poems for nurses appreciation: From Silence to Voice Bernice Buresh, Suzanne Gordon, 2013-05-03 To get the resources and respect they need, nurses have long had to be advocates for themselves and their profession, not just for their patients. For a decade, *From Silence to Voice* has provided nurses with the tools they need to explain the breath and complexity of nursing work. Bernice Buresh and Suzanne Gordon have helped nurses around the world speak up and convey to the public that nursing is more than dedication and caring-it demands specialized knowledge, expertise across a range of medical technologies, and decision-making about life-and-death issues. Nurses and nursing organizations, they write, must go out and tell the public what nurses really do so that patients can actually get the benefit of their expert care. The comprehensively revised and updated third edition of *From Silence to Voice* will help nurses construct messages using a range of traditional and new social media that accurately describe the true nature of their work. Because nurses are busy, the communication techniques in this book are designed to integrate naturally into nurses' everyday lives and to complement nurses' work with patients and families.

The two volume books contain 181 chapters, distributed in twenty sections (ten in each volume) covering major highlights in my life journey. In addition to deep reflections from my own life stories in faith and medicine, topics include Jesus, love, patient care, the human brain, neurosurgery, illness, residents, healthcare crises, meditations and memories over four decades. I hope you, the reader, to take the positives of my journey and find it useful to your own journey as a participant sojourning in this world with me.
