The area’s rugged, steep terrain and thick forests made it a natural hiding spot for local insurgents and international terrorists alike, and it came to represent both the valor and futility of America’s two-decade-long Afghan war. Drawing on reporting trips, hundreds of interviews, and documentary research, Wesley Morgan reveals the history of the war in this iconic region, captures the culture and reality of the conflict through both American and Afghan eyes, and reports on the snowballing missteps—some kept secret from even the troops fighting there—that doomed the American mission. The Hardest Place is the story of one of the twenty-first century’s most unforgiving battlefields and a portrait of the American military that fought there.

men and women were deployed in Iraq. For seven years, they fought ferociously in the blistering sands in the Land Between the Two Rivers. Some fought for pride or survival, some to bring democracy to a forsaken land that has known only tyranny and strife. Scores of books have been published about the war, most criticizing the strategies and execution. Some have been personal memoirs capturing the heroism and sacrifice. Here U.S. Army LTC Darron Wright, a proven combat leader, joins forces with author Mike Walling to lift the veil on the Iraq War, revealing the build-up of troops; the equipping, training, and planning; the capture of Saddam Hussein; the formation of the new Government; and the last patrol. Shelton chronicles his incredible journey from a small farming community in North Carolina to the highest level of American military and political power at the Pentagon and White House. As one of the nation's elite Special Forces soldiers, Shelton served twice in Vietnam, commanding a Green Beret unit and then an airborne infantry company. He was awarded a Bronze Star for valor and a Purple Heart for a wound suffered when a booby trap drove a poisoned stake through his leg. Shelton rose up the ranks and was assistant division commander of the 101st Airborne Division as they invaded Iraq in the Persian Gulf War, then led the 20,000 American troops tasked with restoring Haiti's deposed President, Jean-Bertrand Aristide, to power. Promoted to 4-star General, he became Commander in Chief of U.S. Special Operations Command (including Delta Force, Navy SEALs and other top secret Special Mission Units).

Think again. In *American Coup*, William Arkin reveals the desk-bound takeover of the highest reaches of government by a coterie of grey men of the national security establishment. Operating between the lines of the Constitution, this powerful and unelected group fights to save the nation from terror and weapons of mass destruction while at the same time modifying and undermining the very essence of the country. Many books are written about secrecy, surveillance, and government law-breaking; none so powerfully expose the truth of everyday life in this state of war.

army convoy operations powerpoint: *At War with Women* Jennifer Greenburg, 2023-02-15 *At War with Women* reveals how post-9/11 politics of gender and development have transformed US military power. In the mid-2000s, the US military used development as a weapon as it revived counterinsurgency in Iraq and Afghanistan. The military assembled all-female teams to reach households and wage war through development projects in the battle for hearts and minds. Despite women technically being banned from ground combat units, the all-female teams were drawn into combat nonetheless. Based on ethnographic fieldwork observing military trainings, this book challenges liberal feminist narratives that justified the Afghanistan War in the name of women's rights and celebrated women's integration into combat as a victory for gender equality. Jennifer Greenburg critically interrogates a new imperial feminism and its central role in securing US hegemony. Women's incorporation into combat through emotional labor has reinforced gender stereotypes, with counterinsurgency framing female soldiers as global ambassadors for women's rights. This book provides an analysis of US imperialism that keeps the present in tension with the

past, clarifying where colonial ideologies of race, gender, and sexuality have resurfaced and how they are changing today.

army convoy operations powerpoint: US Defense Politics Harvey M. Sapolsky, Associate Professor of Political Science University of Notre Dame Eugene Gholz, Eugene Gholz, Caitlin Talmadge, 2008-08-06 This new textbook seeks to explain how US defense and national security policy is formulated and conducted. The focus is on the role of the President, Congress, political partisans, defense industries, lobbies, science, the media, and interest groups, including the military itself, in shaping policies. It examines the following key themes: US grand strategy; who joins America's military; how and why weapons are bought; the management of defense; public attitudes toward the military and casualties; the roles of the President and the Congress in controlling the military; the effects of 9/11 on security policy, homeland security, government reorganizations, and intra- and inter-service relations. The book shows how political and organizational interests determine US defense policy, and warns against the introduction of centralising reforms. In emphasizing the process of defense policy-making, rather than just the outcomes of that process, this book signals a departure from the style of many existing textbooks.
