horse bead pattern: Quill and Beadwork of the Western Sioux Carrie Alberta Lyford, 1940
...we have tried here to present designs known to be Sioux, for use in Sioux schools. The purpose of the book is a practical one. Though we have striven for accuracy, our aim has not been an exhaustive scientific study. Rather, it has been to bring together a representative collection of designs and to explain them, so that practical workers, both students and teachers, may be able to recognize the bead and quillwork of the western Sioux and to make it for themselves. The art has changed in the past and those who understand its style and uses may use their imaginations to develop it still more, while keeping it Indian and Sioux.--Introduction, page 9.

horse bead pattern: **Among Herders of Inner Mongolia** Christel Braae, 2017-10-20 This is a study of a unique collection of Inner Mongolian artifacts at the National Museum of Denmark. They are described, analyzed and presented in a catalogue of more than 800 items, documenting the daily life of pastoral society in and around the tent, in the herding of the animals, in caravan trade and in hunting, crafts, sports and games, and in ritual life. Information about the objects was obtained during two expeditions to Inner Mongolia in the 1930s led by the Danish author Henning Haslund-Christensen, who had many years' experience of travel and expedition life in Mongolia. This is also a detailed account of the expeditions; of the routes, means and measures, as well as the worries and hopes of the participants; of their struggles with scientific aspirations; and of the conditions for collecting against the backdrop of the Chinese civil war and the Japanese occupation. The First and Second Danish Expeditions to Central Asia took place in 1936-1937 and 1938-1939 respectively. These expeditions were the sole foreign parties with access to the area at the time, and therefore their members were among the few observers of Inner Mongolian pastoral society at a time and place for which information was, and still is, scant and fragmented. Hence, the material objects and data obtained are of great scientific importance in the documentation of the life and material culture of Inner Mongolian herders in the 1930s - the main subject of the present book.

horse bead pattern: **Studies in Silk Road Archaeology** Nai Xia, 2024-03-31 This book is a collection of Nai Xia's quintessential works on Silk Road studies. A key resource in the field of Silk Road Archaeology, it features in-depth content, a broad range of material, careful textual research, and meticulous analysis. With thorough investigations of foreign coinage, silk textiles, and artifacts with foreign styles excavated in different parts of China, it explores the exchange between ancient China and Central Asia, Western Asia, and Europe. In particular, this book provides detailed descriptions of the economic and cultural ties between ancient China, Pre-Islamic Arabia, the Sasanian Empire, and the Byzantine Empire. The research propounds innovative theories on the history and evolution of East-West transportation routes, i.e., the overland Silk Road and the Maritime Silk Road. Based on the study of ancient relics and excavated artifacts, it points out that cultural exchange along the Silk Road was never unilateral, but instead, mutual influence and cooperation were obvious. Since ancient times, countries along the Silk Road have had a tradition of

amicable foreign relations and the promotion of common interests. The book is intended for academics, scholars and researchers.

horse bead pattern: Santería Enthroned David H. Brown, 2003-10-15 Ever since its emergence in colonial-era Cuba, Afro-Cuban Santería (or Lucumí) has displayed a complex dynamic of continuity and change in its institutions, rituals, and iconography. In *Santería Enthroned*, David H. Brown combines art history, cultural anthropology, and ethnohistory to show how Africans and their descendants have developed novel forms of religious practice in the face of relentless oppression. Focusing on the royal throne as a potent metaphor in Santería belief and practice, Brown shows how negotiation among ideologically competing interests have shaped the religion's symbols, rituals, and institutions from the nineteenth century to the present. Rich case studies of change in Cuba and the United States, including a New Jersey temple and South Carolina's Oyotunji Village, reveal patterns of innovation similar to those found among rival Yoruba kingdoms in Nigeria. Throughout, Brown argues for a theoretical perspective on culture as a field of potential strategies and usable pasts that actors draw upon to craft new forms and identities—a perspective that will be invaluable to all students of the African Diaspora.
