u s history eoc practice: Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government, states have increasingly turned to indicators based on student test scores to evaluate teachers and schools, as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests, such as in mathematics or English/language arts with a focus on grades 4-8. Teachers in these subject areas, however, constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas, with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end-of-course tests, as well as alternative measures such as portfolios, exhibitions, and student learning objectives. In each case, issues related to design and development, psychometric considerations, and validity challenges are covered from both a generic and a content-specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research-based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field. u s history eoc practice: Critical Perspectives on Social Justice in Speech-Language Pathology

Horton, RaMonda, 2021-06-25 There is very little discussion of socially just approaches to speech-language pathology. Within other fields of clinically-oriented practice, social justice is a topic that has received a great deal of attention within the last few years. Pedagogy for addressing social justice has been developed in other disciplines. The field of communication disorders has failed to move forward and do the same. Discussion of social justice is important given the current sociopolitical climate and landscape that clients carry out in their day-to-day functioning. Speech-language pathologists (SLPs) have an opportunity to engage in practices that help address and alleviate some of the injustices that contribute to educational and health disparities experienced by communities of color. They may do this through the development and application of a socially just orientation of culturally competent practice that fosters changes beyond the individual level. Adapting such a framework makes it possible for SLPs to effectively advocate for and foster equity and inclusion for the individuals and broader communities impacted by SLP services. Critical Perspectives on Social Justice in Speech-Language Pathology addresses the socio-political contexts of how the field of speech-language pathology and service delivery can impact policy and debates related to social justice issues. It explores social position factors and the experiences of marginalized communities to explore how speech-language pathologists deliver services, train and prepare

students, and carry out research in communities of color. It covers topic areas including disproportionality in special education, disability rights and ableism, achievement and opportunity gaps, health disparities, and LGBTQ+ rights with a focus on voice, communication, and gender-diverse populations. This book is essential for speech-language pathologists, administrators, practitioners, researchers, academicians, and students interested in how the SLP profession and discipline can contribute to or develop efforts to help address injustices faced by Black, Indigenous, and people of color (BIPOC) communities.

u s history eoc practice: Thinking about Sexual Harassment Margaret A. Crouch, 2001 This illuminating work on one of today's most provocative issues provides all the necessary information for careful, critical thinking about the concept of sexual harassment. Consisting mainly of two parts, it first traces the construction of the concept of sexual harassment from the original public uses of the term to its definitions in the law, in legal cases, and in empirical research. It then analyzes philosophical definitions of sexual harassment and a number of issues that have arisen in the law, including the reasonable woman standard and whether same-sex harassment should be considered sex discrimination. Sure to spark intense discussion, this book explains a complex notion in a lucid and engaging manner appropriate for anyone broadly curious about the notion of sexual harassment.

u s history eoc practice: Structures of Grace John Gallagher, Jeanne Buckeye, 2014-12-01 This is a book about the business practices of a group of companies who are dedicated to changing the world. These companies participate in the Economy of Communion (EOC) project, which is an initiative of the international and ecumenical Focolare movement. For these companies, changing the world means “humanizing” the economy by consistently privileging relationships over profit-maximizing, and by putting profits in common and using them to address acute social needs and concerns. It also means “humanizing” companies and organizations through business practices that respect the inherent dignity of each person, and that are aimed at breaking down barriers between people in business. The book is the product of a rigorous, robust and multi-year research

project involving more than a dozen U.S and Canadian based EOC companies, and should be considered a case study of the EOC rather than a study of any of the individual companies. What, indeed, do we mean by “structures of grace”? First and foremost, the title reflects our conviction that EOC companies are indeed different. And that difference is centered on a conviction of the business as a set of relationships, or more accurately, a community, and the conviction that the purpose of economic activity — the production and distribution of goods and services — is to bring people together, to create community. For us, this is the defining characteristic of the EOC.
