mouloud mammeri: Anthropology, Colonial Policy and the Decline of French Empire in Africa

Douglas W. Leonard, 2019-12-26 Conceived as both a vehicle to national prestige and as a civilizing mission, the second French colonial empire (1830-1962) challenged soldiers, scholars, and administrators to understand societies radically different from their own. The resultant networks of anthropological inquiry, however, did not have this effect. Rather, they opened pathways to political and intellectual independence framed in the language of social science, and in the process upended the colonial political system and reshaped the nature of human inquiry in France. While still unequal, French colonial rule in Africa revealed the durability and strength of non-European modes of thought. In this influential new study, historian Douglas W. Leonard examines the political and intellectual repercussions of French efforts to understand and to dominate colonial Africa through the use of anthropology. From General Louis Faidherbe in the 1840s to politician Jacques Soustelle and sociologist Pierre Bourdieu in the 1950s, these French thinkers sowed the seeds of colonial destruction.

mouloud mammeri: *Occidentalism* Smail Salhi Zahia Smail Salhi, 2019-06-12 Maghrebi literature published in the first half of the twentieth century is a subject that seldom receives focused scholarly treatment. This is partly due to limited availability of the books, some of which were printed in as few as fifty copies. Zahia Smail Salhi tracked down these rare works and put them in the spotlight for the first time here. Through close textual analysis and in-depth engagement with religious and socio-political contexts, Smail Salhi determines whether these texts belong to a collective formation we may call 'Occidentalism'. In so doing, this book reintegrates the pre-1945 Maghrebi novels into the history and study of modern Arabic literature.

mouloud mammeri: Modeling and Control of Static Converters for Hybrid Storage Systems Fekik, Arezki, Benamrouche, Nacereddine, 2021-09-17 The energy transition initiated in recent years has enabled the growing integration of renewable production into the energy mix. Microgrids make it possible to maximize the efficiency of energy transmission from source to consumer by bringing the latter together geographically and by reducing losses linked to transport. However, the lack of inertia and the micro-grid support system makes it weak, and energy storage is necessary to ensure its proper functioning. Current storage technologies do not make it possible to provide both a large capacity of energy and power at the same time. Hybrid storage is a solution that combines the advantages of several technologies and reduces their disadvantages. Modeling and Control of Static Converters for Hybrid Storage Systems covers the modeling, control theorems, and optimization techniques that solve many scientific problems for researchers in the field of power converter control for renewable energy hybrid storage and places particular emphasis on the modeling and control of static converters for hybrid storage systems. Covering topics ranging from energy storage to power generation, this book is ideal for automation engineers, electrical engineers, mechanical engineers, professionals, scientists, academicians, master's and doctoral students, and researchers in the disciplines of electrical and mechanical engineering.

The contributions here represent current forward-looking research in the field of cognitive linguistics and education. To date, there has been a sharp need for innovative research that examines the interrelationship between cognition and the process of language learning. This volume responds to this requirement, bringing together researchers interested in this research area to discuss their contributions, and to open debates about the role played by cognition in language learning. The book will appeal to master's and doctoral students, teachers, educational practitioners, and researchers interested in research into the interaction between cognition and language learning.

mouloud mammeri: We Are Imazighen Fazia Aïtel, 2014-11-04 To the world they are known as Berbers, but they prefer to call themselves Imazighen, or “free people.” The claim to this unique cultural identity has been felt most acutely in Algeria in the Kabylia region, where an Amazigh consciousness gradually emerged after WWII. This is a valuable model for other Amazigh movements in North Africa, where the existence of an Amazigh language and culture is denied or dismissed in countries such as Morocco, Algeria, Tunisia, and Libya. By tracing the cultural production of the Kabyle people—their songs, oral traditions, and literature—from the early 1930s to the end of the twentieth century, Fazia Aïtel shows how they have defined their own culture over time, both within Algeria and in its diaspora. She analyzes the role of Amazigh identity in the works of novelists such as Mouloud Feraoun, Tahar Djaout, and Assia Djebar, and she investigates the intersection of Amazigh consciousness and the Beur movement in France. She also addresses the political and social role of the Kabyles in Algeria and in France, where after independence it was easier for the Berber community to express and organize itself. Ultimately, Aïtel argues that the Amazigh literary tradition is founded on dual priorities: the desire to foster a genuine dialogue while retaining a unique culture.

mouloud mammeri: Algerian Sketches Pierre Bourdieu, 2013-11-04 In the late 1950s, like tens of thousands of young men of his generation, Pierre Bourdieu, having recently passed the agrégation in philosophy, found himself immersed in the Algerian war. Motivated by an impulse that, as he himself says, ‘was civic rather than political’, nothing seemed more important to him than to understand the Algerian situation and provide the elements that would enable others to come to an informed judgement about it. In extremely tough conditions and along with a small group of students, Bourdieu undertook a series of studies across an Algeria that was tightly patrolled by the army, leading him to discover the shocking reality of the resettlement camps and to analyse the mechanisms of destruction of Algerian society of which they were emblematic. To achieve the objectives he had set himself, Bourdieu had to carry out a genuine intellectual conversion, acquiring an ethnographic understanding of Algerian society, learning sociological analysis at a breakneck pace and inventing new instruments - both theoretical and empirical - that would enable him to understand the relations of domination specific to colonialism. These new tools also enabled him to analyse the nature of the crisis that the war had both produced and manifested. This unique volume brings together the first texts written by Bourdieu in the midst of the Algerian conflict, as well as later writings and interviews in which he returns to the topic of Algeria and the decisive role it played in the development of his work.

mouloud mammeri: The Undergraduate's Companion to African Writers and Their Web Sites Miriam E. Conteh-Morgan, 2005-10-30 Now a firmly established part of world literature course offerings in many general education curricula, African literature is no longer housed exclusively with African Studies programs, and is often studied in English, French, Portuguese, Women's Studies, and Comparative Studies departments. This book helps fill the great need for research materials on this topic, presenting the best resources available for 300 African writers. These writers have been carefully selected to include both well-known writers and those less commonly studied yet highly

influential. They are drawn from both the Sub-Sahara and the Maghreb, the major geographical regions of Africa. The study of Africa was introduced into the curriculum of institutions of higher learning in the United States in the 1960s, when the Black Consciousness movement in the United States and the Cold War and decolonization movements in Africa created a need for the systematic study of other regions of the world. Between 1986 and 1991, three Africans won Nobel literature prizes: Soyinka, Mahfouz, and Gordimer, and the visibility of African writers increased. They are now a firmly established part of world literature courses in many general education curricula throughout North America. *African Writers* is meant to serve as a resource for introductory material on 300 writers from 39 countries. These writers were selected on the basis on two criteria: that there is material on them in an easily available reference work; and that there is some information of research value on free Web sites. Each writer is from the late-19th or 20th century, with the notable exception of Olaudah Equiano, an 18th-century African whose slave narrative is generally considered the first work of African literature. All entries are annotated.

mouloud mammeri: Chewing Over the West , 2009-01-01 The orientation of academic institutions has in recent years been moving away from highly specialized area studies in the classical sense towards broader regional and comparative studies. Cultural studies points to the limitation of Western approaches to non-Western cultures – a development not yet reflected in actual research and data collections. Bringing together scholars from all over the world with specialized knowledge in both Western and non-Western languages, literatures, and cultures, this collection of essays provides new insights into the agency of non-Western literatures in relation to the West – a term used with critical caution and, like other common binary dualisms, challenged here. Inter-cultural expertise, seldom applied in the combination of Asian, African, and ‘oriental’ perspectives, makes this compilation of essays an important contribution to the study of colonialism and postcoloniality. Topics covered include postcolonial Arabic writing; T.S. Eliot in contemporary Arabic poetry; Algerian (and Berber) literature; the English language and narratives in Kenyan art; characterization, dialogism, gender and Western influence in modern Hindi fiction; Naya drama in India; modern Burmese theatre and literature under Western influence; Remarque’s *All Quiet on the Western Front* and the Vietnamese Novel *Without a Name*; Western Marxism and vernacular literature in colonial Indonesia; hybridity in *Komedi Stambul*; and *Sherlock Holmes in/and the crime fiction of Siam and Indonesia* Contributors: Amina Azza Bekkat; Thomas de Bruijn; Matthew Isaac Cohen; Rasheed El-Enany; Keith Foulcher; Saddik M. mouloud mammeri: The Algerian Novel and Colonial Discourse Abdelkader Aoudjit, 2010 During the last fifty years, Mouloud Feraoun, Mohammed Dib, Mouloud Mammeri, and Kateb Yacine achieved significant international recognition yet remain little known in the United States. Filling a pressing need, The Algerian Novel and Colonial Discourse provides a critical introduction and a new approach to the works of these Algerian novelists. Beginning with an overview of their novels, this book goes on to discuss critical approaches to them, challenging the widely held notion that they are merely ethnographic, upholding the status quo. The Algerian Novel and Colonial Discourse provides a new reading, and, most significantly, argues that they are best read as witnesses to the kind of conflict Jean-François Lyotard calls a *différend* - a conflict in which one suffers an injustice and is at the same time deprived of the means to argue. The Algerian Novel and Colonial Discourse then examines the issue of humanism that the novels allegedly both appeal to and reject and demonstrates that the Algerian authors' condemnation of colonialism is both a coherent political position and consistent with their critique of liberal humanism. It concludes with a discussion on the

ongoing relevance of the Algerian novels. The Algerian Novel and Colonial Discourse includes a glossary and a short history of modern Algeria to provide readers with the political and cultural contexts they need to understand its literature. This combination of innovative theoretical approach and political context makes this book of utmost importance for students of Francophone literature and for literary critics interested in colonialism, postcolonialism, and Lyotard's philosophy.
