But what if everything we’ve heard was backwards? High in calories and cholesterol, animal fats and proteins too often leave you hungry and lead to overeating and weight gain. They are often the root causes of a host of avoidable health problems—from indigestion, ulcers, and constipation to obesity, diabetes, heart disease, and cancer. On the other hand, complex carbohydrates like whole grains, legumes, tubers, and other starches provide your body with essential proteins and nutrients that satisfy the appetite while simultaneously fighting illness. But Americans eat far too few calories from carbohydrates—only about forty percent, according to Dr. John McDougall, internationally renowned expert on nutrition and health, featured on the documentary Forks Over Knives. The Healthiest Diet on the Planet helps us reclaim our health by enjoying nutritious starches, vegetables, and fruits. McDougall takes on the propaganda machines pushing dangerous, high-fat fad diets and cuts through the smoke and mirrors of the diet industry.
