a walk in the woods pdf: Unraveling the Gray Area Problem Luke Griffith, 2023-12-15 In *Unraveling the Gray Area Problem*, Luke Griffith examines the US role in why the Intermediate-Range Nuclear Forces (INF) Treaty took almost a decade to negotiate and then failed in just thirty years. The INF Treaty enhanced Western security by prohibiting US and Russian ground-based missiles with maximum ranges of 500 to 5,500 kilometers. Significantly, it eliminated hundreds of Soviet SS-20 missiles, which could annihilate targets throughout Eurasia in minutes. Through close scrutiny of US theater nuclear policy from 1977 to 1987, Griffith describes the Carter administration's masterminding of the dual-track decision of December 1979, the North Atlantic Treaty Organization (NATO) initiative that led to the INF Treaty. The Reagan administration, in turn, overcame bureaucratic infighting, Soviet intransigence, and political obstacles at home and abroad to achieve a satisfactory outcome in the INF negotiations. Disagreements between the US and Russia undermined the INF Treaty and led to its dissolution in 2019. Meanwhile, the US is developing a new generation of ground-based, INF-type missiles that will have an operational value on the battlefield. Griffith urges policymakers to consider the utility of INF-type missiles in new arms control negotiations. Understanding the scope and consistency of US arms control policy across the Carter and Reagan administrations offers important lessons for policymakers in the twenty-first century.

a walk in the woods pdf: With Distance in His Eyes Scott Raymond Einberger, 2018-04-16 One of America's most significant architects of conservation and the environment, Stewart Udall, comes to life in this environmental biography. Perhaps no other public official or secretary of the interior has ever had as much success in environmental protection, natural resource conservation, and outdoor recreation opportunity creation as Udall. A progressive Mormon, born and raised in rural Arizona, Udall served as the U.S. Secretary of the Interior under the presidential cabinets of John F. Kennedy and Lyndon Baines Johnson from 1961-1969. During these eight years, he established dozens of new national park units and national wildlife refuges, wrote the Endangered Species Preservation Act, lobbied for unpolluted water, and offered ways to beautify urban spaces and bring the impoverished out of poverty. Later in life, he continued as an advocate for conservation and the environment, specifically by proposing solutions to the challenges associated with global warming and the widespread use of oil. What can we learn from this farsighted individual? In a day and age of partisan politics, poor congressional approval ratings, and global warming and climate change, this captivating biography offers a profound and historical record into Udall's life-long devotion to environmental issues he cared about most deeply—issues more relevant today than they were then. Intimate moments include Udall's learning of the Kennedy assassination, his push for civil rights for African Americans, his meeting in the U.S.S.R. with Nikita Khrushchev—the first Kennedy cabinet member to do so—and his warnings about global warming 50 years prior to Al Gore's Nobel Prize-winning film.

a walk in the woods pdf: *Ardennes 1944* Antony Beevor, 2015-11-03 The prizewinning historian and bestselling author of *D-Day*, *Stalingrad*, and *The Battle of Arnhem* reconstructs the Battle of the Bulge in this riveting new account On December 16, 1944, Hitler launched his 'last gamble' in the snow-covered forests and gorges of the Ardennes in Belgium, believing he could split the Allies by driving all the way to Antwerp and forcing the Canadians and the British out of the war. Although his generals were doubtful of success, younger officers and NCOs were desperate to believe that their homes and families could be saved from the vengeful Red Army approaching from the east. Many were exultant at the prospect of striking back. The allies, taken by surprise, found themselves fighting two panzer armies. Belgian civilians abandoned their homes, justifiably afraid of German revenge. Panic spread even to Paris. While some American soldiers, overwhelmed by the German onslaught, fled or surrendered, others held on heroically, creating breakwaters which slowed the German advance. The harsh winter conditions and the savagery of the battle became comparable to the Eastern Front. In fact the Ardennes became the Western Front's counterpart to Stalingrad. There was terrible ferocity on both sides, driven by desperation and revenge, in which the normal rules of combat were breached. The Ardennes—involving more than a million men—would prove to be the battle which finally broke the back of the Wehrmacht. In this deeply researched work, with striking insights into the major players on both sides, Antony Beevor gives us the definitive account of the Ardennes offensive which was to become the greatest battle of World War II.

a walk in the woods pdf: *Mothership* Greg Wrenn, 2024-03-26 A dazzling, evidence-based account of one man's quest to heal from complex PTSD by turning to endangered coral reefs and psychedelic plants after traditional therapies failed—and his awakening to the need for us to heal the planet as well. Professor Greg Wrenn likes to tell his nature-writing students, "The ecological is personal, and the personal is ecological." What he's never told them is how he's lived out those correspondences to heal from childhood abuse at the hands of his mother. Weaving together memoir and cutting-edge science, *Mothership* is not just a queer coming-of-age story. It's a deeply researched account of how coral reefs and a psychedelic tea called ayahuasca helped Greg heal from complex PTSD—a disorder of trust, which makes the very act of bonding with someone else panic-inducing. From the tide pools in Florida where he grew up, to Indonesia's Raja Ampat archipelago and the Amazon rainforest, this is his search for wholeness when talk therapy and pharmaceuticals did little to help. Along the way, as his ecological conscience wakes up, he takes readers underwater to the last pristine reefs on earth, and into the psyche. Written with prophetic

urgency, Motherhood ultimately asks if doses of nature will be enough to save us before it's too late.
