everythings an argument 9th edition pdf: Teaching Writing in the Age of Catastrophic Climate Change Justin Everett, Russell Mayo, 2024-11-25 Catastrophic storms, searing heat waves, crumbling waterfronts, warming oceans, air-fouling forest fires and mass extinction have become facts of life. Under these conditions, it is difficult to imagine that the global industrial civilization will continue in its present form. This requires us to reconsider the subject of ecocomposition from a new perspective: "What does it mean to teach college writing in the face of this sobering reality?" The introduction reviews the history of ecocomposition and reframes it in light of the apocalyptic turn in climate discourse over the last quarter century as well as the role that ecocomposition theory can play in framing these discussions. Teaching Writing in the Age of Catastrophic Climate Change is organized into four sections. The first section considers the environmental narrative from the viewpoint of climate justice, while the second reframes pedagogies of place in light of the climate catastrophe. The third section examines the intersections of writing studies and the natural sciences, while the fourth section entertains the personal and emotional dimensions of teaching ecocomposition within the framework of catastrophic climate change. If we have been successful, these chapters provide a starting place for having sobering discussions in our classrooms, and considering what ecocomposition means in this unsettling age.

Topics include reading and writing through the lens of information literacy, curriculum design, specific writing tasks, transfer, and assessment.

everything's an argument 9th edition pdf: Evidence, Politics, and Education Policy Lorraine

M. McDonnell, M. Stephen Weatherford, 2021-02-01 In Evidence, Politics, and Education Policy, political scientists Lorraine M. McDonnell and M. Stephen Weatherford provide an original analysis of evidence use in education policymaking to help scholars and advocates shape policy more effectively. The book shows how multiple types of evidence are combined as elected officials and their staffs work with researchers, advocates, policy entrepreneurs, and intermediary organizations to develop, create, and implement education policies. Evidence, Politics, and Education Policy offers an in-depth understanding of the political environment in which evidence is solicited and used. Two key case studies inform the book's findings. The primary case—a major, multimethod study—examines the development and early implementation of the Common Core State Standards at the national level and in four states: California, Indiana, Massachusetts, and Tennessee. A comparative case analyzes the evidence used in Congressional hearings over the twenty-year history of the Children's Health Insurance Program. Together, the two cases illustrate the conditions under which different types of evidence are used and, in particular, how federalism, the complexity of the policy problem, and the policy's maturity shape evidence use. McDonnell and Weatherford focus on three leverage points for strengthening the use of research evidence in education policy: integrating research findings with value-based policy ideas; designing policies with incentives for research use built into their rules and organizational structures; and training policy analysts to promote the use of research in policymaking venues.

everything's an argument 9th edition pdf: Business Ethics, Seventh Edition Joseph W.

Weiss, 2021-11-23 The seventh edition of this pragmatic guide to determining right and wrong in the workplace is updated with new case studies, exercises, and ancillary materials. Joseph Weiss's Business Ethics is a pragmatic, hands-on guide for determining right and wrong in the business world. To be socially responsible and ethical, Weiss maintains, businesses must acknowledge the impact their decisions can have on the world beyond their walls. An advantage of the book is the integration of a stakeholder perspective with an issues and crisis management approach so students can look at how a business's actions affect not just share price and profit but the well-being of employees, customers, suppliers, the local community, the larger society, other nations, and the

environment. Weiss includes twenty-three cases that immerse students directly in contemporary ethical dilemmas. Eight new cases in this edition include Facebook's (mis)use of customer data, the impact of COVID-19 on higher education, the opioid epidemic, the rise of Uber, the rapid growth of AI, safety concerns over the Boeing 737, the Wells Fargo false saving accounts scandal, and plastics being dumped into the ocean. Several chapters feature a unique point/counterpoint exercise that challenges students to argue both sides of a heated ethical issue. This edition has eleven new point/counterpoint exercises, addressing questions like, Should tech giants be broken apart? What is the line between free speech and dangerous disinformation? Has the Me Too movement gone too far? As with previous editions, the seventh edition features a complete set of ancillary materials for instructors: teaching guides, test banks, and PowerPoint presentations.

everything's an argument 9th edition pdf: No Way Home Wayne Winegarden, Joseph Tartakovsky, Kerry Jackson, Christopher F. Rufo, 2021-03-16 In San Diego, not far from the gates of the fantasy world of Disneyland, tent cities lining the freeways remind us of an ugly reality. Homeless individuals are slowing rail traffic between Sacramento and the Bay Area and swarming subway trains in Los Angeles in search of a place to sleep when they're not languishing on Skid Row. Drug use among the homeless is plaguing communities, with discarded needles threatening children playing at public parks. And every day across California, thousands of homeless youth who lack safe and stable housing struggle to stay in school, to perform well academically, and to form meaningful connections with their teachers and peers. Since the 1980s, countless research studies have been published on the topic of homelessness in America. Too often, however, social science research on homelessness is narrow in scope, mired in politics, and reliant on questionable assumptions about the root causes of the problem. The severity of the homeless crises afflicting cities requires innovative solutions backed by credible data and objective research. This book examines the causes of homelessness with a focus on unaffordable housing, poverty, mental illness, substance addiction, and legal reform. It examines the state and local policy environment to determine ways in which housing policy, social service programs, and employment opportunities interact to exacerbate, perpetuate, or reduce homelessness. The book also evaluates different strategies being used at the state, county, and local levels to prevent or reduce homelessness. Finally, the authors provide a mix of long-term policy solutions based on their findings that have the greatest potential to reduce homelessness.
