Entertainment Options

1. Watching Movies and TV Shows

One of the most popular ways to pass the time on a plane is by watching movies or binge-watching TV series. 1. Entertainment and Media Consumption

1.1 Watching Movies and TV Shows

The inflight entertainment system (IFE) has come a long way, often offering a vast library of movies, documentaries, and TV series. If your airline provides this service, it's a fantastic way to pass the time. Bring your own headphones for better sound quality, and consider downloading content beforehand if the airline's selection is limited or if you prefer personal devices.

Tips:

- Download movies or shows onto your device via streaming services like Netflix or Amazon Prime before your flight.
- Use noise-canceling headphones to improve audio experience and block ambient noise.
- Bring a portable charger to keep your device powered throughout the flight.

1.2 Listening to Podcasts and Audiobooks

For those who prefer audio content, podcasts and audiobooks are excellent options. They require minimal equipment—just your device and headphones—and can be enjoyed during meals, while resting, or during periods of turbulence.

Popular genres include:

- True crime
- Personal development
- Comedy
- Storytelling and fiction

Recommendations:

- Subscribe to a series of episodes or download complete audiobooks in advance.

- Multiplayer games to play with a travel companion

Note: Always ensure your device is fully charged before the flight, or carry a portable power bank.

2. Productivity and Work

Suggestions:

- Compile a reading list before your trip.

things to do on a plane: Something to Say William Carlos Williams, 1985 *Something to Say*: William Carlos Williams on Younger Poets collects all of Williams' known writings--reviews, essays, introductions, and letters to the editor--on the two generations of poets that followed him, from Kenneth Rexroth and Louis Zukofsky to Robert Lowell and Allen Ginsberg. What might have been a random collection of occasional pieces achieves remarkable coherence from the singleness of Williams' poetic vision: his belief that the secret spirit of ritual, of poetry, was trapped in restrictive molds, and, if these could be broken, the spirit would be able to live again in a new, contemporary form. Only a revived clarity and accuracy in sight and expression would enable the modern world to reform social order which Williams saw in complete disarray. To resuscitate American Poetry, Williams concentrated his efforts on the purification of poetic speech--his American idiom--and on remaking the poetic line in a new measure--his variable foot. And while his battles with his contemporaries on these issues could be heated, he was always a nurturing father to the young, a useful presence, a model and a liberator. He told Ginsberg to pare down and economize, Roethke to open up, and encouraged Lowell and Levertov to shake off poetic conventions. But in all his emphasis on the poem as a made object of concrete physicality or as a field of action, he would return again and again to this basic advice to young writers: The only thing necessary is to have something to say when at last the opportunity comes to say it.

things to do on a plane: [All Things to All People](#) Kenny Messman, 2019-06-05 All Things to All People This is a book about God's wisdom to equip a man with skills (physician, pilot, preacher, and dentist) and then through His power to use that committed man to accomplish His will among a poverty laden and underprivileged Batonga tribe in the remote Zambezi Valley of Rhodesia, Africa. It is about God using a Christian medical doctor to relieve the physical suffering of the Batonga people who struggled against rampant innumerable tropical diseases in harsh environmental conditions. It is about how God protects his missionary servant while he preaches and treats during treacherous war times when freedom fighters and government soldiers did battle leading to collateral damage to helpless Batonga people. It is about how God enabled a missionary to communicate in the native language to train scores of Batonga to become deacons and evangelists of His Word. It is about how God blended the culture of an ancient tribe of Batonga people who lived in daily dread of anger from their ancestral spirits with the culture of Christian doctor from a foreign land. It is about how God used a missionary to solicit food aid from far away countries to save the Batonga from starvation during frequent droughts. It is about how God used an airplane and a missionary pilot to expedite the spread of the Gospel to vast remote areas devoid of roads and to facilitate delivery of medical care and food relief. It is about how God used that airplane to circumvent the threat of landmines and deadly ambushes that are no respecter of persons. It is about a tribe of gentle peace-loving people who responded enthusiastically to the message about Salvation in Jesus. It is finally about how God's message of love permeated to the far reaches of the Batonga people.
