eoc us history 2023: The Educator's Guide to Texas School Law Jim Walsh, Sarah Orman, 2022-09-13 Much has changed in the area of school law since the first edition of The Educator's Guide to Texas School Law was published in 1986. This new tenth edition of The Educator's Guide offers an authoritative source on Texas school law through the 2021 legislative sessions. Intended for educators, school board members, attorneys, and taxpayers, it explains what the law is and what the implications are for effective school operations; it helps professional educators avoid expensive and time-consuming lawsuits by taking effective preventive action; and it serves as a highly valuable

resource for school law courses and staff development sessions. The tenth edition begins with a review of the legal structure of the Texas school system, incorporating recent features such as charter schools and districts of innovation, then addresses the instructional program, service to students with special needs, the rights of public school employees, the role of religion, student discipline, governmental transparency, privacy, parental rights, and the parameters of legal liability for schools and school personnel. The book includes discussion of major federal legislation, such as the Individuals with Disabilities Education Act, the Family Educational Rights and Privacy Act, Section 504 of the Rehabilitation Act of 1973, and Title IX. On the state level, the book incorporates laws pertaining to cyberbullying, inappropriate relationships between students and employees, and human sexuality instruction.

eoc us history 2023: Cases on Enhancing P-16 Student Engagement With Digital Technologies Gierhart, Aaron R., 2024-12-27 Reimagining how digital technologies are integrated into education is crucial for fostering active and meaningful student engagement. Traditional, knowledge-centric approaches often overlook the dynamic processes students use to interact with and apply technology in their learning. By focusing on how students actively engage with digital tools to meet academic and developmental goals, educators can create richer, more effective learning experiences. This shift not only enhances academic outcomes but also prepares students with the critical skills needed to navigate and contribute to an increasingly digital world. Cases on Enhancing P-16 Student Engagement With Digital Technologies features cases of teaching and learning with digital technologies in P-16 educational settings, focusing specifically on what learners do with technology. It shares cases of teaching in which technologies are leveraged in student-centered ways that transform learning and allow students to engage in authentic, meaningful learning experiences. Covering topics such as artificial intelligence (AI), immersive learning experiences, and traditional learning, this book is an excellent resource for P-16 educators, leaders, stakeholders, policymakers, and more.

Resilla, 2023-09-07 Emergent Bilinguals, formerly known as English Language Learners, are one of the fastest growing subgroups in the United States. Their educational needs are not well met by the educational system. In this book, we report results of empirical, multiyear studies about their reading and mathematics performance, both at the elementary school and high school levels. Given that state education agencies collect enormous amounts of information that are typically not well analyzed, this book serves as an exemplar of secondary data analyses. Educational leaders, educational researchers, and legislators and policymakers, will find the chapters in this book useful. Findings from these statewide analyses can provide readers with baselines of the performance of Emergent Bilingual students, prior to the Covid-19 pandemic, in reading and in mathematics. Changes in instructional practices and in educational programming could be made based upon the numerous statistical results present in this book.

St. John, 2024-11-15 Public Policy and Higher Education, third edition, provides readers with the tools to examine how policies affect students' access and success in college. Rather than arguing for a single approach, the authors use research-based evidence and consider political and historical values and beliefs to examine how policymakers and higher education administrators can inform and influence change within systems of higher education. Raising new questions and examining recent

developments, this fully updated edition is an invaluable resource for graduate students, administrators, policymakers, and researchers who seek to learn more about the crucial contexts underlying policy decisions and college access. This third edition includes updates across the board to reflect current policy contexts. Expanded historical frameworks allow readers to better understand the preparation, access, persistence, and the development of state education systems. New considerations of state and national political ideologies help to inform contemporary contexts. Finally, refreshed cases, including an additional case about Florida and updated cases for California, Minnesota, Indiana, and North Carolina, equip readers with new ways to analyze complex state policies and their impact on higher education. Special Features: Case Studies help readers to build their skills in analyzing how political values, beliefs, and traditions influence policy decisions and adaptations within state systems. Reflective Questions encourage readers to discuss state and campus contexts for policy decisions and to consider the strategies used in a state or institution. Approachable Explanations unpack complex public policies and financial strategies for readers who seek an understanding of public policy in higher education. Research-Based Recommendations explore how policymakers, higher education administrators, and faculty can work together to improve quality, diversity, and financial stewardship.

eoc us history 2023: The Jurisdiction of the International Criminal Court Victor Tsilonis, 2024-02-24 This book embarks on a comprehensive exploration of the jurisdiction of the International Criminal Court (ICC) and elucidates the three foundational aspects of its jurisdiction as laid out in the Rome Statute: the preconditions for exercising jurisdiction (Article 12 ICCRSt), its substantive competence regarding core crimes (Articles 5-8bis ICCRSt), and the principle of complementarity (Article 17§1(a) ICCRSt). This principle, crucial to understanding the ICC's 'ultimate jurisdiction', is invoked only when a State Party demonstrates an inability or unwillingness to genuinely undertake investigation or prosecution. The book further probes the 'negative preconditions' of the Court's jurisdiction, in particular, immunities (Article 27 ICCRSt) and exceptions through Security Council referrals (Articles 13(b) and 15 ICCRSt). Intended for students, scholars, and practitioners alike, this second edition offers invaluable insights into the ICC's jurisdiction, making a notable contribution to the existing literature. Importantly, it also navigates emerging fields of international criminal law, addressing topical and thought-provoking subjects such as ecocide, cyber warfare, automated lethal weapons, artificial intelligence, and the legal complexities arising from the Russian invasion of Ukraine. Winner of the Second International Science Prize 2024 of the Hans Günter Brauch Foundation for Peace and Ecology in the Anthropocene (HGBS) on the Theme: Ecocide: Impacts of Wars and/or Climate Change on Food Security Since 1945.

eoc us history 2023: Research and Discussions in Critical Discourses and Remedies in Global Health Education Ashti A. Doobay-Persaud, Tracy L. Rabin, Tomlin Paul, Jessica Evert, Benedicta Ayiedu Mensah, 2024-10-01 Global Health, a field of study, research and practice defined in 2009 with precursors in international health and development, is currently reckoning with itself. The field has well-intended goals emphasizing collaboration and dialogue between population health, public health, clinical care, and other disciplines to address socioeconomic determinants of health, and employing interdisciplinary approaches to address health inequities wherever they exist. Despite these lofty ideals, there are concerns that the field itself has historically served to reinforce rather than deconstruct colonialism and power imbalances. At this point in time, the field has evolved toward a vision of a community of practice between institutions across the income spectrum (HIC, LMIC, LIC) working in bidirectional and multidirectional ways to develop staff, staff, space, systems and strategies to eliminate health disparities. However, with deeply rooted colonial assumptions, racism, elitism, and other forms of bias underlying institutions and individuals, initiatives operating under the auspices of Global Health are all too often antithetical to the pursuit itself.

Past failures and terrorist attacks on such transportation systems, in the U.S. and abroad, have demonstrated such systems' vulnerability, the consequences of any potential damage and disruption, as well as the substantial impacts on people, property, and the economy. Now, more than ever, it has become imperative for public transit and transportation systems, as well as the many private businesses operating in these sectors, to develop comprehensive security programs. This includes accounting for both natural and man-made hazards—and safeguarding people, places, and equipment—while at the same time ensuring operations continuity. The book covers all transportation critical infrastructure—their modes and their interconnectivity—including highway, air, freight and passenger rail, transit, maritime, and pipeline security. Chapters provide learning objectives, key words, and discussion questions pedagogical elements as well as several case studies to facilitate a practical understanding of the concepts presented. New to this edition is a chapter dedicated to gas and oil pipelines as well as an increased focus throughout of recent cyberattacks, to emphasize the need for physical and cybersecurity integration. *Introduction to Transportation Security, Second Edition* serves as a comprehensive, practical overview for students in transportation management, homeland security, and emergency management programs as well as an up-to-date reference for professionals charged with safeguarding the movement of assets within our interconnected transportation network.

eoc us history 2023: The Windfall Battleships Aidan Dodson, 2023-11-30 This new book explores for the first time the full story of how two Turkish and two Chilean battleships became British capital ships after the outbreak of the First World War. Under construction by the shipbuilding giants of Armstrong and Vickers in August 1914, Sultan Osman I, Reşadiye, Almirante Latorre and Almirante Cochrane became HM Ships Agincourt, Erin, Canada and Eagle. The first three served with the Grand Fleet, fighting at Jutland, while the last was transformed into a pioneering aircraft carrier, which would serve with distinction until sunk while escorting a convoy to Malta in 1942. While two of the other ships had short lives - cut short by the Washington Naval Treaty - the final ship, Almirante Latorre, would be returned to Chile after the war, for a continuing active career that would last into the 1950s. When finally towed away for scrap in 1959, she was the

penultimate survivor of Jutland. Drawing on extensive archival research, the book begins with an overview of the warships under construction around Europe for foreign customers in August 1914, and how the four ships featured were acquired by the Royal Navy. It then looks at them as manifestations of the international rivalries which directed much of the national budgets of impecunious South American and Balkan states towards armaments. The focus then switches to the British service of the ships actually completed as battleships, and then to the story of the carrier. Although never finished as a battleship, she would play a crucial role in the development of British carrier aviation. Finally, the author traces the stories of the battleships of the Latin-American naval race from the 1920s down to the 1950s. The stories and back-stories of Agincourt, Erin, Canada and Eagle embrace almost the whole of the twentieth-century battleship era, and they take us down the byways of international naval power, ranging from the Pacific to the Black Sea, and from the line of battle to mutiny and revolution. A fascinating and original story.

eoc us history 2023: Race and Rurality Tyler Hallmark, Sonja Ardoin, Darris R. Means, 2023-11-02 This book offers context, research, policy, and practice-based recommendations centering college access and success for a historically overlooked population: rural Students and Communities of Color. Through an exploration of how colleges and universities can effectively welcome students from rural areas who identify as Asian and Pacific Islander, Black and African American, Hispanic and Latinx, and/or Indigenous, this text challenges the misleading narrative that rural is white, thereby placing these students and their communities in conversation with national higher education discourse. Rich contributions on scholarship, practice, and policy address the intersection of racism and spatial inequities and consider the unique opportunities and challenges that rural Students and Communities of Color face across the United States' higher education landscape. Chapters provide direction on creating equitable policies and practices, as well as details of the assets, resources, and networks that support this population's success. This edited collection provides a wealth of insight into the recruitment, access, persistence, and retention of rural Students of Color, equipping higher education researchers, practitioners, administrators, and policymakers with the knowledge they need to better account for and support rural students and communities across race and ethnicity.
