ap world history course and exam description 2023: Teaching Data Literacy in Social Studies Tamara L. Shreiner, 2024 We are surrounded by data and data visualizations in our everyday lives. To help ensure that students can critically evaluate data—and use it to promote social justice—this book outlines principles and practices for teaching data literacy as part of social studies education. The author shows how social studies content and skills can enhance data literacy, and its importance in supporting students' historical thinking and civic engagement. Shreiner also provides a rationale for including data literacy in the social studies curriculum and highlights the special knowledge and skills social studies teachers offer in promoting a critical, humanistic form of data literacy. Recognizing that many social studies teachers feel poorly equipped to teach data literacy, this book offers practical advice, summaries of the benefits and challenges to students, guidance for incorporating data literacy across elementary and secondary grades, and strategies to help students analyze, use, and create data visualizations. "This important book provides many practical suggestions and powerful visual examples built on sound research that will support educators as they continue to find new ways to integrate data literacy in their history, civics, geography, economics, and other social science classrooms and beyond." —Christopher C. Martell, associate professor, University of Massachusetts Boston "Shreiner demonstrates how we use data visualizations to understand and construct arguments about the world around us and provides concrete ideas for how to approach teaching it in social studies classrooms. This book makes teaching data literacy feel relevant, urgent, and—most importantly—doable." —Sarah McGrew, assistant professor, University of Maryland

ap world history course and exam description 2023: Thematic Teaching of Women's Rights Issues with Social Studies Trade Books Jeremiah Clabough, Natalie Keefer, 2023-09-29 This edited volume presents a distinctive approach for exploring pedagogical frameworks, methods, and strategies for teaching thematically about women's rights using social studies trade books. After an introductory chapter by Jeremiah Clabough that provides a compelling rationale for thematic teaching of women's rights issues and controversial topics, Natalie Keefer and Tori Flint situate the remaining chapters within the context of theory and research on women's rights issues and include a discussion of implications and considerations for the role multiple literacies have in advancing women's rights in North America and beyond. In subsequent chapters, a diverse assemblage of respected scholars within the field of social studies education introduce important women who advanced women's human rights in the United States, paired with a notable trade book about their life, challenges, and achievements. Then, chapter authors describe student-centered pedagogies, with inquiry-based pedagogies aligned with the NCSS C3 Framework, that teachers can implement with upper elementary and middle school students to seamlessly integrate literacy and social studies for the purpose of thematically teaching about women's rights.
