dear benjamin novel pdf: [The CIA Book Club](#) Charlie English, 2025-07-01 "An intriguing and little-known Cold War moment" (The Observer): the astonishing true story of the CIA's secret program to smuggle millions of books through the Iron Curtain "A fascinating account of a world-changing covert operation and a first-rate contribution to the history of the CIA."—Tim Weiner, Pulitzer Prize-winning journalist and author of *Legacy of Ashes* For nearly five decades after the Second World War, the Iron Curtain divided Europe, forming the longest and most heavily guarded border on earth. No physical combat would take place along this frontier: the risk of nuclear annihilation was too high for that. Instead, the war was fought psychologically. It was a battle for hearts, minds, and intellects. Few understood this more clearly than George Minden, head of a covert intelligence operation known as the "CIA book program," which aimed to undermine Soviet censorship and inspire revolt by offering different visions of thought and culture. From its Manhattan headquarters, Minden's "book club" secretly sent ten million banned titles into the East. Volumes were smuggled aboard trucks and yachts, dropped from balloons, hidden aboard trains, and stowed in travelers' luggage. Nowhere were the books welcomed more warmly than in Poland, where the texts would circulate covertly among circles of like-minded readers, quietly making the case against Soviet communism. Such was the demand for Minden's books that dissidents began to reproduce these works in the underground. By the late 1980s, illicit literature was so pervasive in Poland that censorship broke down: the Iron Curtain soon followed. Charlie English narrates this tale of Cold War spycraft, smuggling, and secret printing operations for the first time, highlighting the work of a handful of extraordinary people who fought for intellectual freedom—people like Mirosław Chojecki, who suffered beatings, imprisonment, and exile in pursuit of his clandestine mission. The CIA Book Club is a story about the power of the printed word as a means of resistance and liberation. Books, it shows, can set you free.

Spoerri by his longstanding friend Karl Gerstner during an interview with Katerina Vatsella in 1995. Wherever he went, Spoerri was capable of inspiring others to make art, and at the same time he absorbed, interiorized and transformed ideas from others. His fluctuating memberships during late Modernism (Zero, Nouveau Réalisme, Fluxus, Mail Art) explain why some areas of this work have not yet received their due attention and their connection to the whole picture has often eluded scholarly inquiry. Beyond his tableaux-pièges, which gave him immediate notoriety through an early purchase by the MoMA, Spoerri discovered a new way to approach the multiples in sculpture (Edition MAT), he transformed his trap pictures into an experimental narrative form (Topographie Anécdotée du Hasard), he initiated the Eat Art movement, he tested an innovative curatorial approach (the Musée Sentimental and the Giardino). Despite constant interruptions due to his semi-nomadic lifestyle, this oeuvre presents an extraordinary coherence, where none of these ventures can be properly understood without considering all the others. This is the first monograph entirely devoted to Daniel Spoerri in the United States to date. With an introduction by Barbara Räderscheidt.

Katherine Hayles Award for Criticism of Electronic Literature Digital fiction has long been perceived as an experimental niche of electronic literature. Yet born-digital narratives thrive in mainstream culture, as communities of practice create and share digital fiction, filling in the gaps between the media they are given and the stories they seek. *Neverending Stories* explores the influences of literature and computing on digital fiction and how the practices and cultures of each have impacted who makes and plays digital fiction. Popular creativity emerges from subordinated groups often excluded from producing cultural resources, accepting the materials of capitalism and inverting them for their own carnivalesque uses. Popular digital fiction goes by many different names: webnovels, adventure games, visual novels, Twitter fiction, webcomics, Twine games, walking sims, alternate reality games, virtual reality films, interactive movies, enhanced books, transmedia universes, and many more. The book establishes digital fiction in a foundation of innovation, tracing its emergence in various guises around the world. It examines Infocom, whose commercial success with interactive fiction crumbled, in no small part, because of its failure to consider women as creators or consumers. It takes note of the brief flourish of commercial book apps and literary games. It connects practices of cognitive and conceptual interactivity, and textual multiplicity-dating to the origins of the print novel-to the feminine. It pushes into the technological future of narrative in immersive and mixed realities. It posits the transmedia franchises and the practices of fanfiction as examples of digital fiction that will continue indefinitely, regardless of academic notice or approval.

Warren Buffett, one of the richest men in the world, said it best: 'There's class warfare, all right, but it's my class, the rich class, that's making war, and we're winning'. The revolt from above has affected all fields - not only the economy, but also justice and education. It has twisted our ideas of society, family and ourselves. Benjamin Loy, 2018-03-05 How can we talk about World Literature if we do not actually examine the world as a whole? Research on World Literature commonly focuses on the dynamics of a western center and a southern periphery, ignoring the fact that numerous literary relationships exist beyond these established constellations of thinking and reading within the Global South. *Re-Mapping World Literature* suggests a different approach that aims to investigate new navigational tools that extend beyond the known poles and meridians of current literary maps. Using the example of Latin American literatures, this study provides innovative insights into the literary modeling of shared historical experiences, epistemological crosscurrents, and book market processes within the Global South which thus far have received scant attention. The contributions to this volume, from renowned scholars in the fields of World and Latin American literatures, assess travelling aesthetics and genres, processes of translation and circulation of literary works, as well as the complex epistemological entanglements and shared worldviews between Latin America, Africa and Asia. A timely book that embraces highly innovative perspectives, it will be a must-read for all scholars involved in the field of the global dimensions of literature.

Malcolmson, 2016-04-01 Arguing that the early Royal Society moved science toward racialization by giving skin color a new prominence as an object of experiment and observation, Cristina Malcolmson provides the first book-length examination of studies of skin color in the Society. She also brings new light to the relationship between early modern literature, science, and the establishment of scientific racism in the nineteenth century. Malcolmson demonstrates how unstable the idea of race remained in England at the end of the seventeenth century, and yet how extensively the intertwined institutions of government, colonialism, the slave trade, and science were collaborating to usher it into public view. Malcolmson places the genre of the voyage to the moon in the context of early modern discourses about human difference, and argues that Cavendish's *Blazing World* and Swift's *Gulliver's Travels* satirize the Society's emphasis on skin color.

dear benjamin novel pdf: Boredom, Architecture, and Spatial Experience Christian

Parreno, 2021-02-11 Boredom is a ubiquitous feature of modern life. Endured by everyone, it is both cause and effect of modernity, and of situations, spaces and surroundings. As such, this book argues, boredom shares an intimate relationship with architecture-one that has been seldom explored in architectural history and theory. *Boredom, Architecture, and Spatial Experience* investigates that relationship, showing how an understanding of boredom affords us a new way of looking at and understanding the modern experience. It reconstructs a series of episodes in architectural history, from the 19th century to the present, to survey how boredom became a normalized component of the everyday, how it infiltrated into the production and reception of architecture, and how it serves to diagnose moments of crisis in the continuous transformations of the built environment. Erudite and innovative, the work moves deftly from architectural theory and philosophy to literature and psychology to make its case. Combining archival material, scholarly sources, and illuminating excerpts from conversations with practitioners and thinkers-including Charles Jencks, Rem Koolhaas, Sylvia Lavin, and Jorge Silvetti-it reveals the complexity and importance of boredom in architecture.
