in the heights pdf script: A Gentle Introduction to Effective Computing in Quantitative Research Harry J. Paarsch, Konstantin Golyaev, 2016-05-06 A practical guide to using modern software effectively in quantitative research in the social and natural sciences. This book offers a practical guide to the computational methods at the heart of most modern quantitative research. It will be essential reading for research assistants needing hands-on experience; students entering PhD programs in business, economics, and other social or natural sciences; and those seeking quantitative jobs in industry. No background in computer science is assumed; a learner need only have a computer with access to the Internet. Using the example as its principal pedagogical device, the book offers tried-and-true prototypes that illustrate many important computational tasks required in quantitative research. The best way to use the book is to read it at the computer keyboard and learn by doing. The book begins by introducing basic skills: how to use the operating system, how to organize data, and how to complete simple programming tasks. For its demonstrations, the book uses a UNIX-based operating system and a set of free software tools: the scripting language Python for programming tasks; the database management system SQLite; and the freely available R for statistical computing and graphics. The book goes on to describe particular

tasks: analyzing data, implementing commonly used numerical and simulation methods, and creating extensions to Python to reduce cycle time. Finally, the book describes the use of LaTeX, a document markup language and preparation system.

But what if instructors could blend the two pieces together more effectively, motivating students with interesting material while still achieving curriculum goals? This text attempts to fuse the pieces in to a cohesive philosophy. Yin and Yang in the English Classroom: Teaching With Popular Culture Texts is designed to provide college professors and high school teachers with both halves they need to tackle the job of teaching students literature and writing skills: theoretical foundations of, and practical applications for, the modern classroom. In addition to theory and research, each chapter also offers ready-to-use activities and projects that can be immediately brought into the classroom. Whether you’re new and need a guide to begin your journey as a teacher, or you’re experienced and want to add some spice to your classroom, this text can offer new ways to fold popular culture effectively into your teaching toolbox. Other key features of this book include: Clear, easy-to-read sections for each chapter, including a Review of Current Literature and Classroom Connections Student-centered solutions to increase engagement with popular culture and technology Step-by-step plans for taking the activities from the page to the classroom easily

in the heights pdf script: The Architecture of Suspense Christine Madrid French, 2022-09-08 The inimitable, haunting films of Alfred Hitchcock took place in settings, both exterior and interior, that deeply impacted our experiences of his most unforgettable works. From the enclosed spaces of Rope and Rear Window to the wide-open expanses of North by Northwest, the physical worlds inhabited by desperate characters are a crucial element in our perception of the Hitchcockian universe. As Christine Madrid French reveals in this original and indispensable book, Hitchcock’s relation to the built world was informed by an intense engagement with location and architectural form—in an era marked by modernism’s advance—fueled by some of the most creative midcentury designers in film. Hitchcock saw elements of the built world not just as scenic devices but as interactive areas to frame narrative exchanges. In his films, building forms also serve a sentient purpose—to capture and convey feelings, sensations, and moments that generate an emotive response from the viewer. Visualizing the contemporary built landscape allowed the director to illuminate Americans’ everyday experiences as well as their own uncertain relationship with their environment and with each other. French shares several untold stories, such as the real-life suicide outside the Hotel Empire in Vertigo (which foreshadowed uncannily that film’s tragic finale), and takes us to the actual buildings that served as the inspiration for Psycho’s infamous Bates Motel. Her analysis of North by Northwest uncovers the Frank Lloyd Wright underpinnings for Robert Boyle’s design of the modernist house from the film’s celebrated Mount Rushmore sequence and ingeniously establishes the Vandamm House as the prototype of the cinematic trope of the villain’s lair. She also shows how the widespread unemployment of the 1930s resulted in a surge of gifted architects transplanting their careers into the film industry. These practitioners created sets that drew from contemporary design schools of thought and referenced real structures, both modern and historic. The Architecture of Suspense is the first book to document how these great architectural minds found expression in Hitchcock’s films and how the director used their talents and his own unique vision to create an enduring and evocative cinematic world. Publication of this volume was assisted by a grant from Furthermore: a program of the J. M. Kaplan Fund

records. Building on previous work on the uses of the written word in the early Middle Ages, which has dispelled the myth that this was an age of 'orality', the contributions in this volume bring to the fore the crucial question of language choice in the documentary cultures of early medieval societies. Specifically, they examine the interactions between Latin and Germanic vernaculars in the Anglo-Saxon and eastern Frankish worlds and in neighbouring areas. The chapters are underpinned by an important comparative dimension on account of the two regions' shared linguistic heritage and numerous cross-Channel links. Knapp, 2019-01-09 To be successful, teachers of English in grades 6-12 need more than basic content knowledge and classroom management skills. They need a deep understanding of the goals and principles of teaching literature, writing, oral discourse, and language in order to make sound instructional decisions. This engaging book explores the pedagogical foundations of the discipline and gives novice and future teachers specific guidance for creating effective, interesting learning experiences. The authors consider such questions as what makes a literary text worth studying, what students gain from literary analysis, how to make writing meaningful, and how to weave listening and speaking into every class meeting. Professional learning and course use are facilitated by end-of-chapter reflection questions, text boxes, and appendices showcasing exemplary learning activities.

in the heights pdf script: Designing Sustainable and Resilient Cities Alessandro Melis, Julia Brown, Claire Coulter, 2022-07-27 This book explores the link between the Food-Water-Energy nexus and sustainability, and the extraordinary value that small tweaks to this nexus can achieve for more resilient cities and communities. Using data from Urban Living Labs in six participating cities (Eindhoven, Gdańsk, Miami, Southend-on-Sea, Taipei, and Uppsala) to co-define context-specific challenges, the results from each city are collated into an Integrated Decision Support System to guide and improve robust decision-making on future urban development. The book presents contributions from CRUNCH, a transdisciplinary team of scholars and practitioners whose expertise spans urban climate modelling; food, water, and energy management; the design of resilient public space; collecting better urban data; and the development of smart city technology. Whilst previous works on the Food-Water-Energy nexus have focused on large, transnational cases, this book explores local ways to use the Food-Water-Energy nexus to improve urban resilience. It suggests tangible ways in which the cities and communities around us can become both more efficient and more climate resilient through small changes to their existing infrastructure. Over half of the world's population lives in urban areas, and this is expected to increase to 68% by 2050. We urgently need to make our cities more resilient. This book provides a planning tool for decision-making and concludes with policy recommendations, making it relevant to a range of audiences including urbanists, environmentalists, architects, urban designers, and city planners, as well as students and scholars interested in alternative approaches to sustainability and resilience. Chapter 2 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

in the heights pdf script: Making Place through Ritual Lea Schulte-Droesch, 2018-09-10 Indian indigenous societies are especially known for their elaborate rituals, which offer an excellent chance for studying religion as practice. However, few detailed ethnographic works exist on the ritual practices of these societies. Based on long-term ethnographic fieldwork in Jharkhand, India this book offers insights into contemporary, previously not described rituals of the Santal, one of the largest indigenous societies of Central India. Its focus lies on culturally specific notions of place as

articulated and created during these rituals. In three chapters the book discusses how the Santal make place on different local, regional and global levels through their rituals: They reaffirm their ancestral roots in their land during large sacrificial rituals. They offer sacrifices to the dangerous deities of the forest in exchange for rain. And they claim their region to be a Santal region through large festivals celebrated in sacred groves, which they link to national and global discourses of indigeneity and environmentalism. Through an analysis of the rituals of a specific society, this book addresses broader issues. It presents an example of how to study religion as a practical activity. It portrays culture-specific perceptions of the environment. And last, the book underlines the potential that lies in choosing place as a lens to study social phenomena in context.
