math mysteries printable free: *Dead Men Don't Chew Gum: A FREE Funny Mystery Romance Series Starter* Nina Cordoba, 2019-07-30 NEVER take the short cut... Rika Martín wasn't in Bolo, Texas five minutes before she was run off the road, tripped over a dead body, then arrested for murder. And she's not so sure about Nick, the lawyer who's been assigned to her, even when he's shirtless, wearing a cowboy hat, and holding an extra-long hose. (Okay, maybe then.) All Nick Owen can think about is getting out of Bolo, a hometown he never should have returned to. Until he goes to pick up his best friend Gabe—the local judge—for a round of golf and is forced to represent a murder suspect. Gabe, of all people, knows Nick has sworn off murder trials after what happened last time. Unfortunately, he also knows Nick is a damn good trial lawyer. Even worse, this

“Paprika Anise Martín”—if you can believe that—seems more determined to solve the murder case than to defend herself against it in court. With claims of devil worshipers in the area and at least one shooter determined to take Rika out, can Nick and Rika resolve this case before the murderer gets rid of her for good? More about this series: Is this series humorous? Yes, most readers find it laugh-out-loud funny. Is this series romantic? Yes, while each funny mystery is solved at the end of each book, the romance between the geek girl heroine and the cowboy lawyer grows throughout the series. Is there action? Yes, it's full of original, often wild and quirky, action scenes. Will this series have warm, touching, uplifting moments like the Nina Cordoba romantic comedies? Yes, Nina is all about creating unique, unforgettable characters you can feel with. Does it matter which order I read them in? Due to the many revelations about recurring characters as you get to know them as well as the humor call backs to earlier books, this series is best read in order. math mysteries printable free: Asteroid Answers to Ancient Calendar Mysteries Herbert B. Stollorz, 2008-07-03 Ancient calendars found around the world are designed to end one point in time. They communicate an urgent warning to everyone alive today! Complex bronze and gold clocks with multiple dials are found in museums around the world. Why they have such advanced intricacy has stumped scientists for hundreds of years. This book reveals why the ancients built so many pyramids, observatories as well as those complex gold and bronze clocks with more than one dial. It surprised me greatly to discover that their various complex designs in one way or another converge on 21 December 2012. It amazes me that ancient cultures separated by thousands of miles of geography and thousands of years in chronology agree so precisely in the cyclical nature of time, history and prophecy, which is history written in advance. The most famous example is the Mayan-Aztec calendar, which ends its 25,626-year cycle on that momentous date. Some researchers have also found 21 December 2012 in what is called, the Bible Code. Using very different research methods, I discovered it in the Bible's book of Revelation and Daniel's prophecies. It is one of the most important dates in the plan of God for all humanity!
