the place promised in our early days: Mechademia 4 Frenchy Lunning, 2013-11-30 The themes of war and time are intertwined in unique ways in Japanese culture, freighted as that nation is with the multiple legacies of World War II: the country's militarization, its victories and defeats, Hiroshima and Nagasaki, and the uneasy pacifism imposed by the victors. Delving into topics ranging from the production of wartime propaganda to the multimedia adaptations of romance narrative, contributors to the fourth volume in the Mechademia series address the political, cultural, and technological continuum between war and the everyday time of orderly social productivity that is reflected, confronted, and changed in manga, anime, and other forms of Japanese popular culture. Grouped thematically, the essays in this volume explore the relationship between national sovereignty and war (from the militarization of children as critically exposed in Grave of the Fireflies to reworkings of Japanese patriotism in The Place Promised in Our Early Days), the intersection of war and the technologies of social control (as observed in the films of Oshii Mamoru and the apocalyptic vision of Neon Genesis Evangelion), history and memory (as in manga artists working through the trauma of Japan's defeat in World War II and the new modalities of storytelling represented by Final Fantasy X), and the renewal and hybridization of militaristic genres as a means of subverting conventions (in Yamada Futaro's ninja fiction and Miuchi Suzue's girl knight manga). the place promised in our early days: Divided Lenses Michael Berry, Chiho Sawada, 2017-12-31 *Divided Lenses: Screen Memories of War in East Asia* is the first attempt to explore how the tumultuous years between 1931 and 1953 have been recreated and renegotiated in cinema. This period saw traumatic conflicts such as the Sino-Japanese War, the Pacific War, and the Korean War, and pivotal events such as the Rape of Nanjing, Pearl Harbor, the Battle of Iwo Jima, and the bombings of Hiroshima and Nagasaki, all of which left a lasting imprint on East Asia and the world. By bringing together a variety of specialists in the cinemas of East Asia and offering divergent yet complementary perspectives, the book explores how the legacies of war have been reimagined through the lens of film. This turbulent era opened with the Mukden Incident of 1931, which signaled a new page in Japanese militaristic aggression in East Asia, and culminated with the Korean War (1950-1953), a protracted conflict that broke out in the wake of Japan's post-World War II withdrawal from Korea. *Divided Lenses* explores the ways in which events of the intervening decades have continued to shape politics and popular culture throughout East Asia and the world. The essays in part I examine historical trends at work in various national cinemas, including China, Taiwan, Japan, Korea, and the United States. Those in part 2 focus on specific themes present in the cinema portraying this period—such as comfort women in Chinese film, the Nanjing Massacre, or nationalism—and how they have been depicted or renegotiated in contemporary films. Of particular interest are contributions drawing from other forms of screen culture, such as television and video games. *Divided Lenses* builds on the growing interest in East Asian cinema by examining how these historic conflicts have been imagined, framed, and revisited through the lens of cinema and screen culture. It will interest later generations living in the shadow of these events, as well as students and scholars in the fields of cinema studies, cultural studies, cold war studies, and World War II history.

This radically new worldview has significantly altered the socio-political as well as literary perception of one of the world's potential superpowers, and in this book the contributors closely examine how Japan's new paradigm of precarious existence is expressed through a variety of pop-cultural as well as literary media. Addressing the transition from post-war to post-disaster literature, this book examines the rise of precarity consciousness in Japanese socio-cultural discourse. The chapters investigate the extent to which we can talk about the emergence of a new literary paradigm of precarity in the world of Japanese popular culture. Through careful examination of a variety of contemporary texts ranging from literature, manga, anime, television drama and film this study offers an interpretation of the many dissonant voices in Japanese society. The contributors also outline the related social issues in Japanese society and culture, providing a comprehensive overview of the global trends that link Japan with the rest of the world. *Visions of Precarity in Japanese Popular Culture and Literature* will be of great interest to students and scholars of contemporary Japan, Japanese culture and society, popular culture and social and cultural history.

the place promised in our early days: *Japanese ANIME Story* Seo hyun woong, 2025-05-15
Hello, I am Seohyeon Woong, an author from the Japanese specialty bookstore MeeNii. We often try to define cultures by borders and seek identity within them. However, culture is like water flowing beyond borders, continuously influencing and being influenced by each other without staying in one place. The cultural relationship between Korea and Japan, especially through animation exchange, is a perfect example of this fluidity. The introduction of Japanese animation to Korea starting in the 1960s was not merely the import of foreign content. It was a cultural phenomenon that shaped the imagination of a generation, inspired creativity, and sometimes sparked social debates. While it is widely known that Korean animations like 'Robot Taekwon V' were inspired by Japanese works, the depth and breadth of that influence are far more extensive than one might think. This book explores how Japanese animation has been accepted and transformed within Korean society and culture from the 1960s to the present. Through works spanning generations, from 'Mazinger Z' to 'Your Name,' we will uncover hidden stories of Korean popular culture. This is not just a history of animation but also a cultural history reflecting the changes and growth of Korean society. We aim to revisit Japanese animations from the black-and-white TV era, when parents gathered with neighborhood kids to watch cartoons, to those enjoyed by today's MZ generation. By minimizing technical jargon and complex theories, I hope to guide this journey in a language that everyone can easily understand. Let us begin the journey to discover another aspect of Korean culture through the lens of Japanese animation. Thank you.

the place promised in our early days: Transgressing Death in Japanese Popular Culture Miguel Cesar, 2020-08-27 This book focuses on the theme of the transgression of life and death boundaries through its representation in Japanese contemporary visual media, more specifically in the manga *Fullmetal Alchemist*, the animated film *Journey to Agartha*, and the computer game *Shadow of the Colossus*. By addressing how the theme was constructed by three different media and what these texts say about it, the book focuses on the narrativization of Japanese ontological anxieties. The book argues that, although these texts deal with matters of afterlife through fantasy worlds, the content of their stories, the archetypes of their characters, and their existential journeys echo contextually-situated conversations. Matters of gender, societal structure and, most of all, the tensions between individuality and sociocentrism not only permeate but structure the interrogation of our relation to the afterlife. This book stands to contribute significantly to media studies, literary studies, and Japanese studies.
