california id template 2022: *American Higher Education* Christopher Roellke, Jennifer King Rice, 2022-03-01 This series provides a scholarly forum for interdisciplinary research on the financing of public, private, and higher education in the United States and abroad. The series is committed to disseminating high quality empirical studies, policy analyses, and literature reviews on contemporary issues in fiscal policy and practice. Each themed volume is intended for a diversity of readers, including academic researchers, students, policy makers, and school practitioners. The first volume in the series, *Fiscal Policy in Urban Education*, addressed the continuing challenge of large, complex urban school systems to operate both equitably and efficiently. Guest edited by Faith Crampton and David Thompson, the second volume in our series, *Saving America's School Infrastructure*, examined the relationship between the physical environment of schools and student achievement. The third volume, *High Stakes Accountability in Education: Implications for Resources and Capacity*, compiled a diversity of research studies focused local, state and national efforts to respond to the reauthorization of the federal Elementary and Secondary Education Act, commonly referred to as No Child Left Behind (NCLB). In this fourth volume, attention is turned to both theoretical and pragmatic concerns in American higher education. During the final stages of the preparation of this manuscript, our schools, colleges, and universities have been confronted with what can be referred to as a "once in a century" set of challenges. As the global COVID 19 pandemic penetrated the United States in early 2020, colleges and universities have scrambled to address this ongoing public health crisis. Emergency task forces were established, campuses were shut down, faculty moved their instruction to virtual formats, and the entire higher education industry braced itself for the financial fallout. In addition to having to invest additional resources in classroom technology, ventilation, and personal protective equipment, colleges and universities continue to respond to revenue shortfalls, including reductions in both tuition and room and board revenue. This financial landscape requires judicious policy-making and research informed practice. With this in mind, contributing authors were asked to pay specific attention to contemporary challenges and opportunities during a pivotal period in America's colleges and universities. The contributing authors were asked to think of policymakers and practitioners at local, state, and national levels as the intended audiences for their work. Our contributors responded with a collection of studies examining the impact of federal and state policymaking on higher education finance and on specified educational outcomes and practices. Throughout the volume, particular attention is paid to issues of

equity and adequacy in American higher education, including the deployment of incentives and structures that support the access and achievement of traditionally underrepresented students.

california id template 2022: Arabella Scott Walter, 2024-04-09 Exposes Arabella Advisors as a major dark money operation that channels billions into progressive causes through opaque networks and deceptive grassroots groups, revealing its significant influence on U.S. politics and its far-reaching impact on issues from Supreme Court nominations to election manipulation. Ever heard of Arabella Advisors? Probably not. And that's strange, since they've done a lot to destroy the world you grew up in. You should know, so read this book. —Tucker Carlson While billionaires like George Soros, Bill Gates, and Warren Buffett are well known as left-wing megadonors transforming the country's politics, few Americans know about Arabella Advisors, a "dark money" operation that channels much of this money into particular causes via pop-up groups designed to look like grassroots outfits. Citizens across the spectrum will be shocked to learn how Arabella's empire secretly operates using arrangements that produce the darkest of "dark money." Thanks to the author and his colleagues at the Capital Research Center, which first exposed Arabella, even the mainstream press have begun to report on this scandalous story. As this book reveals, Arabella is a major player in battles over Supreme Court nominations, environmentalism, abortion, Medicare for All, fake local news outlets, "Zuck Bucks" that manipulate election offices, lawsuits brought by Democratic super-lawyer (and Steele dossier booster) Marc Elias, and much more. The money is staggering. In the 2018 election cycle, Arabella's nonprofits took in \$1.2 billion, more than double the fundraising of the Democratic National Committee and the Republican National Committee combined. In the 2020 election cycle, Arabella's fundraising spiked to \$2.4 billion. This mountain of money explains why the left-leaning major media are alarmed. Arabella is "the indisputable heavyweight of Democratic dark money," warns the Atlantic. A "dark-money behemoth," says Politico. An "opaque network," says the New York Times, that funnels "hundreds of millions of dollars through a daisy chain of groups supporting Democrats and progressive causes."

california id template 2022: Evolution of SARS-CoV-2: impact of variants on hosts, COVID-19 vaccines and countermeasures Seshadri Vasan, Martin H. Groschup, Sharon M. Brookes, Hang Xie, 2024-02-20 The 'novel coronavirus disease' (COVID-19) has caused significant global morbidity, mortality and economic damage on a scale similar to the influenza pandemic of 1918. The causative 'severe acute respiratory syndrome virus 2' (SARS-CoV-2) is a RNA virus which is evolving rapidly, accumulating mutations, and existing as a cloud of variants with quasispecies diversity. We have tens of thousands of variants, of which currently two are 'variants of interest' (Lambda, Mu) and another four 'variants of concern' (Alpha, Beta, Gamma, Delta, Omicron) to the World Health Organization (WHO). Variants of interest often emerge as variants under investigation in one or more countries, as seen with the Omicron (initially denoted as Nu in South Africa). They become variants of concern when there is evidence of increased transmissibility, greater case severity, loss of neutralization by antibodies, and reduced effectiveness of countermeasures. Some SARS-CoV-2 variants can infect new hosts (for instance, the Alpha, Beta and Gamma variants of concern can infect wild type mice which is a species that cannot be vaccinated or controlled easily), and/or reduce the effectiveness of vaccines and therapies (especially Beta and Delta); diagnostic tests have also been reported to be affected. Currently, we do not yet have any 'variant of high consequence' with confirmed attributes such as widespread diagnostic test failures, significant reduction in the effectiveness of vaccines and/or therapies, with greater disease severity and deaths. It remains to be seen if Omicron would be the first to be declared by the WHO as a variant of high consequence; more variants of concern are also likely to be declared by the WHO over the next couple of years. Therefore, our ability to control and conquer this pandemic over the long run is dependent on predicting and keeping up with the evolution of this virus, its new hosts, as well as understanding and mitigating its impact on diagnostics, vaccines and therapies.

california id template 2022: Diverse Leadership Perspectives in Education: From K-12 to Higher Education Soles, Brooke, Meyerott, Theresa, 2025-05-22 Diverse leadership in education is crucial for fostering inclusive and equitable learning environments across all levels of the education system. From K-12 schools to higher education institutions, leadership plays a pivotal role in shaping policies, curriculum, and school culture. Embracing diversity in leadership enhances the overall educational experience by ensuring that all voices are heard and valued, and it allows

underdeveloped voices to be heard. Allowing diverse voices in leadership is essential for addressing systemic inequalities, while also promoting innovation, and preparing students for a globalized world where diverse perspectives are key to success. Exploring diverse leadership across educational levels provides insight into how these varied perspectives can positively impact both institutional practices and student outcomes. *Diverse Leadership Perspectives in Education: From K-12 to Higher Education* provides an overview of leadership's evolving purpose and scope, containing research, practical strategies, and examples of complex problems in the educational system and how having a diverse voice in leadership can help solve these problems. It explores the assets of diversity, multiple perspectives, and the role of students in the educational landscape. This book covers topics such as educational technology, gender and diversity, and information science, and is a useful resource for educators, sociologists, academicians, and researchers.
