1q84 pdf: Making Identity Count Ted Hopf, Bentley B. Allan, 2016-04-06 Constructivism, despite being one of the three main streams of IR theory, along with realism and liberalism, is rarely, if ever, tested in large-n quantitative work. Constructivists almost unanimously eschew quantitative approaches, assuming that variables of interest to constructivists, defy quantification. Quantitative scholars mostly ignore constructivist variables as too fuzzy and vague. And the rare instances in which quantitative scholars have operationalized identity as a variable, they have unfortunately realized all the constructivists' worst fears about reducing national identity to a single measure, such as language, religion, or ethnicity, thereby violating one of the foundational assumptions of constructivism: intersubjectivity. Making Identity Count presents a new method for the recovery of national identity, applies the method in 9 country cases, and draws conclusions from the empirical evidence for hegemonic transitions and a variety of quantitative theories of identity. Ted Hopf and Bentley B. Allan make the constructivist variable of national identity a valid measure that can be used by large-n International Relations scholars in a variety of ways. They lay out what is wrong with how identity has been conceptualized, operationalized and measured in quantitative IR so far and specify a methodological approach that allows scholars to recover the predominant national identities of states in a more valid and systematic fashion. The book includes national

identity reports on China, the US, UK, Germany, France, Brazil, Japan, and India to both test the authors' method and demonstrate the promise of the approach. Hopf and Allan use these data to test a constructivist hypothesis about the future of Western neoliberal democratic hegemony. Finally, the book concludes with an assessment of the method, including areas of possible improvement, as well as a description of what an intersubjective national identity data base of great powers from 1810-2010 could mean for IR scholarship.

1q84 pdf: *Listening for Democracy* Andrew Dobson, 2014 Although much prized in daily conversation, good listening has been almost completely ignored in that form of political conversation we know as democracy. This book examines the reasons why so little attention has been paid to the listening aspect of democratic conversation, explores the role that listening might play in democracy, and outlines some institutional changes that could be made to make listening more central to democratic processes. The focus on listening amounts to a reorientation of democratic theory and practice, providing novel perspectives on enduring themes in democracy such as recognition, representation, power and legitimacy—as well as some new ones, such as silence. Eschewing the pessimism of the 'realist' turn in democratic theory, the book shows how attention to listening can breathe life into the democratic project and help us to realise some of its objectives. Drawing on practical examples and multidisciplinary sources, the book shows how listening should be at the heart of representative and deliberative democracy rather than peripheral to them. It develops a notion of dialogic democracy based on structured, 'apophatic', listening, and meets the challenge of showing how this could be incorporated in parliamentary democracies. What should we be listening out for? This book addresses the question of political noise and uses the idea of recognition to develop an account of politics that takes us beyond the Aristotelian speaking being towards a Deweyan notion of the 'event' around which publics coalesce.

1q84 pdf: *Legacies of the U.S. Occupation of Japan* Duccio Basosi, Rosa Caroli, 2015-04-01 Six decades after the end of the occupation of mainland Japan, this volume approaches the theme of the occupation's legacies. Rather than just being a matter of administrative practices and international relations, the consequences of the US occupation of Japan transcended both the seven years of its formal duration and the bilateral relations between the two countries. Rich with fresh analyses on a range of topics, including transnational and comparative views on the occupation, the influence of Japan on the United States as well as the reverse, international perspectives on this "odd couple", and the memory of the occupation in both countries, this book provides a greater understanding of the transtemporal, transnational and transcultural legacies of one of the crucial

events of the 20th century.

1q84 pdf: Haruki Murakami Chikako Nihei, 2019-05-03 Haruki Murakami: *Storytelling and Productive Distance* studies the evolution of the monogatari, or narrative and storytelling in the works of Haruki Murakami. Author Chikako Nihei argues that Murakami's power of monogatari lies in his use of distancing effects; storytelling allows individuals to cross into a different context, through which they can effectively observe themselves and reality. His belief in the importance of monogatari is closely linked to his generation's experience of the counter-culture movement in the late 1960s and his research on the 1995 Tokyo Sarin Gas Attack caused by the Aum Shinrikyo cult, major events in postwar Japan that revealed many people's desire for a stable narrative to interact with and form their identity from.

1q84 pdf: *Administering Affect* Daniel White, 2022-07-19 How do the worlds that state administrators manage become the feelings publics embody? In *Administering Affect*, Daniel White addresses this question by documenting the rise of a new national figure he calls Pop-Culture Japan. Emerging in the wake of Japan's dramatic economic decline in the early 1990s, Pop-Culture Japan reflected the hopes of Japanese state bureaucrats and political elites seeking to recover their country's standing on the global stage. White argues that due to growing regional competitiveness and geopolitical tension in East Asia in recent decades, Japan's state bureaucrats increasingly targeted political anxiety as a national problem and built a new national image based on pop-culture branding as a remedy. Based on sixteen months of ethnographic fieldwork among rarely accessible government bureaucrats, *Administering Affect* examines the fascinating connection between state administration and public sentiment. White analyzes various creative policy figures of Pop-Culture Japan, such as anime diplomats, Cool Japan branding campaigns, and the so-called Ambassadors of Cute, in order to illustrate a powerful link between practices of managing national culture and the circulation of anxiety among Japanese publics. Invoking the term administering affect to illustrate how anxiety becomes a bureaucratic target, technique, and unintended consequence of promoting Japan's national popular culture, the book presents an ethnographic portrait of the at-times surprisingly emotional lives of Japan's state bureaucrats. In examining how anxious feelings come to drive policymaking, White delivers an intimate anthropological analysis of the affective forces interconnecting state governance, popular culture, and national identity.

1q84 pdf: *Power, Piety, and People* Michael Dumper, 2020-07-14 Conflicts in cities that have particular religious significance often become intense, protracted, and violent. Why are holy cities so frequently contested, and how can these conflicts be mediated and resolved? In *Power, Piety, and People*, Michael Dumper explores the causes and consequences of contemporary conflicts in holy cities. He explains how common features of holy cities, such as powerful and autonomous religious hierarchies, income from religious endowments, the presence of sacred sites, and the performance of ritual activities that affect other communities, can combine to create tension. *Power, Piety, and People* offers five case studies of important disputes, beginning with Jerusalem, often seen as the paradigmatic example of a holy city in conflict. Dumper also discusses Córdoba, where the Islamic history of its Mosque-Cathedral poses challenges to the control exercised by the Roman Catholic Church; Banaras, where competing Muslim and Hindu claims to sacred sites threaten the fragile equilibrium that exists in the city; Lhasa, where the Communist Party of China severely restricts the ancient practice of Tibetan Buddhism; and George Town in Malaysia, a rare example of a city with many different religious communities whose leaders have successfully managed intergroup conflicts.

Applying the lessons drawn from these cities to a broader global urban landscape, this book offers scholars and policy makers new insights into a pervasive category of conflict that often appears intractable.

1q84 pdf: *Beyond Babel* Tom Clark, 2022-10-20 The contribution that scholarly organizations make to the study of languages and literatures is a service to the value of systematically learning and using meaning—understanding that meaning operates in systems. Constructively speaking, these organizations support the teaching and research of our world's experts in grammar, genre, medium, production, reception, exchange, critique, appreciation, and so on. More defensively, they are bulwarks against systems of misinformation, against the empowerment of misrepresentation and distrust between people. The chapters in this volume range from the Old Testament to Facebook and from East Asia to West Africa via Australia, the Americas, and Europe. The scholarly strength forged across that range speaks to similar strengths that so many scholarly organizations devoted to studies in languages and literatures have cultivated and maintained—often in the face of government indifference or hostility towards the Humanities. *Beyond Babel* makes a powerful case for their potential.

1q84 pdf: *Persistently Postwar* Blai Guarné, Artur Lozano-Méndez, Dolores P. Martinez, 2019-03-27 From melodramas to experimental documentaries to anime, mass media in Japan constitute a key site in which the nation's social memory is articulated, disseminated, and contested. Through a series of stimulating case studies, this volume examines the political and cultural representations of Japan's past, showing how they have reinforced personal and collective narratives while also formulating new cultural meanings, both on a local scale and in the context of transnational media production and consumption. Drawing upon diverse disciplinary insights and methodologies, these studies collectively offer a nuanced account in which mass media function as much more than a simple ideological tool.

1q84 pdf: *On Being Nonreligious in Contemporary Japan* Ian Reader, Clark Chilson, 2025-06-12 Challenging the notion of the nonreligious in Japan being religious through tradition and institution, this book demonstrates how negativity and antipathy for religion relate to religious decline in Japan today. Why do most Japanese say they are 'nonreligious' (mushukyo)? Since the 1990s, scholars have answered this key question for understanding religion in contemporary Japan as follows: although the Japanese say they are nonreligious because they do not identify with a particular religious tradition or institution, they are in fact religious through their traditional practices; New Year's visits to shinto Shrines, Buddhist mortuary rites and festivals (matsuri) are typically seen as customs rather than as religious. Challenging this answer, this book argues that many Japanese say they are nonreligious because they actually dislike religion and want to distance themselves from it. To support this argument, the book explores how religion is in decline in Japan today. Demonstrating how negative images of religion are produced in the mainstream media, in popular culture, and by various groups and people, this book also explores specific case studies such as anti-cult organizations, lawyers, government agencies, intellectuals, and religious organizations. Ian Reader and Clark Chilson argue that popular negative images and perceptions about religion create an 'ecology of dislike', which encourages disassociation from religion and exacerbates problems for religions today. Overall, this book provides a new perspective on religion in contemporary Japan that has implications for our understanding of secularization in the modern world.

1q84 pdf: *Vulnerabilities* Stefania Achella, Chantal Marazia, 2023-10-26 Drawing from a wide array of disciplinary perspectives and geographical contexts, this volume offers new insights for critically engaging with the problem of vulnerability. The essays here contained take the move from the COVID-19 pandemic, in order to explore the inherent vulnerability of individuals, but also of social, economic and political systems, and probe the descriptive and prescriptive import of the concept. Each chapter provides a self-contained perspective on vulnerability, as well as a specific methodological framework for questioning its meaning. Taken together, the chapters combine into a multi-disciplinary toolkit for approaching the various forms and structures of vulnerability, with a special attention to the intersectional factors shaping the individual experience of it: from gender to

age, from disability to mental illness, from hospitalisation to incarceration. The book explores the theoretical richness and complexity of the concept and proposes new analytical approaches to it, before illustrating its multifariousness through empirically grounded case studies. The closing section engages with “the future of vulnerability”, as a hermeneutic, epistemological, and critical-normative perspective to be deployed beyond the domain of global crises and emergencies. The volume is primarily intended as a reference for scholars in the human, social and health sciences. The accessible structure and plain language of the chapters make it also a valuable didactic resource for graduate courses in philosophy, the social sciences and public health.

1q84 pdf: Narrative Space and Time Elana Gomel, 2014-02-18 Space is a central topic in cultural and narrative theory today, although in most cases theory assumes Newtonian absolute space. However, the idea of a universal homogeneous space is now obsolete. Black holes, multiple dimensions, quantum entanglement, and spatio-temporal distortions of relativity have passed into culture at large. This book examines whether narrative can be used to represent these impossible spaces. Impossible topologies abound in ancient mythologies, from the Australian Aborigines’ dream-time to the multiple-layer universe of the Sumerians. More recently, from Alice’s adventures in Wonderland to contemporary science fiction’s obsession with black holes and quantum paradoxes, counter-intuitive spaces are a prominent feature of modern and postmodern narrative. With the rise and popularization of science fiction, the inventiveness and variety of impossible narrative spaces explodes. The author analyses the narrative techniques used to represent such spaces alongside their cultural significance. Each chapter connects narrative deformation of space with historical problematic of time, and demonstrates the cognitive and perceptual primacy of narrative in representing, imagining and apprehending new forms of space and time. This book offers a comprehensive analysis of the connection between narratology, cultural theory, science fiction, and studies of place.

1q84 pdf: Death of the Public University? Susan Wright, Cris Shore, 2017-05-01 Universities have been subjected to continuous government reforms since the 1980s, to make them ‘entrepreneurial’, ‘efficient’ and aligned to the predicted needs and challenges of a global knowledge economy. Under increasing pressure to pursue ‘excellence’ and ‘innovation’, many universities are struggling to maintain their traditional mission to be inclusive, improve social mobility and equality and act as the ‘critic and conscience’ of society. Drawing on a multi-disciplinary research project, University Reform, Globalisation and Europeanisation (URGE), this collection analyses the new landscapes of public universities emerging across Europe and the Asia-Pacific, and the different ways that academics are engaging with them.
