Bush. The book draws on exclusive photos, some never seen before, culled from the Department's official archive and include interviews with dozens of FDNY members who responded that day and worked in the aftermath. The book chronicles, through photos and words of FDNY members, the department's efforts to rebuild and feature major operations since Sept. 11, including FDNY's response to Hurricane Katrina and Haiti, the Miracle on the Hudson, the Manhattan crane collapse and the plane crash in Queens just two months after Sept. 11..

fdny s95: Firefight Ginger Adams Otis, 2015-05-26 In 1919, when Wesley Williams became a New York City firefighter, he stepped into a world that was 100% white and predominantly Irish. As far as this city knew, black men in the Fire Department of New York (FDNY) tended horses. Nearly a century later, many things in the FDNY had changed—but not the scarcity of blacks. New York had about 300 black firefighters—roughly 3 percent of the 11,000 New York firefighters in a city of two million African Americans. That made the FDNY a true aberration compared to all the other uniformed departments, like the NYPD. Decades earlier, women and blacks had sued over its hiring practices and won. But the FDNY never took permanent steps to eradicate the inequities, which led to a courtroom show-down between New York City's billionaire Mayor, Mike Bloomberg, and a determined group of black activist firefighters. It was not until 2014 that the city settled the \$98 million lawsuit. At the center of this book are stories of courage—about firefighters risking their lives in the line of duty but also risking their livelihood by battling an unjust system. Among them: FDNY Captain Paul Washington, a second generation black firefighter, who spent his multi-decade career fighting to get minorities on the job. He faced an insular culture made up of relatives who never saw their own inclusion as favoritism. Based on author Ginger Adams Otis' years of on the ground reporting, *Firefight* is an exciting blend of the high-octane energy of firefighting and critical Civil Rights history.

fdny s95: Last Man Down Richard Picciotto, Daniel Paisner, 2003-05-06 A first responder's harrowing account of 9/11—the inspirational true story of an American hero who gave nearly everything for others during one of New York City's darkest hours. On September 11, 2001, FDNY Battalion Chief Richard “Pitch” Picciotto answered the call heard around the world. In minutes, he was at Ground Zero of the worst terrorist attack on American soil, as the Twin Towers of the World Trade Center began to burn—and then to buckle. A veteran of the 1993 bombing of the World Trade Center, Picciotto was eerily familiar with the inside of the North Tower. And it was there that he concentrated his rescue efforts. It was in its smoky stairwells where he heard and felt the South Tower collapse. He made the call for firemen and rescue workers to evacuate, while he stayed behind with a skeleton team of men to help evacuate a group of disabled and infirm civilians. And it was in the rubble of the North Tower where Picciotto found himself buried—for more than four hours after the building's collapse.

The book explores the firemen's world, from firehouse life to heroism and tragedy. It shows the love of their work, their family-like camaraderie, amusing stories, their helping people in peril and saving lives. This book is as moving as it is informative. Chapters include establishing the firehouse, the officers and men, the apparatus and equipment, firehouse life, early FDNY cartoons, firefighter deaths, runs and workers and firefighting today. There are many wonderful black and white vintage photographs and moving stories from firefighters themselves, which captures the spirit of this historic firehouse.
