilion. He comes under the influence of Kashiwagi, a fellow student with a very bitter view of life.

the golden pavilion book: The Temple of the Golden Pavilion Yukio Mishima, 1995-03-21 In *The Temple of the Golden Pavilion*, celebrated Japanese novelist Yukio Mishima creates a haunting portrait of a young man's obsession with idealized beauty and his destructive quest to possess it fully. Mizoguchi, an ostracized stutterer, develops a childhood fascination with Kyoto's famous Golden Temple. While an acolyte at the temple, he fixates on the structure's aesthetic perfection and it becomes his one and only object of desire. But as Mizoguchi begins to perceive flaws in the temple, he determines that the only true path to beauty lies in an act of horrific violence. Based on a real incident that occurred in 1950, *The Temple of the Golden Pavilion* brilliantly portrays the passions and agonies of a young man in postwar Japan, bringing to the subject the erotic imagination and instinct for the dramatic moment that marked Mishima as one of the towering makers of modern fiction. With an introduction by Donald Keene; Translated from the Japanese by Ivan Morris.

Mizoguchi feels utterly abandoned and alone until he becomes a pdest at Kinka-kuji, a famous Buddhist temple in Kyoto. Failing in his quest to find the warmth of human companionship in the temple, the young man, tormented by the temple's exquisite beauty, decides to destroy himself and all he loves. He feels he cannot live in peace as long as the temple exists. Mizoguchi, like many other troubled Mishima heroes, becomes obsessed with unattainable ideals. *The Temple of the Golden Pavilion* reflects Mishima's preoccupations with beauty and death in a clear and unmistakable manner. It is also an excellent example of a theme that frequently arises in Mishima's work: the resentment of the object of desire. Because this novel, arguably Mishima's best, reflects the author's suicidal tendencies, it also offers us insight into one of the twentieth century's greatest and most complex literary icons.

The Western world became aware of this when Akira Kurosawa's *Rashomon* was awarded the Grand Prize at the Venice film festival in 1951 and the Oscar for best foreign film in 1952. More recent examples include Shohei Imamura's *Eel*, which won the Palm d'Or (Best Picture) at Cannes in 1997. *From Book to Screen* breaks new ground by exploring important connections between Japan's modern literary tradition and its national cinema. The first part offers an historical and cultural overview of the working relationship that developed between pure literature and film. It deals with three important periods in which filmmakers relied most heavily on literary works for enriching and developing cinematic art. The second part provides detailed analyses of a dozen literary works and their screen adoptions.

the golden pavilion book: Architecture Post Mortem Donald Kunze, David Bertolini, Simone Brott, 2016-04-15 Architecture Post Mortem surveys architecture's encounter with death, decline, and ruination following late capitalism. As the world moves closer to an economic abyss that many perceive to be the death of capital, contraction and crisis are no longer mere phases of normal market fluctuations, but rather the irruption of the unconscious of ideology itself. Post mortem is that historical moment wherein architecture's symbolic contract with capital is put on stage, naked to all. Architecture is not irrelevant to fiscal and political contagion as is commonly believed; it is the victim and penetrating analytical agent of the current crisis. As the very apparatus for modernity's guilt and unfulfilled drives-modernity's debt-architecture is that ideological element that functions as a master signifier of its own destruction, ordering all other signifiers and modes of signification beneath it. It is under these conditions that architecture theory has retreated to an 'Alamo' of history, a final desert outpost where history has been asked to transcend itself. For architecture's hoped-for utopia always involves an apocalypse. This timely collection of essays reformulates architecture's relation to modernity via the operational death-drive: architecture is but a passage between life and death. This collection includes essays by Kazi K. Ashraf, David Bertolini, Simone Brott, Peggy Deamer, Didem Ekici, Paul Emmons, Donald Kunze, Todd McGowan, Gevork Hartoonian, Nadir Lahiji, Erika Naginski, and Dennis Maher.

the golden pavilion book: The Cultural Career of Coolness Ulla Haselstein, Irmela Hijiya-Kirschnereit, Catrin Gersdorf, Elena Giannoulis, 2013-10-10 Cool is a word of American English that has been integrated into the vocabulary of numerous languages around the globe. Today it is a term most often used in advertising trendy commodities, or, more generally, in promoting urban lifestyles in our postmodern age. But what is the history of the term "cool? When has coolness come to be associated with certain modes of contemporary self-fashioning? On what grounds do certain nations claim a privilege to be recognized as "cool? These are some of the questions that served as a starting-point for a comparative cultural inquiry which brought together specialists from American Studies and Japanese Studies, but also from Classics, Philosophy and Sociology. The conceptual grid of the volume can be described as follows: (1) Coolness is a metaphorical term for affect-control. It is tied in with cultural discourses on the emotions and the norms of their public display, and with gendered cultural practices of subjectivity. (2) In the course of the cultural transformations of modernity, the term acquired new importance as a concept

referring to practices of individual, ethnic, and national difference. (3) Depending on cultural context, coolness is defined in terms of aesthetic detachment and self-irony, of withdrawal, dissidence and even latent rebellion. (4) Coolness often carries undertones of ambivalence. The situational adequacy of cool behavior becomes an issue for contending ethical and aesthetic discourses since an ethical ideal of self-control and a strategy of performing self-control are inextricably intertwined. (5) In literature and film, coolness as a character trait is portrayed as a personal strength, as a lack of emotion, as an effect of trauma, as a mask for suffering or rage, as precious behavior, or as savvy. This wide spectrum is significant: artistic productions offer valid insights into contradictions of cultural discourses on affect-control. (6) American and Japanese cultural productions show that twentieth-century notions of coolness hybridize different cultural traditions of affect-control.
