tony hart take hart: Size Matters Not Warwick Davis, 2011-11-01 Published to coincide with his highly anticipated new sitcom – a mockumentary follow-up to Extras from the pens of Ricky Gervais and Stephen Merchant – Size Matters Not is the surprising and hilarious story of the world's biggest little actor. When Nana Davis heard an advert on the radio seeking small people for the third Star Wars movie little did she know it was a moment that would transform her tiny grandson's life. Aged only eleven and just two-feet-eleven inches in height, Warwick went on to make his screen debut as Wicket the Ewok in 1983's box-office smash Return of the Jedi. It was the beginning of a career that would see him star in some of the biggest films of the last thirty years. Still just three-foot-six, Warwick owes his success to a boundless optimism. His one-in-a-million genetic condition may have opened doors through which other actors couldn't fit, but it has also led to trials and tragedy – from the seemingly mundane challenge of supermarket shopping, to the sometimes heartbreaking story of his struggle to start a family. By turns funny and moving, Size Matters Not is a big story from a big man, who just happens to be very, very short.

It was a playground battlefield of Sindy versus Action Man or a dexterous display of how to handle Clackers without painfully rapping them across the knuckles. After-school television meant a choice of 'Blue Peter' or 'Magpie', while chewing on an Aztec chocolate bar and flicking through Shoot or Jackie magazine. He reveals how the rockier interwar period set the shape of the industry in enduring ways, and how creatives like Len Lye and Lotte Reiniger brought art to advertising and sponsored films, building a foundation for such distinctive talents as Bob Godfrey, Alison De Vere and George Dunning to unleash their independent visions in the age of commercial TV. Stewart highlights the integral role of women in the industry, the crucial boost delivered by the arrival of Channel 4, the emergence of online animation and much more. The book features 'close-up' analyses of key animators such as Lancelot Speed and Richard Williams, as well as more thematic takes on art, politics and music. It builds a framework for better appreciating Britain's landmark contributions to the art of animation, including Halas and Batchelor's *Animal Farm* (1954), Dunning's *Yellow Submarine* (1968) and the creations of Aardman Animations.

Potter looks back over the hundred year history, asking if the BBC is really the 'voice of Britain', and what comes next for British public broadcasting. 2022 marks the centenary year of the British Broadcasting Corporation. As Britain's most famous and influential broadcaster, the BBC faces a range of significant challenges to the way it operates, and perhaps to its existence, from the government but also from a rapidly changing media environment. Historian Simon J. Potter explores the hundred year history of this corporation, drawing out the roots of these challenges and understanding how similar threats - hostile politicians and prime ministers, the advent of television - were met and overcome in the past. Potter poses the question 'Is the BBC the voice of Britain?', exploring its role in changing wider culture and society, promoting particular versions of British national identity, both at home and overseas. The BBC has long claimed to speak for the British people, to the British people, and with a British accent, and Potter explores how far these claims have been justified with this exciting new study which covers the establishment of the BBC Empire Service and the World Service, and focuses on people, programmes, and politics to understand the Corporation's engagement with changing ideas about culture and society in Britain, including issues of class, gender, and race.
